Online Arbitration

Faye Fangfei Wang

This book provides a comparative study of online dispute resolution (ODR) systems and a model of best practice, taking into consideration the features and characteristics of various examples of ODR. By exploring both the theoretical framework and the practical considerations of ODR, this book will be a vital reference for lawyers, policy-makers, government officials, industry professionals and academics who are involved with online arbitration.

Public Law

Chris Monaghan

Public Law guides students through all the essential components of the Public Law module, in a user-friendly structure that is ideal for visual learners. Written by an experienced teacher of Public Law, the book takes an accessible and engaging approach to often complex areas of law, politics and the constitution. Integrated pedagogic features ease navigation of the text and reinforce key points. Public Law is essential reading for modules on public law and constitutional and administrative law on LLB degrees and conversion courses.

Comparative Contract Law

An Introduction

Ermanno Calzolaio

Comparative Contract Law: An Introduction offers an overview of the main aspects of contract law from a comparative perspective, and a methodology to facilitate understanding of the different rules of contract law, focusing on the comparison between civil law and common law. Students will learn about common problems to be faced when contracting with parties coming from different jurisdictions, whilst also acquiring a deeper understanding of the approach of their own legal system. The book will be key reading for undergraduate and postgraduate students of Comparative Contract Law, and Contract Law more generally.

2ND EDITION

Contract Law

Tracey Cooper, Ewan Kirk

Series: Spotlights

This fully updated second edition of Contract Law is engaging and accessible, and aimed at students on core LLB and GDL courses. Combining comprehensive coverage of the curriculum with carefully-developed pedagogical tools, the authors help students build their knowledge, gain an enhanced understanding of how the law works, and develop their ability to apply this knowledge and understanding in assessment situations.

5TH EDITION

Text, Cases and Materials on Contract Law

Richard Stone, James Devenney

Written by leading authors in the field, this clear and highly accessible volume provides full coverage of the topics commonly found in the contract law syllabus, alongside up-to-date illustrative case examples and stimulating commentary. Composed of approximately one-quarter authors' commentaries and three-quarters cases and materials, including academics' articles and extracts from books and Law Commission papers, this book takes account of a variety of theoretical perspectives, including economic, relational and empirical conceptions of the law.

15TH EDITION

The Modern Law of Contract

Richard Stone, James Devenney

Written by an author team with over sixty years of combined teaching experience, the new edition of The Modern Law of Contract is the complete textbook for students of contract law, providing not only clear and authoritative commentary but also a selection of learning features to enable students to engage actively with the law. The 15th edition has been fully updated to address recent developments in contract law. It offers a carefully tailored overview of all key topics for LLB and GDL courses, and includes a number of learning features designed to enhance comprehension and aid exam preparation.

2ND EDITION

Criminal Law: The Basics

Jonathan Herring

Series: *The Basics*

Criminal Law: The Basics is an insightful introduction to the legal aspects of criminal acts, ranging from battery to burglary and harassment to homicide. Featuring a range of case studies, from both the infamous to the bizarre, the new edition has been thoroughly updated to include new material on loss of control; accessory liability; dishonesty; causation; liability, manslaughter, and sexual offences. Relevant cases, statutes and suggestions for further reading are included throughout, making Criminal Law: The Basics the ideal starting point for anyone studying this area for the first time.

6TH EDITION

Evidence: Law and Context

Claire McGourlay, Mark Thomas, Suzanne Gower

Evidence: Law and Context explains the key concepts of evidence law in England and Wales clearly and concisely, set against the backdrop of the broader political and theoretical contexts. The book focuses on the essential topics commonly found on Evidence courses, covering both criminal evidence and civil evidence. Taking a contextual approach, the authors show how wider policy debates and societal trends have impacted upon the recent evolution of the law, helping to explain how and why the law has developed. Well written, clear and with a logical structure throughout, it contains all the information necessary for any undergraduate evidence law module.

5TH EDITION

Text and Materials on the Criminal Justice Process

Nicola Padfield, Jonathan Bild

Highlighting key issues in Criminal Justice that students need to consider, the Fifth Edition of this popular text contains a wide and varied selection of materials which help to explain the evolution of the criminal justice process in England and Wales since the early 1990s. Statutes, case law, empirical research and official and unofficial reports, as well as theoretical perspectives, and academic comment are woven together and contextualized by the accompanying narrative to provide an authoritative account of the recent development of the criminal justice system.

The Philosophy of Criminal Law

An Introduction

Christopher Cowley, Nicola Padfield

The Philosophy of Criminal Law: An Introduction explores the central concepts of criminal law, such as intention, complicity, duress, and how they work, both within criminal law practice and in our everyday lives, from legal and philosophical perspectives. Offering talking points to enrich an ongoing conversation, this unique textbook addresses all of these questions in an accessible way for law and non-law students alike. This text will be ideal reading for advanced undergraduate and graduate students of law, philosophy and criminology, as well as political science and sociology.

English Legal System

Ryan Murphy, Frances Burton

Series: Spotlights

The English Legal System offers a modern, contemporary approach to the core ELS curriculum, offering clear explanations to clarify the material without oversimplification. Using carefully developed learning tools to help students not only build their knowledge of the law, this book will also help students to translate that knowledge successfully to an assessment situation (whether examination, tutorial preparation or coursework) through the acquisition and development of key skills such as problem solving and application, critical reasoning and evaluation and research and referencing.

20TH EDITION

Slapper and Kelly's The English Legal System

David Kelly

This latest edition of Slapper and Kelly's The English Legal System has not only been restructured and updated, but extensively refocused, to provide a reliable analysis of the contemporary legal system in the socio/political uncertainty of a post-Brexit, post-Covid UK. Accompanying Instructor and Student Resources website provides free digital materials, including an extensive practical guide for students to refine legal skills, a fully updated glossary with interactive flashcards to test vocabulary; and further reading. Trusted by generations of academics and students, this authoritative textbook is a permanent fixture in this ever-evolving subject.

Banking Law and Financial Regulation in the UK and EU

Technology, Human Rights and Crises

Pierre de Gioia Carabellese, Camilla Della Giustina

The advanced-level textbook *Banking Law and Financial Regulation in the UK and EU* offers a new format for the study of banking and financial law, placing it within the wider context of economic development. As such, two elements are integral to this new methodology: the rise of techno-banking and digitalisation of the financial sector, and Brexit. The book also takes a comparative approach to UK and EU banking law, highlighting the legal consequences of the UK's exit from European Union. It will be a valuable text for students taking advanced undergraduate and postgraduate-level courses in banking law and financial law, as well as practising lawyers, managers and accountants.

EU Law

Gerard Conway

Series: Spotlights

EU Law provides a comprehensive examination of the law of the European Union in two distinct parts, covering the institutions, structure and processes of the EU as well as the substantive law, as enacted by the Lisbon Treaty. As part of the Routledge Spotlights series, EU Law brings a modern, contemporary approach to the core curriculum for the LLB and GDL which will help students refine and develop the key skills of problem-solving, evaluation and critical reasoning. By focusing on recent case law and real-word examples, Routledge Spotlights will help you understand how the Law operates in practice and gain a unique appreciation of the contemporary context of the subject.

2ND EDITION

European Banking and Financial Law 2e

Matthias Haentjens, Pierre de Gioia Carabellese

This book serves as a comprehensive introduction to European banking and financial law. It covers not only regulatory law, but also commercial law that is relevant for the most important financial transactions. This second edition has been completely revised. Attention is now also shed on topics such as shadow banking and credit rating agencies. As a matter of course, all new relevant legislation and case law has been included. Also, on the basis of real-life class-room experience, student questions and further reading suggestions have been updated and expanded.

4TH EDITION

European Union Law

Alina Kaczorowska-Ireland

EU Law has firmly established itself as one of the leading textbooks on the subject post-Lisbon Treaty. The book combines comprehensive yet accessible coverage with in-depth analysis of the law and student-friendly pedagogy. The author gives thorough, authoritative, and up-to-the-minute treatment to the institutional, constitutional and substantive elements of EU Law. The book is unique in that it successfully combines depth of coverage with an excellent selection of supporting case law, making this challenging subject accessible and easy to follow. Case summaries and judgments are highlighted in colour-tinted boxes for ease of reference, and are accompanied by key facts and analysis.

7TH EDITION

Unlocking Land Law

Judith Bray

Series: Unlocking the Law

Unlocking Land Law will help you grasp the main concepts of the subject with ease. This 7th edition has been extensively rewritten and updated. In particular it considers the decision in *Regency Villas v Diamond Resorts* and its effect on the definition of what constitutes an easement; the law on forfeiture in co-ownership as considered in *Challen v Challen* as well as the many recent cases on proprietary estoppel such as *Habberfield v Habberfield* and *Horsfield v Horsfield*. It also looks at the different ways that the pandemic has affected property transactions and the changes in the rules with regard to electronic signatures and the witnessing of wills.

Digital Lawyering

Technology and Legal Practice in the 21st Century

Emma Jones, Francine Ryan, Ann Thanaraj, Terry Wong

In today's rapidly changing legal landscape, becoming a digital lawyer is vital to success within the legal profession. This textbook provides an accessible and thorough introduction to digital lawyering, present and future, and a toolkit for gaining the key attributes and skills required to utilise technology within legal practice effectively. Digital Lawyering is ideal for use as a main textbook on modules focused on technology and law, and as a supplementary textbook on modules covering lawyering and legal skills more generally.

6TH EDITION

International Legal English

A Practical Introduction for Students and Professionals

Rupert Haigh

This book provides a highly practical approach to the use of English in commercial legal contexts, and covers crucial law terminology and legal concepts. Written with the needs of both students and practitioners in mind, this book is particularly suitable for readers whose first language is not English but need to use English on a regular basis in legal contexts. The book covers both written and verbal legal communication in typical legal situations in a straightforward manner. It features a companion website which contains exercises covering the majority of the topics covered in the book's chapters.

2ND EDITION

Law Dissertations

A Step-by-Step Guide

Laura Lammasniemi

Law Dissertations: A Step-by-Step Guide provides law students with all the guidance and information they need to complete and succeed in their LLB, LLM or law-related dissertation. Written in an accessible, clear format and with plenty of tools to help to put the theory into practice, Laura Lammasniemi will show students how to make writing a law dissertation easy, without compromising intellectual rigour. The second edition expands guidance to LLM and masters students, and provides up-to-date guidance on how to complete your project using online resources and remotely.

14TH EDITION

Law Made Simple

David L.A. Barker

This 14th edition of Law Made Simple marks the 50th year of the publication for one of the best-selling UK law books. It is the perfect introduction to the English Legal System, and combines an overview of both the legislation and case law relating to all the foundation subjects, including Contract, Torts, Land, Trusts, Criminal, Public and EU. Fully updated, this book acts as a clear and concise guide for students studying law at any level, and takes into account developments across the curriculum.

5TH EDITION

Learning Legal Skills and Reasoning

Sharon Hanson, Tobias Kliem, Ben Waters

The fifth edition of Learning Legal Skills and Reasoning discusses the main sources of English law and explains how to work with legal texts in order to construct credible legal arguments which can be applied in coursework, exams or presentations. Packed full of practical examples and diagrams across the range of legal skills from language and research skills to mooted and negotiation, this textbook will be invaluable to law students seeking to acquire a range of discrete legal skills in order to use them together to produce competent assessed work.

5TH EDITION

Legal Writing

Lisa Webley

Legal Writing guides students comprehensively through this vital legal skill and addresses a range of assessment methods from exam questions to final essays and problem answers. It considers how to deconstruct essay and problem questions and how to conduct and apply legal research to answer set questions. Legal Writing is particularly useful for undergraduate students, especially at the beginning of degree studies, as well as for those preparing for the SQE exams. This fully revised fifth edition includes guidance on how to avoid plagiarism, including examples of the best and worst practices, and how to decipher essay questions in exams and coursework.

Life as a Junior Barrister

In the Words of the Independent Bar

Edited by **Nigel Booth**

This essential volume for all aspiring barristers offers guidance, insights and advice from new barristers from a diverse range of backgrounds and practice areas, shedding light on what life is really like for barristers at the independent Bar. Each chapter is candid and honest about the reality of the Bar and how it measures against student expectations. There is only one Bar, but working in different practice areas brings different challenges. Accessible and engaging, this invaluable resource is the perfect guide for anyone interested in exploring a career at the Bar. It will be an ideal companion to students of Law at any level.

5TH EDITION

Practical Guide to Evidence

Christopher Allen, Chris Taylor, Janice Nairns

Practical Guide to Evidence provides a clear and readable account of the law of evidence, acknowledging the importance of arguments about facts and principles as well as rules. This fifth edition has been revised and updated to address recent changes in the law and debates on controversial topics such as surveillance and human rights. Coverage of expert evidence has also been expanded to include forensic evidence, bringing the text right up-to-date. Including enhanced pedagogical support such as chapter summaries, further reading advice and boxed examples, this leading textbook can be used on both undergraduate and professional courses.

Preparing to Moot

A Step-by-Step Guide to Mooting

Sarah L. Cooper, Scarlett McArdle

The ideal guide for the first-time mooter, this book provides an accessible, systematic and pragmatic approach which demystifies the process. It focuses on analysis, research and argument construction as the foundations for successful advocacy and provides students with a working guide to use alongside moot problems in five popular topic areas: criminal law, contract law, tort law, human rights and the law of equity. This book shows students how to individually analyse, research and construct arguments for one advocate's position, providing a practical and easy-to-follow overview of how to tackle a ground of appeal from 'beginning to advocacy.'

Problem Questions for Law Students

A Study Guide

Geraint Brown

Law students rarely have experience of answering problem questions before university, and lecturers concentrate on teaching content rather than the exam skills needed. This book bridges the gap on how to transpose knowledge and research into structured and coherent answers to problem questions during a Law degree. Aimed at undergraduates, international students, foundation and SQE candidates, the book gives a step-by-step study guide on how to navigate what a problem question is asking you to do. It deconstructs the process using examples from a range of different fields of law, providing essential guidance from research and critical thinking to style and tone.

2ND EDITION

Research Methods in Law

Edited by **Dawn Watkins**

Providing a critically rigorous introduction to the different research methodologies available, this book gives students who are setting out on a project or dissertation a firm understanding of each approach helping them to choose an appropriate method. Covering Doctrinal Research; Socio-Legal Research; Empirical Research; Critical Approaches; Comparative Research; Law and Humanities; each approach is described by an expert in the field who sets out how each particular methodology can be successfully applied and the type of research for which it is suitable. The second edition includes new chapters on Feminist Approaches, Law and Economics and Law and Anthropology.

Comparative Tort Law

Cases, Materials, and Exercises

Thomas Kadner-Graziano

This book promotes a learning by doing approach to comparative law methodology in general, and comparative tort law in particular. In each chapter, the starting point is a case scenario, followed by questions and expertly selected material (legislation, extracts of case law, soft law principles and – where appropriate – extracts of legal doctrine). Using the material provided, students are invited to solve the scenario according to the laws of several jurisdictions, to compare the approaches and solutions that they have identified, to evaluate their respective pros and cons, and to reflect upon the most appropriate approach and solution.

Essential Tort Law for SQE1

Wendy Laws

Series: Essential Law for SQE1

Essential Tort Law for SQE1 explains the key principles of tort law in a clear, easy-to-follow style. Introduced and illustrated with reference to factual and everyday examples, the book fosters a clear and structured approach to analyzing the facts of a client's case and then applying the relevant principles. This concise and accessible text provides everything you'll need to understand the tort element of SQE1. The first in a series of books aimed at those preparing for SQE1, it will also allow you to test yourself against the key assessment skills you will come up against.

Tort Law

Timon Hughes-Davies, Nathan Tamblyn

Series: Spotlights

What happens if a driver carelessly crashes into another car? Or a newspaper publishes a story which makes derogatory comments about someone? Tort law is a collection of such misbehaviours or misadventures where the law deems it appropriate to intervene with civil remedies. This new textbook addresses a range of the most prominent torts. The law is explained with clear writing and an accessible approach, relating the subject to everyday examples. There are key learning points to help anchor the reader's basic understanding, and sections of analysis to guide the reader to a more advanced critical engagement.

Banking Law

Private Transactions and Regulatory Frameworks

Andreas Kokkinis, Andrea Miglionico

This authoritative text offers an in-depth analysis of modern banking law and regulation, while providing an assessment of its effectiveness and normative underpinnings. Its main focus is on UK law and practice, but where necessary it delves into EU law and institutions, such as the European Banking Union and supervisory role of the European Central Bank. Although detailed, the text remains easy to read and reasonably short; pedagogic features such as a glossary of terms and practice questions for each chapter are intended to facilitate learning.

2ND EDITION

European Banking and Financial Law 2e

Matthias Haentjens, Pierre de Gioia Carabellese

This book serves as a comprehensive introduction to European banking and financial law. It covers not only regulatory law, but also commercial law that is relevant for the most important financial transactions. This second edition has been completely revised. Attention is now also shed on topics such as shadow banking and credit rating agencies. As a matter of course, all new relevant legislation and case law has been included. Also, on the basis of real-life class-room experience, student questions and further reading suggestions have been updated and expanded.

2ND EDITION

Rape

Challenging Contemporary Thinking – 10 Years On

Edited by **Miranda A. H. Horvath, Jennifer M. Brown**

This book takes stock of current thinking and research about rape and the way it is handled in practice within the criminal justice system, as well as challenging some of the widely held but inaccurate beliefs about rape. This new edition incorporates old and new contexts where sexual exploitation takes place, identifying some knowledge gaps especially when considering voices of complainants/victims/survivors who are invisible or muted. Numerous new areas of research include the implications arising from #MeToo and Black Lives Matter movements, the limitations of our present criminal justice systems, and radical alternatives to closing the justice gap.

4TH EDITION

A Critical Introduction to Law

Wade Mansell, Belinda Meteyard, Alan Thomson

Challenging the usual introductions to the study of law, *A Critical Introduction to Law* argues that law is inherently political and reflects the interests of the few even while presenting itself as neutral. This fully revised and updated fourth edition provides contemporary examples to demonstrate the relevance of these arguments in the twenty-first century. Clearly written and admirably suited to provoking discussions on the role of law in our contemporary world, this book is ideal for undergraduate and postgraduate students reading law, and will be of interest to those studying legal systems and skills courses, jurisprudence courses, and law and society.

Thinking Critically About Law

A Student's Guide

Amy R. Codling

This book explores what it means to think critically and offers practical tips and advice for students to develop the process, skill and ability of thinking critically while studying law. The book investigates the big questions such as: What is law? What is 'thinking critically'? How can I use critical thinking to get better grades in assessments? What is the role of critical thinking in the work place? These questions and more are explored in *Thinking Critically About Law*.

2ND EDITION

Cybercrime

Key Issues and Debates

Alisdair A. Gillespie

Now in its second edition, *Cybercrime: Key Issues and Debates* provides a valuable overview of this fast-paced and growing area of law. The book offers readers a thematic and critical overview of cybercrime, introducing the key principles and clearly showing the connections between topics as well as highlighting areas subject to debate. Themes discussed include crimes against computers, property, offensive content, and offences against the person, and, new to this edition, cybercrime investigation. Clear, concise and critical, this book is designed for students studying cybercrime for the first time.

2ND EDITION

Discrimination and the Law 2e

Malcolm Sargeant

Discrimination and the Law provides an exploration and evaluation of Discrimination Law, focusing primarily on discrimination in employment. Introducing readers to the concepts of equality and the historical origins of discrimination law, Malcolm Sargeant explores the wider political, social and economic contexts through which discrimination law has evolved. The second edition has been thoroughly updated and includes a new chapter considering discrimination against trade unionists, discrimination against 'non-standard' workers as well as the public sector equality duty.

2ND EDITION

Agricultural and Agribusiness Law

An Introduction for Non-Lawyers

Theodore A. Feitshans

This introductory textbook provides an overview of the concepts necessary for an understanding of agricultural and agribusiness law. The text will help students of land-based industries with little or no legal background to appreciate and identify issues that may require referral or consultation with legal counsel. This new edition is full revised and updated, particularly addressing developments in taxation and trade, and includes a new chapter on criminal law, an area of increasing relevance to agriculture.

Animals, Welfare and the Law

Fundamental Principles for Critical Assessment

Ian A. Robertson

In this objective, practical and authoritative introductory text the author reveals how the fundamental principles of the human-animal relationship drive the development of animal law. The author identifies 29 key principles which constitute the core knowledge necessary for informing animal welfare law. The book also considers animal welfare and law in the context of a global market through discussion of common issues such as climate change, biosecurity, food safety and food supply. It book combines insights from science, ethics and law to provide an essential understanding of what informs society and the law with regards to animals and their welfare.

Environmental Resilience and Food Law

Agrobiodiversity and Agroecology

Edited by Gabriela Steier, Alberto Giulio Ciani

Agrobiodiversity and agroecology go hand-in-hand in promoting environmental resilience in international food systems, and climate change resilient food policy. This book contextualizes how various legal frameworks address agrobiodiversity and agroecology for audiences of students, practitioners, and scholars. Some chapters focus on the legal regulation of agroecology from a food law perspective. Others are geared toward providing regulators, lawmakers and attorneys with the scientific and policy background of those concepts, so that they are equipped to realize ideals and goals from the field of food law in everyday practice and policy.

Food System Transparency

Law, Science and Policy of Food and Agriculture

Edited by Gabriela Steier, Adam Friedlander

Series: *Advances in Agroecology*

This book brings together an international group of agriculture and food lawyers and scientists to define the field of Food System Transparency. Investigating social, economic, political, scientific and legal frameworks, the book addresses topics such as food authenticity, agroecological evaluations, and consumer protection. Interwoven themes of transparency contextualize concepts of food safety, information sharing and regulatory opportunities at a local and global scale. Important reading for graduate-level students, legal scholars, non-legal academics, and advocates for food system transparency, resilience, agroecology and environmental conservation.

International Environmental Law

A Case Study Analysis

Gerry Nagtzaam, Evan van Hook, Douglas Guilfoyle

This book seeks to better understand how International Environmental Law regimes evolve. The authors address throughout the major environmental, economic, and political tensions that have both shaped and constrained the evolution of international environmental policy within regimes, and its expression in international legal rule and norm development. The text is clear, concise, and accessible. It is ideally suited to students and professionals interested in International Environmental Law, and individuals who are intrigued by this dynamic area of law.

Is CITES Protecting Wildlife?

Assessing Implementation and Compliance

Tanya Wyatt

Series: Routledge Studies in Conservation and the Environment

Humans are causing a biodiversity crisis, where one million species are facing extinction. Species are dying, in no small part, because they are overexploited, poached and trafficked and CITES is the main international instrument designed to protect traded wildlife. Does the state of the world's species mean CITES is failing? This book explores the implementation of and compliance with CITES by all one hundred and eighty-three member countries examining both implementation and compliance. This timely book will be essential reading for students and academics interested in wildlife law, trade and trafficking, green criminology and biodiversity conservation more broadly.

Children's Rights and the Law

An Introduction

Hilaire Barnett

The rights of parents over children have long been recognised in law. The rights of children, however, remain far less recognised and certain. This book examines the extent to which primarily English law gives adequate recognition to and protection of the rights of children. The book covers the Children Act 1989, the UN Convention on the Rights of the Child which came into force in the UK in 1992, and the Human Rights Act 1998. The book looks at children's rights thematically. It considers topics including: the right to protection from abuse and neglect; the right to education; children and the criminal justice system; the rights of children to contract and property rights.

Gender and the Law

Judith Bourne, Caroline Derry

Gender and the Law provides an ideal introduction to gender and feminist theory for students, particularly law students, who are taking gender and law-focused modules. Beginning with an overview of traditional notions of gender, the book establishes the key feminist and queer legal theories. It provides a basic structure and overview upon which students can build their understanding of some of the complex and controversial topics and debates around gender.

2ND EDITION

Rape

Challenging Contemporary Thinking – 10 Years On

Edited by **Miranda A. H. Horvath, Jennifer M. Brown**

This book takes stock of current thinking and research about rape and the way it is handled in practice within the criminal justice system, as well as challenging some of the widely held but inaccurate beliefs about rape. This new edition incorporates old and new contexts where sexual exploitation takes place, identifying some knowledge gaps especially when considering voices of complainants/victims/survivors who are invisible or muted. Numerous new areas of research include the implications arising from #MeToo and Black Lives Matter movements, the limitations of our present criminal justice systems, and radical alternatives to closing the justice gap.

A New Introduction to Jurisprudence

Legality, Legitimacy and the Foundations of the Law

Paul Cliteur, Afshin Ellian

One of the central problems of law and jurisprudence is: what is the law? Adopting an intermediate position between legal positivism and natural law, this book reflects on the concept of "liberal democracy" or "constitutional democracy". In five chapters the book analyzes (i) the idea of higher law, (ii) liberal democracy as a legitimate model for the state, (iii) the separation of church and state or secularism as essential for the democratic state, (iv) the universality of higher law principles, (v) the history of modern political thought.

Key Issues and Debates

**Alisdair A. Gillespie**

Now in its second edition, *Cybercrime: Key Issues and Debates* provides a valuable overview of this fast-paced and growing area of law. The book offers readers a thematic and critical overview of cybercrime, introducing the key principles and clearly showing the connections between topics as well as highlighting areas subject to debate. Themes discussed include crimes against computers, property, offensive content, and offences against the person, and, new to this edition, cybercrime investigation. Clear, concise and critical, this book is designed for students studying cybercrime for the first time.

2ND EDITION

Constitutional History of the UK

**Ann Lyon**

An appreciation of the development and evolution of the United Kingdom constitution is vital in order to understand the existing nature of the constitution, proposals for reform and the many complex challenges it faces. Ann Lyon presents a vivid overview of fourteen hundred years of English legal history taking us on a rich journey from a feudal society to the fractured Union of the present day. Drawing on key constitutional themes, *Constitutional History of the United Kingdom* provides insight and context to modern constitutional problems. This second edition has been revised and updated to bring coverage up to the present day.

A New Introduction to Legal Method

Paul Cliteur, Afshin Ellian

A New Introduction to Legal Method provides a comprehensive overview of legal science, and the scientific character of legal knowledge. The inclusion of Dutch, French and German literature sources makes this law title differ from previous writings on legal science. This textbook is ideal for students of legal method, and will be of great interest to those studying legal science, jurisprudence, legal research and legal skills.

5TH EDITION

Cases and Materials on the Carriage of Goods by Sea

Anthony Rogers, Jason Chuah, Martin Dockray

Cases and Materials on the Carriage of Goods by Sea, fifth edition, offers tailored coverage of the most commonly taught topics on Carriage of Goods by Sea courses. Combining a collection of legislative materials, commentaries, scholarly articles, standard forms and up-to-date English case law, it covers the major areas of chartering and bills of lading as well as matters such as exclusion and limitation of liability. A clear, student-friendly text design with a strong emphasis on research and problem solving. This up-to-date collection of materials relating to the carriage of goods by sea will be of value to students of law, researchers and legal practitioners.

Codification of Maritime Law

Challenges, Possibilities and Experience

Edited by Zuzanna Pełowska-Dąbrowska, Justyna Nawrot

This book is the first of its kind to explore the problems inherent in the unification of maritime law. Featuring contributions from leading experts at European maritime law research centres, it considers international conventions, current maritime practice, standard forms and recently adopted or drafted national codifications of maritime law from the codification point of view. Codification of Maritime Law: Challenges, Possibilities and Experience seeks to provide common ground for future unification of maritime law, which makes the book useful both for private and public maritime lawyers and states' maritime administrations worldwide.

3RD EDITION

Marine Insurance Law

Özlem Gürses

Marine Insurance Law introduces and clearly explains all topics covered in Master's-level courses, offering students and those new to the area a comprehensive and accessible overview of this important topic in maritime law. The third edition has been fully updated and expanded to cover additional pre-MIA 1906 cases, as well as the implications of the IA 2015 on the duty of fair presentation of the risk in business insurance and on the remedy for breach of a warranty, the emphasis placed by the UK Supreme Court (especially on the construction of s.55 of the MIA 1906) and the challenges faced in respect of claims for a constructive total loss of the subject matter insured.

2ND EDITION

Marine Policy

An Introduction to Governance and International Law of the Oceans

Mark Zacharias, Jeff Ardron

Series: Earthscan Oceans

This textbook provides readers with a foundation in policy development and analysis, describing how policy, including legal mechanisms, are applied to the marine environment. It presents a systematic treatment of all aspects of marine policy, including climate change, energy, environmental protection, fisheries, mining and transportation. Aligned with current course offerings, this textbook is an ideal introduction for undergraduates and graduate students taking marine affairs, science and policy courses.

Maritime Cabotage Law

Aniekan Akpan

This is the most comprehensive review of maritime cabotage law. It introduces the new theory of Developmental Sovereignty to jurisprudence. The maritime cabotage law provisions and approaches as adopted in many states and jurisdictions have been extensively scrutinised. This book challenges the established and accepted wisdom surrounding maritime cabotage by presenting new reasoning on the underpinning principles of the concept. The book offers a vibrant discussion on the adjustment in the regulatory approaches of maritime cabotage, from one that was intrinsically premised on the idea of national sovereignty, to one that now embraces the broader ideology of development.

5TH EDITION

Maritime Law

Edited by Yvonne Baatz

Series: Maritime and Transport Law Library

Now in its fifth edition, this authoritative guide covers all of the core aspects of maritime law in one distinct volume. Maritime Law is written by a team of leading academics and practitioners, each expert in their own field. Together, they provide clear, concise and fully up-to-date coverage of topics ranging from bills of lading to arrest of ships, all written in an accessible and engaging style. As English law is heavily relied on throughout the maritime world, this book is grounded in English law whilst continuing to analyse the key international conventions currently in force.

Shipboard Management

Simon Daniels

Informed by real world experience of commercial shipboard operations, this textbook supports students undertaking qualification at all stages of maritime training, enhancing and developing knowledge and understanding of the key issues in the Merchant Shipping (Training and Certification) Regulations 1997, as subsequently amended by the 2015 Regulations and other legislation. This will be essential reading for all students and candidates on MCA-accredited Deck training courses, and for seafarers wishing to apply for Certificates of Equivalent Competency. It is also a key reference for professionals in ship owning and management companies, and for maritime lawyers.

8TH EDITION

Shipping Law

Simon Baughen

In this indispensable textbook, Simon Baughen expertly covers the whole spectrum of English shipping law, placing the highly specialised rules of shipping in a commercial context and relating them to the general principles of contract and tort law. The 8th edition is brought fully up to date, covering all the relevant legal implications following on from Brexit. Shipping Law provides an invaluable source of reference, both for students and those in practice. The book's accessible narrative and useful glossary of key terms will especially benefit students new to shipping law or from non-law backgrounds.

The Insurance Act 2015

A New Regime for Commercial and Marine Insurance Law

Edited by Malcolm Clarke, Baris Soyer

The Insurance Act 2015 represents the first major reform of English commercial insurance law for many years. Its impact will be felt not only in England, where it will greatly affect both maritime and commercial insurance practice, but also elsewhere where English law is the law of choice in insurance contracts. Written by a team of insurance experts, this book will analyse in depth the key aspects of the ACT and extensively restates and modifies a number of legal principles applying both at common law and under the Marine Insurance Act 1906.

3RD EDITION

Warranties in Marine Insurance

Baris Soyer

The third edition is brought up to date with significant discussion of recent case law with a view to identifying their impact on established legal principles. The book further develops the chapter on the interpretation of express warranties. Developments to the interpretation of marine and commercial insurance contracts are analysed, and the book considers the dividing line between express warranties and similar terms such as suspensory provisions which have been further complicated in recent judgments.

Digital Media Law

A Practical Guide for the Media and Entertainment Industries

Christopher S. Reed

A practical guide to the law of media and communication, focusing on digital channels, models, and technologies. It draws together the aspects of media law that are most critical for those engaged in the production and distribution of digital media, from traditional broadcasters and internet-based services to major internet platforms. Key features include: "In the News" sections, which tie the legal principles to real-world events and an integrated fictional case study of a media enterprise. This accessible textbook is the ideal companion for advanced undergraduate and graduate students as well as practitioners interested in law, journalism, and media studies.

Commonwealth Caribbean Administrative Law

Eddy Ventose

Series: Commonwealth Caribbean Law

Commonwealth Caribbean Administrative Law comprehensively explores the nature and function of administrative law in contemporary Caribbean society. It considers the administrative machinery of Caribbean States; Parliament, the Executive and the judiciary. It then examines the basis for judicial review of executive and administrative action in the Caribbean by looking at the statutory provisions that underpin this and the plethora of case law emerging from the region. The book will also look to how the courts in the Commonwealth Caribbean have sought to define principles of administrative law. This book will also consider the alternative methods by which the rights of citizens are protected, including the ombudsman and the use of tribunals and inquiries, as well as looking forward to the increasingly significant role of Caribbean Integration law and bodies such as CARICOM and the OES.

3RD EDITION

Commonwealth Caribbean Business Law

Natalie Persadie, Rajendra Ramlogan

Series: Commonwealth Caribbean Law

Breaking away from the traditional English approach of treating business law primarily as the law of contract and agency, this book provides a broad overview of the foundation of various legal systems in the Commonwealth Caribbean region and, where appropriate, embraces the jurisprudence of other Commonwealth nations such as the United Kingdom, Canada and Australia. This third edition has been thoroughly revised and updated to take into account recent developments in case law and legislation for the region, including the impact of the United States FACTA (Foreign Account tax compliance Act) on the Caribbean financial services industry.

4TH EDITION

Commonwealth Caribbean Civil Procedure

Gilbert Kodilinye, Vanessa Kodilinye

Series: Commonwealth Caribbean Law

This new edition of a well-established book is a timely response to the enactment of new rules of civil procedure which are now in force in the vast majority of Caribbean jurisdictions. The fourth edition will be substantially revised to take into account the enactment of the rules and covers case law emerging from their enactment. This book is essential reading for students of Commonwealth Caribbean law and Caribbean legal practitioners.

Commonwealth Caribbean Company Law

Andrew Burgess

Series: Commonwealth Caribbean Law

In the last twenty five years, company law in the Commonwealth Caribbean has undergone dramatic changes, from a model influenced by English law to a new, harmonised collection of regional legislation based on the Caricom and CLI model Acts that vary substantially across Caricom member states. The variation within Caribbean company law presents an enormous challenge, both in terms of the breadth of the subject and in addressing the difference in provisions of one state's Company Law Act as opposed to another. Using the Caricom model Act and CLI model Act as a basis for its structure, Commonwealth Caribbean Company Law examines and compares regional implementation of company law in an accessible and comprehensive manner that will be invaluable to students and practitioners in the region.

5TH EDITION

Commonwealth Caribbean Criminal Practice and Procedure

Roger Ramgoolam

Series: Commonwealth Caribbean Law

The fifth edition of this best-selling book has been thoroughly revised to take into account recent developments in the law in criminal practice and procedure across the region. The only textbook that explores criminal practice and procedure as it relates to the Commonwealth Caribbean, the book clarifies the state law in each of 11 jurisdictions, at the same time making it clear when laws are the same or similar and highlighting where differences among jurisdictions occur.

Commonwealth Caribbean Employment and Labour Law

Natalie Corthésy, Carla-Anne Harris-Roper

Series: Commonwealth Caribbean Law

This new addition to a respected series will provide an up-to-date textbook covering a wide-range of employment and labour law issues affecting the Commonwealth Caribbean. Examining how the law operates within the legal systems of the Caribbean, this book provides a comparative analysis of employment and labour law in Jamaica, Trinidad and Barbados, as well as taking into account the umbilical link to British jurisprudence and the persuasive precedent of other Commonwealth jurisdictions. Commonwealth Caribbean Employment and Labour Law will be essential reading for students enrolled on Employment Law, Discrimination and Dismissal Law courses in the Caribbean.

Commonwealth Caribbean Family Law

husband, wife and cohabitant

Karen Tesheira

Series: Commonwealth Caribbean Law

Family Law of Husband, Wife and Cohabitant in the Commonwealth Caribbean is the product of several years researching the family law of over ten Commonwealth Caribbean jurisdictions. It is the first legal text which covers all the main substantive areas of spousal family law, including marriage, divorce, financial support, property rights, domestic violence for the de jure (marital) spouse in those jurisdictions. While the book is geared to be an indispensable resource tool for the law student, paralegal and family law practitioner in the English-speaking Caribbean, other professionals including sociologists and social workers and even the layman will find the book useful and informative.

Commonwealth Caribbean Sports Law**Jason K. Haynes, J. Tyrone Marcus***Series: Commonwealth Caribbean Law*

Sports Law has quickly developed into an accepted area of academic study and practice in the legal profession globally. In Europe and North America, in particular, Sports Law has been very much a part of the legal landscape for about four decades. This book recognizes the rapid evolution of Sports Law and seeks to embrace its relevance to the region. This book offers guidance, instruction and legal perspectives to students, athletes, those responsible for the administration of sport, the adjudication of sports-related disputes and the representation of athletes in the Caribbean.

How to Solve A Problem

Insights for Critical Thinking, Problem-Solving, and Success in College

**Kelling J. Donald**

This concise and accessible resource offers new college students, especially those in science degree programs, guidance on engaging successfully with the classroom experience and skillfully tackling technical or scientific questions. The author provides insights on identifying, from the outset, individual markers for what success in college will look like for students, how to think about the engagement with professors as a partnership, and how to function effectively in that partnership toward achieving their pre-defined goals or markers of success. It is an ideal companion for science degree prospects and first-generation students seeking insight into the college experience.

Making Your Doctoral Research Project Ambitious

Developing Large-Scale Studies with Real-World Impact

Edited by **Nadia Siddiqui, Stephen Gorard**

This edited collection provides real and outstanding examples of multiple research design methodologies which will allow doctoral researchers to develop a wide set of research skills, leading to the development of a high-quality academic thesis from which peer reviewed research papers and books can emerge. Ideal reading for doctoral students and supervisors, this book is a source of encouragement and motivation for new researchers seeking to challenge general perceptions in the social sciences that PhD or other doctoral research projects must be small-scale rather trivial studies, but can instead produce robust findings that have real-world implications.

The Psychology of Effective Studying

How to Succeed in Your Degree

Paul Penn

This book provides a vital guide for students to key study skills that are instrumental in success at university. It uses a combination of research from cognitive psychology, humour and practical examples to convey where students often go fundamentally wrong in their studying practices and provides clear and concise advice on how they can improve. The book covers time management, academic integrity, writing essays, team work, and other key required skills for academic study. Written in a humorous and irreverent tone, and including illustrations and examples from popular culture, this is the ideal alternative and accessible study skills resource for any student at undergraduate level.

The Student Wellbeing Toolkit

Preparing for Life at College, University and Beyond

Camila Devis-Rozental

Series: *Routledge Study Skills*

The Student Wellbeing Toolkit puts wellbeing at the centre of your journey into university and beyond. By encouraging self-efficacy and a focus on the things you can control, it provides clear guidance to enhance wellbeing and opportunities for self-reflection that help develop self-awareness and prosocial skills for life. Drawing on research evidenced theories around positive psychology, theories of learning, motivation, and self-development, the book explores what, how, and why these areas are key to our wellbeing and the rationale for taking them into account to enable you to flourish and thrive at university.

Demystifying Academic Writing

Genres, Moves, Skills, and Strategies

Zhihui Fang

Accessible and informative, this book is designed to enhance the capacity of graduate and undergraduate students, as well as early career scholars, to write for academic purposes. Fang describes the key genres and types of academic writing, explains common rhetorical moves, offers linguistic strategies and insights to give students the skills they need for effective academic writing across genres and disciplines. Assuming no technical knowledge, this text is ideal for both non-native and native English speakers alike, and for courses in academic writing, composition, and L2 writing instruction.

Writing Essays

A guide for students in English and the humanities

Richard Marggraf Turley

Essays are a major form of assessment in higher education today and this is a fact that causes some writers a great deal of anxiety. Fortunately, essay writing is a skill that can be learned, like any other. Writing Essays demystifies the entire process of essay writing and reveals the tricks of the trade, making your student life easier. You'll learn how to impress tutors by discovering exactly what markers look for when they read your work. Using practical examples selected from real student assignments and tutor feedback, this book covers every aspect of composition, from introductions and conclusions, down to presentation and submission.

5TH EDITION

Using Sources Effectively

Strengthening Your Writing and Avoiding Plagiarism

Robert Harris

Now in its fifth, expanded edition, Using Sources Effectively, Fifth Edition targets the two most prominent problems in current research-paper writing: the increase in unintentional plagiarism and the ineffective use of research source material. Designed as a supplementary textbook for both undergraduate and graduate courses, this book will help every student who uses research in writing. Included in this edition is coverage of research strategies and source selection (Chapter 2), a chapter on quoting sources effectively (Chapter 4), and a chapter on sentence patterns (Chapter 10). APA and MLA citation styles have been updated throughout the text.

Renovating Your Writing

Shaping Ideas and Arguments into Clear, Concise, and Compelling Messages

Richard Kallan

Renovating Your Writing outlines the principles of effective composition by focusing on the essential skill set and mindset every successful writer must possess. Now in its second edition, this novel text provides readers with unique strategies for crafting and revising their writing, whether for school, work, or play. The new edition emphasizes, in particular, the importance of the writer embracing a rhetorical perspective, distinguishing between formal and social media compositional styles, and appreciating the effort needed to produce clear, concise, and compelling messages.

Clarity and Coherence in Academic Writing

Using Language as a Resource

David Nunan, Julie Choi

This book presents a lively, rich, and concise introduction to the key concepts and tools for developing clarity and coherence in academic writing. Well-known authors and linguists David Nunan and Julie Choi provide examples of the linguistic procedures that writers can draw on to enhance clarity and coherence for the reader. This resource makes complex concepts accessible to the emergent writer and illustrates how these concepts can be applied to their own writing. In-text projects and tasks invite you, the reader, to experiment with principles and ideas in developing your identity and voice as a writer.

Guidebook to Academic Writing

Communicating in the Disciplines

Cornelia C. Paraskevas, Deborah F. Rossen-Knill

This innovative guidebook is a concise introduction to discipline-specific academic language. Using authentic texts written by both novice and expert writers and 'translating' current, corpus-based research of academic language into a practical guide, the book gives students the tools to navigate the linguistic features of various disciplines. With exercises and additional online resources, this guidebook provides students with a range of tools they can choose from in order to create effective texts that meet discipline and reader expectations. Accessibly written, it is an essential guide for all students in humanities and sciences writing academic texts in English.

How to Write Qualitative Research

Marcus B. Weaver-Hightower

Qualitative research has exploded in popularity in nearly every discipline from the social sciences to health fields to business. While many qualitative textbooks explain how to conduct an interview or analyze fieldnotes, rarely do they give more than a few scant pages to the skill many find most difficult: writing. That's where *How to Write Qualitative Research* comes in. Using clear prose, helpful examples and lists, it breaks down and explains the most common writing tasks in qualitative research, and each chapter suggests step-by-step how-to approaches writers can use to tackle those tasks.

3RD EDITION

Successful Writing for Qualitative Researchers

Peter Woods, Pat Sikes

The third edition of this text has been brought fully up to date to cover developments in funding and institutional requirements. With new material on the responsibilities of the writer, technological developments, the ability to reach wider audiences and arts-based research, this book is designed to give practical advice to aspiring and established academic writers on mind-sets, strategies, techniques and opportunities. A must-read guide for all those looking to translate their qualitative research into writing.

9TH EDITION

Writing Empirical Research Reports

A Basic Guide for Students of the Social and Behavioral Sciences

Melisa C. Galvan, Fred Pyrczak

Writing Empirical Research Reports: A Basic Guide for Students of the Social and Behavioral Sciences, Ninth Edition, offers clear and practical guidance on how to write research proposals, reports, theses, and dissertations. Accompanied by online resources for students and instructors, this book is ideal for use in research methods courses, thesis/dissertation preparation courses, research seminars where writing a research report is a culminating activity, and any graduate-level seminar in which the instructor covers the vital components necessary to prepare a research manuscript for submission for publication.

Writing for Engineering and Science Students

Staking Your Claim

Gerald Rau

Drawing on his extensive experience of teaching international students, Gerald A. Rau provides a clear "argument structure" for students to follow when undertaking both academic and technical writing. This is the first book to make clear the different structures required for engineering versus scientific articles. Tasks and exercises are provided throughout. Using the research article as a model and covering lab reports, research proposals, dissertations, poster presentations, industry reports, emails and job applications, this book is essential reading for all students of science and engineering who are taking a course in writing, or seeking a resource to aid in their writing assignments.

Mastering Academic Writing in the Sciences

A Step-by-Step Guide

Marialuisa Aliotta

This book provides a comprehensive and coherent step-by-step guide to writing in scientific academic disciplines. It is an invaluable resource for those working on a PhD thesis, research paper, dissertation, or report. Writing these documents can be a long and arduous experience for students and their supervisors, and even for experienced researchers. However, this book can hold the key to success. Mapping the steps involved in the writing process - from acquiring and organizing sources of information, to revising early drafts, to proofreading the final product - it provides clear guidance on what to write and how best to write it.

The Routledge Student Guide to English Usage

A guide to academic writing for students

Stewart Clark, Graham Pointon

The Routledge Student Guide to English Usage is an authoritative A-Z guide to key aspects of English usage. Covering approximately 4000 carefully selected words, the authors focus on groups of confusable words that sound alike, look alike or are frequently mixed up. Examples of good usage are drawn from corpora such as the British National Corpus and the Corpus of Contemporary American English. A substantial reference section is also provided with stylistic guidance on academic writing skills, email standards, punctuation and grammar tips. This is the essential reference text for all students working on improving their academic writing skills.

Written English

A Guide for Electrical and Electronic Students and Engineers

Steve Hart

This book covers all aspects of English grammar relevant to electrical and electronic engineers. It discusses working with numbers and algebra, including correct formatting procedures (both body citations and references). The book addresses vocabulary and stylistic issues, describes the level of writing expected in the field, reveals often-made mistakes, and indicates areas where engineers should focus their efforts. The text also offers unique insight into problems students and academics face on a day-to-day basis when writing in a language that is not their mother tongue.

2ND EDITION

Engineering Writing by Design

Creating Formal Documents of Lasting Value, Second Edition

Edward J. Rothwell, Michael J. Cloud

This book shows how effective writing can be achieved by thinking like an engineer. Based on the authors' combined experience as engineering educators, the book presents a novel approach to technical writing, positioning formal writing tasks as engineering design problems with requirements, constraints, protocols, standards, and customers (readers) to satisfy. Featuring illustrative examples, chapter summaries and exercises, quick-reference tables, and recommendations for further reading, this book is packed with valuable tips and information practicing and aspiring engineers need to become effective writers.

50 Things to Think About When Writing a Thesis

Paving Your Own Path to Submission

Donna Starks, Margaret J. Robertson

This book shows thesis writers how to embrace the individual nature of writing, bringing their own unique identities and skillsets to their thesis. Each idea is presented as one that has multiple solutions depending on who the readers are and what they want to achieve. The book guides the reader on identifying their own ways of working, their own particular strengths, as well as their unique voice and how to use these as tools to navigate the process of writing and surviving the thesis. It also provides practical guidance on elements such as the literature review and methodology, considerations around language and how to deal with life after submission.

How to Structure a Thesis, Report or Paper

A Guide for Students

Robert P. Ormrod

This book provides concise practical guidance for students to help make their student's writing process more structured for their group work or thesis at any level. It therefore shows how to demonstrate meaningfully what they have learned in the relevant course or degree programme in a way that is accessible to the supervisor and the examiner. Suitable for students completing theses at Bachelors and Masters level, as well as other types of report-based work, and for supervisors looking for a clear and practical guide to help students with their writing process. The book will also provide a bridge to writing papers for journals in an academic career.

2ND EDITION

Writing Successful Undergraduate Dissertations in Social Sciences

A Student's Handbook

Francis Jegede, Charlotte Hargreaves, Karen Smith, Philip Hodgson, Malcolm Todd, Julia Waldman

A practical guide for students undertaking their dissertation, this book uses real examples of dissertations across the Social Sciences. Providing an accessible overview of the essential steps in conducting research and writing dissertations, each chapter has clear learning outcomes and research objectives with relevant themes. Using a mixture of useful information, exercises, practical strategies, case study material and further reading, it gives hints and tips on beginning and managing a research project and working with supervisors. Packed with proven practical advice it is a dependable starting point and guide throughout the dissertation journey.

Principles and Concepts of Social Research

A Critical Examination of Methodology, Methods and Analysis for Emerging Researchers

Simon Hayhoe

This text covers the foundations of social science research, outlining the history and core elements of Western social research, along with a variety of topics, ranging from the history of scientific beliefs from Ancient Greece to the contemporary world. This book will be of use to core research units and training programs that universities provide at postgraduate level, at doctoral level and for early career post-doctoral researchers, to develop greater understanding of issues surrounding research. In addition to its theory, the contents of the book will include questions for discussion in seminars and small group work.

A Concise Guide to Writing a Thesis or Dissertation

Educational Research and Beyond

Halyna M. Kornuta, Ron W. Germaine

A Concise Guide to Writing a Thesis or Dissertation provides clear, concise, and intentional practice guidelines about organizing and writing a thesis or dissertation. Part I provides an overview for writing a thesis or dissertation. It describes the big picture of planning and formatting a research study, from identifying a topic through to writing quality. Part II describes the framework and substance of a research study. It models the pattern generally found in a formal, five-chapter research study.

From Student to Scholar

A Guide to Writing Through the Dissertation Stage

Keith Hjortshoj

From Student to Scholar guides graduate students through the "hidden" developmental transition required in writing a dissertation and moving beyond, to become a successful scholar. Identifying common rhetorical challenges across disciplines, author Hjortshoj explains how to accommodate evolving audiences, motivations, standards, writing processes, and timelines. One full chapter is devoted to "writing blocks," and another offers advice to international students who are non-native speakers of English. The text also offers advice for managing relations with advisors and preparing for the diverse careers that PhDs, trained primarily as research specialists, actually enter.

2ND EDITION

Thesis and Dissertation Writing in a Second Language

A Handbook for Students and their Supervisors

Brian Paltridge, Sue Starfield

This fully updated edition is the guide for non-native speakers writing a thesis or dissertation in English. It explicitly unpacks academic writing, using accessible language and practical examples and discusses the issues that are crucial to success. These include: understanding the setting and purpose, understanding writer/reader relationships, issues of writer identity and what examiners really value. Suitable for students from all disciplines writing in a second language this book is equally valuable for supervisors of non-native speakers as it provides tasks that can be used with students to guide them in their writing.

5TH EDITION

Critical Thinking

A Concise Guide

**Tracy Bowell, Robert Cowan, Gary Kemp**

We are frequently confronted with arguments. Critical Thinking equips students with the concepts and techniques used in the analysis and assessment of arguments whatever the context. Through precise and accessible discussion, this book provides the tools to become a successful critical thinker, who can act and believe in accordance with good reasons, and who can articulate and make explicit those reasons. This fifth edition has been revised and updated throughout, including an expanded range of 'complete examples', the introduction of Venn diagrams, and the discussion of fake news and related phenomena arising in the contemporary scene.

Thinking Critically about Research

A Step by Step Approach

**Jane Ogden**

This book is designed to help readers develop a critical understanding of evidence and the ways in which evidence is presented, and to challenge the information they receive in both academic and non-academic sources. The author presents a step by step approach with a focus on knowing methods, culminating in a bespoke 'critical tool kit' which offers a practical checklist designed to be used when carrying out research. There are also learning features including tasks and worked examples, drawing on real research studies. This is an essential resource for students and researchers, and those putting research into practice, who want to have better critical thinking skills.

6TH EDITION

Thought and Knowledge

An Introduction to Critical Thinking

Diane F. Halpern, Dana S. Dunn

Thought and Knowledge applies theory and research from the learning sciences to teach students the critical thinking skills that they need to succeed in today's world. The text is grounded in psychological science and brought to life through humorous and engaging language and numerous practical and real-world examples and anecdotes. Critical thinking skills are presented in every chapter, empowering students to learn more efficiently, research more productively, and present logical, critical, and informed arguments. The skills are reviewed at the end of the chapter, and a complete list of skills with definitions and examples are included in the appendix.

3RD EDITION

Critical Reasoning

A Practical Introduction

Anne Thomson

We all engage in the process of reasoning, but we don't always pay attention to whether we are doing it well. This book offers the opportunity to practise reasoning in a clear-headed and critical way, with the aims of developing an awareness of the importance of reasoning well and of improving the reader's skill in analyzing and evaluating arguments. Anne Thomson has updated and revised the book to include fresh and topical examples, and new chapters on evaluating the credibility of evidence and decision making and dilemmas. By the end of the book students should be able to identify flaws in arguments, analyze the reasoning in newspaper articles, books and speeches, assess the credibility of evidence and authorities and approach any topic with the ability to reason and think critically.

The New Critical Thinking

An Empirically Informed Introduction

Jack Lyons, Barry Ward

This highly innovative text aims to improve real-world critical thinking, incorporating insights from epistemology and philosophy of science to formulate best practices for assessing information sources and circumnavigate our natural intellectual blind spots. The book covers introductory logic in a way that emphasizes practical application, rather than formal completeness. This new edition provides ample resources and exercises for students and instructors alike both in-text and online.

The Need for Critical Thinking and the Scientific Method

Finlay MacRitchie

The book exposes many of the misunderstandings about the scientific method and its application to critical thinking. It argues for a better understanding of the scientific method and for nurturing critical thinking in the community. This knowledge helps the reader to analyze issues more objectively, and warns about the dangers of bias and propaganda. The principles are illustrated by considering several issues that are currently being debated. These include anthropogenic global warming (often loosely referred to as climate change), dangers to preservation of the Great Barrier Reef, and the expansion of the gluten-free food market and genetic engineering.

5TH EDITION

Philosophy of Social Science

Alexander Rosenberg

Philosophy of Social Science provides a tightly argued yet accessible introduction to the philosophical foundations of the human sciences, including economics, anthropology, sociology, political science, psychology, history, and the disciplines emerging at the intersections of these subjects with biology. Philosophy is unavoidable for social scientists because the choices they make in answering questions in their disciplines force them to take sides on philosophical matters. Conversely, the philosophy of social science is equally necessary for philosophers since the social and behavior sciences must inform their understanding of human action, norms, and social institutions.

2ND EDITION

Philosophy of Social Science

A Contemporary Introduction

Mark Risjord

Series: *Routledge Contemporary Introductions to Philosophy*

This accessible text offers a comprehensive overview of debates in the field, with special attention to new research programs. Topics include the relationship of social policy to social science, interpretive research, cognitive and evolutionary explanations, intentional action explanation, rational choice theory, conventions and social norms, joint intentionality, causal inference, and experimentation. The Second Edition provides updates with the most recent literature and adds two new chapters: one on modeling and one on the role of race and gender in the social sciences.

4TH EDITION

Philosophy of Science

A Contemporary Introduction

Alex Rosenberg, Lee McIntyre

Series: Routledge Contemporary Introductions to Philosophy

Any serious student attempting to better understand the nature, methods, and justification of science will value this book. Weaving lucid explanations with clear analyses, the volume is as a much-used, thematically-oriented introduction to the field. The new edition has been thoroughly rewritten based on instructor and student feedback, to improve readability and accessibility, without sacrificing depth. It retains all of the logically structured, extensive coverage of earlier editions, which the journal *Teaching Philosophy* called, "the industry standard" and "essential reading" in a 2010 review.

Philosophy of Science

A Unified Approach

Gerhard Schurz

Philosophy of Science: A Unified Approach combines an elementary introduction to philosophy of science with an integrated survey of all of its important subfields. Focusing on the methodological unity of the sciences, the book provides chapters with introductory sections, followed by complementary, advanced topics. By restricting the teaching materials to the introductory sections, one obtains the basis for a semester-long course. Covering all of the material contained in the book fills a year-long course.

Doing Academic Research

A Practical Guide to Research Methods and Analysis

Ted Gournelos, Joshua R. Hammonds, Maridath A. Wilson

Doing Academic Research is a concise, accessible, and tightly organized overview of the research process in the humanities, social sciences, and business. Rather than a book about research, this is a practical guide to doing research, and guides budding researchers along the process of developing an effective workflow, where to go for help, and how to actually complete the project. It addresses diversity in abilities, interest, discipline, and ways of knowing by focusing not just on the process of conducting any one method in detail, but also the ways in which someone might choose a research method and conduct it successfully.

3RD EDITION

Research Methods

The Basics

Nicholas Walliman

Series: The Basics

Research Methods: The Basics is an accessible, user-friendly introduction to the different aspects of research theory, methods and practice. This third edition provides an expanded and fully updated resource suitable for students and practitioners in a wide range of disciplines including the natural sciences, social sciences and humanities. It is structured in two parts - the first covers the nature of knowledge and the reasons for doing research, the second explains the specific methods used to conduct an effective research project and how to propose, plan, carry out and write up a research project.

2ND EDITION

Research Methods

The Key Concepts

Michael Hammond, Jerry Wellington

Series: Routledge Key Guides

This invaluable resource provides a comprehensive overview of the many methods and methodologies of social research. Each entry provides a critical definition and examines the value and difficulties of a particular method or methodology of concept across different fields of social research. With thematic further reading stretching across the social sciences, this second edition will help readers develop a firm understanding of the rationale and principles behind key research methods, and is a must-have for new researchers at all levels, from undergraduate to postgraduate and beyond.

11TH EDITION

Understanding Research Methods

An Overview of the Essentials

Michelle Newhart, Mildred L. Patten

A perennial bestseller since 1997, this updated eleventh edition of Understanding Research Methods provides a detailed overview of all the important concepts traditionally covered in a research methods class. It covers the principles of both qualitative and quantitative research, and how to interpret statistics without computations, so is suitable for all students regardless of their math background. The book is organized so that each concept is treated independently and can be used in any order without resulting in gaps in knowledge—allowing it to be easily and precisely adapted to any course.

2ND EDITION

The Research Companion

A practical guide for those in the social sciences, health and development

Petra M. Boynton

Books on social and behavioral research too often focus on theory and methods and overlook the practical skills needed to undertake a research project. The Research Companion brings hard-earned lessons from the real world to offer clear and honest advice to all students and practitioners within the social and health sciences. The structure of the book makes it useful for researchers at all levels of experience: the numerous examples and case histories make it ideal for students just beginning their first research project, while the breadth of coverage and wealth of practical tips will also help more experienced researchers.

Are You Making a Meal Out of Research?

A Recipe for Research Success

Steve Reay, Cassie Khoo, Gareth Terry, Guy Collier, Trent Dallas, Valance Smith

Research methods in a comic! This visual guide to common research methods paradigms will get you started on thinking about your research journey - what research is and understanding different types of methods, how you choose them, and how you get started. The book includes several worksheets to start making your own research menu and further reading to learn more. Suitable for upper level undergraduate and first level postgraduate students in the social and behavioural sciences, healthcare, and those interested in indigenous and Māori research methods.

Literature Review and Research Design

A Guide to Effective Research Practice

Dave Harris

Graduate students executing their first independent research project often struggle to use academic literature effectively in the process of designing, developing, executing, and presenting their work. This book gives an overview of how to develop an effective research practice supported by the academic literature. Particularly suitable for those pursuing professional doctorates in subjects such as education and psychology.

4TH EDITION

Principles of Research in Behavioral Science

Fourth Edition

Bernard E. Whitley, Jr., Mary E. Kite

This book provides a comprehensive overview of research methods in the behavioral sciences, focusing primarily on the conceptual issues inherent in conducting research. It covers topics that are often omitted from other texts, including measurement issues, correlational research, qualitative research, and integrative literature reviews. The book also includes discussions of diversity issues as they related to behavioral science research. New to this edition are chapter boxes that focus on applied issues related to each chapter topic. Throughout the book, readable examples and informative tables and figures are provided.

Conducting Contextual Research

How to Find Out About Yourself and Other People

Bernard Guerin, Eden Thain, Kristen Stevens, Adan C. Richards, Guilherme Bergo Leugi

Series: Exploring the Environmental and Social Foundations of Human Behaviour

This innovative book proposes an entirely new approach to social research, presenting practical ways to discover people's life contexts in order to understand why they do what they do, which is essential for any forms of research that need to understand people. Conducting Contextual Research is essential reading for postgraduate students and professionals in the fields of counselling, psychology and social work, and will be useful to anyone conducting research or inquiries to understand human behaviour, including academic researchers, detectives, intelligence operators, social workers, government service researchers, social policy analysts, and biographers.

3RD EDITION

Research Methods and Society

Foundations of Social Inquiry

Linda Eberst Dorsten, Lawrence Hotchkiss

Research Methods and Society, Third Edition is designed to help undergraduate students acquire basic skills in methods of social science research. These skills provide a foundation for understanding research findings in the social sciences and for conducting social research. Just as important, such skills sets and principles can be applied to everyday situations to make sense of endless stream of claims and counterclaims confronted daily in print and electronic forms, including social media.

2ND EDITION

Social Research Methods by Example

Applications in the Modern World

Yasemin Besen-Cassino, Dan Cassino

This book sharpens students' understanding of the research process and the essential methods that researchers use to perform their work on the cutting edge of the social sciences. The new edition features updated examples across the chapters, reflecting new directions within the social sciences and both a diversity of voices and research output in recent years. The authors also expand their chapter overviews in key areas and weave discussion of validity and ethics carefully into the fabric of each chapter's focus. Written not only to introduce students to the basic principles of social science research, this book provides readers with a toolkit to carry out the process on their own.

4TH EDITION

Principles and Methods of Social Research

William D. Crano, Marilynn B. Brewer, Andrew Lac

Through a multi-methodology approach, *Principles and Methods of Social Research*, Fourth Edition covers the latest research techniques and designs and guides readers toward the design and conduct of social research from the ground up. Applauded for its comprehensive coverage, the breadth and depth of content of this new edition is unparalleled. It is intended for graduate or advanced undergraduate courses in research methods in psychology, communication, sociology, education, public health, and marketing, and further appeals to researchers in various fields of social research, such as social psychology and communication.

Research Methods and Design Beyond a Single Discipline

From Principles to Practice

Heting Chu

This book presents and discusses 15 research methods after an overview of each, an illustration of the research process and an examination of related topics. The focus of this book is on data collection techniques and research design. This book is essential for masters and doctoral students, and researchers who wish to learn about research methods and design comprehensively and systematically, as well as instructors delivering research methods courses across the social and behavioral sciences.

Methodological Concepts

A Critical Guide

Martyn Hammersley

Methodological Concepts: A Critical Guide clarifies many key terms and issues in social research methodology. It outlines the conventional meanings of these terms, but also addresses their contentious character. The aim is to offer interpretations of them that provide a coherent conception of the nature of social science.

Dissertation Research Methods

A Step-by-Step Guide to Writing Up Your Research in the Social Sciences

Philip Adu, D. Anthony Miles

Dissertation Research Methods: A Step-by-Step Guide to Writing Up Your Research in the Social Sciences focuses specifically on methodology when planning, writing and submitting your dissertation thesis. Written by two methodology experts in the social sciences, the book provides a step-by-step guide through each stage of the dissertation process. This compact book will be of use to all graduate students and their supervisors in the Social Sciences, Education and Behavioural Sciences, looking for a guide for working with robust and defensible methodological principles in their dissertation research and theses.

Ethnographic Explorations

Surrender and Resistance

Emilie Morwenna Whitaker, Paul Atkinson

In *Ethnographic Explorations: Surrender and Resistance*, Whitaker and Atkinson, two experienced ethnographers, explore the complexities of fieldwork, analysis and writing from new perspectives. It takes the opportunity to reflect on Ethnography not just as a methodological perspective, but at a fundamental level. The book is intended for researchers at postgraduate and postdoctoral levels and at experienced researchers who want to read a different, sometimes challenging, take on ethnographic research and its outcomes.

2ND EDITION

The Researcher's Toolkit

The Complete Guide to Practitioner Research

David Wilkinson, Dennis Dokter

Designed for those undertaking research for the first time, the second edition of *The Researcher's Toolkit* is a practical and accessible guide for all those partaking in small-scale research. Jargon-free and assuming no prior knowledge, it covers the entire research process, from defining a research topic or question through to its completion. This book is a must-read guide for students and budding researchers as well as educators seeking to explain academic research and writing to their pupils. It will benefit anyone looking to complete a research project whether inside academia or beyond.

Qualitative Research

The Essential Guide to Theory and Practice

Maggi Savin-Baden, Claire Major

This book provides beginning researchers with an overview of qualitative research and practical advice and guidance about how to conduct a qualitative study. The book's focus enables researchers to choose the most appropriate methodology by providing them with underpinning theory in a practical way alongside specific examples and proven tips. Beginning by exploring the key differences between qualitative and quantitative research the authors clearly explain the specific features of qualitative research and importantly clarify what qualitative research isn't.

Transformative Moments in Qualitative Research

Method, Theory, and Reflection

Anna Cohen-Miller

This groundbreaking book, eloquently fuses powerful stories of research with methodological insight and theory. Each chapter offers a clear, practical, and engaging exploration of qualitative inquiry, emphasizing the power of research to foster equity, inclusion, and justice-centered practice (e.g., social justice, economic justice, environmental/ecological justice). This book is an invaluable resource for graduate students, practitioners, and researchers to enhance their research and praxis. It will appeal to audiences across disciplinary backgrounds including social sciences, educational sciences, humanities, and STEM and health fields.

2ND EDITION

Thinking with Theory in Qualitative Research

Alecia Y. Jackson, Lisa A. Mazzei

Thinking with Theory in Qualitative Research, Second Edition demonstrates how to enact various philosophical concepts in practices of inquiry, effectively opening up the process of thought in qualitative studies. In the ten years since the first edition was published, Thinking with Theory has become a vanguard text in the field of postfoundational inquiry for its accessible but thorough introductions to philosophically informed inquiry. This book is for experienced and novice researchers, and students in introductory, general, and advanced qualitative inquiry courses, who may also be first-time readers of philosophy.

Visual Methods of Inquiry

Images as Research

Kerry Freedman, Richard Siegesmund

Visual Methods of Inquiry: Images as Research presents qualitative researchers in the social sciences with the benefits, applications, and forms of visual research methods. It includes a wide variety of images to illustrate the many uses of visual methods for social research. Students of social science and the visual arts will find this book useful in expanding and improving their methods of inquiry. Artists and researchers already familiar with visual methods will find that this book clarifies the ways the visual works in various research contexts and provides helpful language to describe and explain those methods.

2ND EDITION

Research Methods for Environmental Studies

A Social Science Approach

Mark Kanazawa

The methodological needs of environmental studies are unique in the breadth of research questions that can be posed, calling for a textbook that covers a broad swath of approaches to conducting research with potentially many different kinds of evidence. Drawing on a variety of extended and updated examples to encourage problem-based learning and fully addressing the challenges associated with interdisciplinary investigation, this book will be an essential resource for students embarking on courses exploring research methods in environmental studies.

Research Methodologies for Business Management

Vanessa Ratten

Most existing research methodologies texts take a more general approach or are edited books of previously published articles or chapters written by different authors. This book, written by a business management scholar, covers the fundamentals of business management research and its methodologies in a seamless, unified manner. It builds upon the knowledge by examining both qualitative and quantitative research methodologies in the context of business management. It will help business management students and junior researchers quickly build an essential base of knowledge and gain a strategic advantage in publishing and reviewing business related research.

Researching and Analysing Business

Research Methods in Practice

Edited by **Pantea Foroudi, Charles Dennis**

Researching and Analysing Business provides an accessible and practical guide to various data collection and data analysis techniques within management. Unique in its practical approach, this book is required and recommended reading for advanced undergraduate and postgraduate students studying research methods.

2ND EDITION

Management Research

Applying the Principles of Business Research Methods

Susan Rose, Nigel Spinks, Ana Isabel Canhoto

Management Research supports new researchers on every step of the research journey, from defining a project to communicating its findings, as well as balancing the technical aspects of research with the management of the project itself. Management Research provides essential reading for undergraduate and postgraduate students undertaking a dissertation, thesis or research project, as well as professionals currently practicing in the field.

2ND EDITION

Design Methods and Practices for Research of Project Management

Edited by **Beverly Pasian, Rodney Turner**

Design Methods and Practices for Research of Project Management is the most comprehensive guide on how to do research of and in project management. This second edition of the authoritative reference book offers a substantial update on the first edition with over 60% new content and so provides both practitioner and student researchers with a fully up-to-date and complete guide to research practice on project management.

3RD EDITION

Planning Research in Hospitality and Tourism

Levent Altinay, Alexandros Paraskevas, Faizan Ali

Planning Research in Hospitality and Tourism, 3rd Edition is an accessible, concise and practical guide to planning, conducting and analysing research in tourism and hospitality. Enriched with insightful case studies throughout, this volume is essential reading for all tourism and hospitality researchers.

Routledge

5TH EDITION

Statistics in Plain English

Timothy C. Urdan

Statistics in Plain English is a straightforward, conversational introduction to statistics that delivers exactly what its title promises. Each chapter begins with a brief overview of a statistic that describes what the statistic does and when to use it, followed by a detailed step-by-step explanation of how the statistic works and exactly what information it provides. Chapters also include an example of the statistic (or statistics) in use in real-world research, "Worked Examples," "Writing It Up" sections that demonstrate how to write about each statistic, "Wrapping Up and Looking Forward" sections, and practice work problems.

2ND EDITION

Introduction to the New Statistics

Estimation, Open Science, and Beyond

Geoff Cumming, Robert Calin-Jageman

This fully revised and updated second edition is an essential introduction to inferential statistics. It is the first introductory statistics text to use an estimation approach with meta-analysis ("the new statistics") from the start and also to explain the new and exciting Open Science practices, which encourage replication and enhance the trustworthiness of research. Designed for introduction to statistics, data analysis or quantitative methods courses in psychology, education and other social and health sciences, researchers interested in understanding Open Science and the new statistics will also appreciate this book.

Interpreting Statistics for Beginners

A Guide for Behavioural and Social Scientists

Vladimir Hedrih, Andjelka Hedrih

Interpreting Statistics for Beginners teaches readers to correctly read and interpret results of basic statistical procedures as they are presented in scientific literature, and to understand what they can and cannot infer from such results. Written in an easy-to-read style and focusing on explaining concepts behind statistical calculations, the book is most helpful for readers with no previous training in statistics, and also those wishing to bridge the conceptual gap between doing the statistical calculations and interpreting the results.

8TH EDITION

Making Sense of Statistics

A Conceptual Overview

Deborah M. Oh, Fred Pyrczak

Making Sense of Statistics, Eighth Edition, is the ideal introduction to the concepts of descriptive and inferential statistics for students undertaking their first research project. It presents each statistical concept in a series of short steps, then uses worked examples and exercises to enable students to apply their own learning. This conceptual book is useful for all study levels, from undergraduate to doctoral level across disciplines. Once students understand and feel comfortable with the statistics presented in this book, they should find it easy to master additional statistical concepts.

2ND EDITION

Statistical Methods

An Introduction to Basic Statistical Concepts and Analysis

Cheryl Ann Willard

Statistical Methods explains core statistical concepts and basic analysis techniques for the beginning undergraduate student in statistics or quantitative research methods. Each chapter covers a core concept before guiding students through a series of exercises designed to apply and demonstrate their knowledge. Expanded coverage of the second edition includes two new chapters on essential topics such as factorial analysis of variance, additional chapter exercises, and a full suite of instructor resources – powerpoint slides, instructor manual and test bank questions.

9TH EDITION

Interpreting Basic Statistics

A Workbook Based on Excerpts from Journal Articles

Zealure C. Holcomb, Keith S. Cox, Zealure C. Holcomb

Interpreting Basic Statistics gives students valuable practice in interpreting statistical reporting as it actually appears in peer-reviewed journals. The questions in each exercise are divided into two parts: (1) Factual Questions and (2) Questions for Discussion. The factual questions require careful reading for details, while the discussion questions show that interpreting statistics is more than a mathematical exercise. Each exercise covers a limited number of topics, making it easy to coordinate the exercises with lectures or a traditional statistics textbook.

4TH EDITION

Statistics Explained

Perry R. Hinton

Statistics Explained is an accessible introduction to statistical concepts and ideas for undergraduate and postgraduate students new to the field. It makes few assumptions about the reader's statistical knowledge, carefully explaining each step of the analysis and the logic behind it. This new edition will include instructions and tips on how to present data and findings from SPSS output files, updated and more extensive case studies, and a section on alternative statistical software like R.

2ND EDITION

Statistics for the Behavioural Sciences

An Introduction to Frequentist and Bayesian Approaches

Riccardo Russo

This accessible textbook is for those without a mathematical background (just some notions of basic algebra are sufficient) and provides a comprehensive introduction to all topics covered in introductory behavioural science statistics courses. This timely and highly readable text will be invaluable to undergraduate students of psychology and research methods courses in related disciplines, as well as anyone with an interest in understanding and applying the basic concepts and inferential techniques associated with statistics in the behavioural sciences.

A Pen and Paper Introduction to Statistics

Antonio Marco

This book proposes to reverse the way statistics is taught, by starting with the introduction of linear models. The reader will have the opportunity to work through the examples and compute sums of squares by just drawing and counting, and finally evaluating whether observed differences are statistically significant by using the tables provided. Intended for students, professional life scientists, and those with little prior knowledge of statistics, this book is for all with simple and clear examples, computations and drawings helping the reader to, not only do, but also to understand statistics.

4TH EDITION

An Introduction to Statistical Concepts

Debbie L. Hahs-Vaughn, Richard Lomax

This comprehensive, flexible text is used in both one- and two-semester courses to review introductory through intermediate statistics. Instructors select the topics that are most appropriate for their course. Its conceptual approach helps students more easily understand the concepts and interpret SPSS and research results. Noted for its crystal clear explanations, key concepts are simply stated and occasionally reintroduced and related to one another for reinforcement. Numerous examples demonstrate their relevance. This edition features even more explanation to increase understanding of the concepts and has annotated script for using R.

4TH EDITION

Social Statistics

Managing Data, Conducting Analyses, Presenting Results

Thomas J. Linneman

Series: *Sociology Re-Wired*

With a clear, engaging writing style and fascinating examples using a variety of real data, this text covers the contemporary statistical techniques that students will encounter in the world of social research. It covers these techniques at an introductory level and carefully guides students through increasingly complex examples without intimidating them. Recurrent examples using four timely topics – health, immigration, income inequality, and everyday harassment – help students understand how the techniques fit together, and how to use the techniques in combination with one another. Author created web resource accompanies the text.

2ND EDITION

Statistics in Engineering

With Examples in MATLAB® and R, Second Edition

Andrew Metcalfe, David Green, Tony Greenfield, Mayhayaudin Mansor, Andrew Smith, Jonathan Tuke

This is a textbook for an undergraduate course in statistics for engineers with a minimal calculus prerequisite. The second edition differs from existing books in three main aspects: it is the only introductory statistics textbook written for engineers that uses R throughout the text, there is an emphasis on statistical methods most relevant to engineers that are illustrated with practical applications, and there is an emphasis on random number generation and simulation, all very useful features in engineering.

2ND EDITION

Statistical Rethinking

A Bayesian Course with Examples in R and STAN

**Richard McElreath***Series: Chapman & Hall/CRC Texts in Statistical Science*

The very popular Statistical Rethinking: A Bayesian Course with Examples in R and Stan, Second Edition builds readers' knowledge of and confidence in statistical modeling. Reflecting the need for even minor programming in today's model-based statistics, the book pushes readers to perform step-by-step calculations that are usually automated. This unique computational approach ensures that readers understand enough of the details to make reasonable choices and interpretations in their own modeling work.

2ND EDITION

Using R for Introductory Statistics**John Verzani***Series: Chapman & Hall/CRC The R Series*

The second edition of a bestselling textbook, Using R for Introductory Statistics guides students through the basics of R, helping them overcome the sometimes steep learning curve. The author does this by breaking the material down into small, task-oriented steps. The second edition maintains the features that made the first edition so popular, while updating data, examples, and changes to R in line with the current version.

2ND EDITION

R Primer**Claus Thorn Ekström***Series: Chapman & Hall/CRC The R Series*

Newcomers to R are often intimidated by the command-line interface, the vast number of functions and packages, or the processes of importing data and performing a simple statistical analysis. The R Primer provides a collection of concise examples and solutions to R problems frequently encountered by new users of this statistical software. This new edition adds coverage of R Studio and reproducible research.

2ND EDITION

Learn R

As a Language

**Pedro J. Aphalo***Series: Chapman & Hall/CRC The R Series*

Learning a computer language like R can be either frustrating, fun, or boring. Having fun requires challenges that wake up the learner's curiosity but also provide an emotional reward on overcoming them. This is the second edition of a book designed so that it includes smaller and bigger challenges, in what I call playgrounds, in the hope that all readers will enjoy their path to R fluency.

2ND EDITION

R Data Analysis without Programming

Explanation and Interpretation

**David W. Gerbing**

The new edition of this innovative book, prepares the readers to quickly analyse data and interpret statistical results using R. Professor Gerbing has developed lessR, which is a ground-breaking method in alleviating the challenges of R programming. The lessR extends R, removing the need for programming. This edition expands upon the first edition's introduction to R through lessR which enables the readers to learn how to organize data for analysis, read the data into R, and generate output without performing numerous functions and programming exercises first.

3RD EDITION

SPSS Explained**Perry R. Hinton, Isabella McMurray, Charlotte Brownlow, Peter C. Terry**

SPSS Explained provides the student with all that they need to undertake statistical analysis using SPSS. It combines a step-by-step approach to each procedure with easy-to-follow screenshots at each stage of the process. The authors have many years of experience in teaching SPSS to students from a wide range of disciplines. Their understanding of SPSS users' concerns, as well as a knowledge of the type of questions students ask, form the foundation of this book.

12TH EDITION

How to Use SPSS®

A Step-By-Step Guide to Analysis and Interpretation

**Brian C. Cronk**

This book is designed with the novice computer user in mind and for people who have no previous experience using SPSS. Each chapter is divided into short sections that describe the statistic being used, important underlying assumptions, and how to interpret the results and express them in a research report. The book begins with the basics, such as starting SPSS, defining variables, and entering and saving data. It covers all major statistical techniques typically taught in beginning statistics classes, such as descriptive statistics, graphing data, prediction and association, parametric inferential statistics, nonparametric inferential statistics and statistics for test construction.

2ND EDITION

Applied Statistics for the Social and Health Sciences**Rachel A. Gordon**

Covering basic univariate and bivariate statistics and regression models for nominal, ordinal, and interval outcomes, this textbook provides graduate students in the social and health sciences with fundamental skills to estimate, interpret, and publish quantitative research using contemporary standards. Reflecting the growing importance of 'Big Data', this thoroughly revised and streamlined new edition, outlines changes in best practice in use of statistics in social and health sciences, draws upon new literatures and empirical examples, and highlights the importance of statistical programming, including coding, reproducibility, transparency, and open science.

Applications in R

**G. David Garson**

This book presents a complete exploration of statistical data analysis in R for a wide variety of social science disciplines and quantitative methods courses. Covering all the bases including multilevel modeling and ANOVA / ANCOVA, the book also goes further by looking at topics such as: neural networks to implement deep learning, thus solving complex problems other algorithms cannot; how to deal with missing values in real world data; and the use of text analytics. R code input and output is included. Suitable for all advanced level undergraduate and postgraduate students learning statistical data analysis.

5TH EDITION

Statistical Power Analysis

A Simple and General Model for Traditional and Modern Hypothesis Tests, Fifth Edition

**Brett Myers, Kevin R. Murphy**

Statistical Power Analysis explains the key concepts in statistical power analysis and illustrates their application in both tests of traditional null hypotheses. It provides readers with the tools to understand and perform power analyses for virtually all the statistical methods used in the social and behavioral sciences. This edition includes new material and new power software. The programs used for power analysis in this book have been re-written in R, a language that is widely used and freely available. Statistical Power Analysis helps readers design studies, diagnose existing studies, and understand why hypothesis tests come out the way they do.

Doing Statistical Analysis

A Student's Guide to Quantitative Research

Christer Thrane

Doing Statistical Analysis looks at three kinds of statistical research questions – descriptive, associational and inferential – and shows students how to conduct statistical analyses and interpret the results. Keeping equations to a minimum, it uses a conversational style and relatable examples such as football, covid-19 and tourism, to aid understanding. Each chapter contains practice exercises, and a section showing students how to reproduce the statistical results in the book using Stata and SPSS. Its accessible approach means this is the ideal textbook for undergraduate students across the social and behavioural sciences needing to build their confidence with statistical analysis.

3RD EDITION

Multilevel and Longitudinal Modeling with IBM SPSS

Ronald H. Heck, Scott L. Thomas, Lynn N. Tabata

Series: Quantitative Methodology Series

This text demonstrates how to use the multilevel- and longitudinal-modeling techniques available in IBM SPSS (Version 26). Adopting a workbook format, the text walks readers through setting up, running, and interpreting a variety of different types of multilevel and longitudinal models using the linear mixed-effects model (MIXED and GENLIMIXED) platforms in SPSS. This text is an essential resource for graduate students taking courses on multilevel, longitudinal, and latent variable modeling, multivariate statistics, or advanced quantitative techniques.

2ND EDITION

Longitudinal Structural Equation Modeling

A Comprehensive Introduction

Jason T. Newsom

Series: Multivariate Applications Series

Longitudinal Structural Equation Modeling, Second Edition provides an in-depth, comprehensive overview of structural equation modeling (SEM) strategies for longitudinal data to help readers see which modeling options are available for which hypotheses. Ideal for graduate courses on longitudinal (data) analysis, advanced SEM, longitudinal SEM, and/or advanced data (quantitative) analysis taught in the behavioral, social, and health sciences, Longitudinal Structural Equation Modeling, Second Edition, also appeals to researchers in these fields, and the first edition has been popular as a standard reference for this type of analysis.

7TH EDITION

Advanced and Multivariate Statistical Methods

Practical Application and Interpretation

Craig A. Mertler, Rachel A. Vannatta, Kristina N. LaVenja

Ideal for non-math majors, Advanced and Multivariate Statistical Methods teaches students to interpret, present, and write up results for each statistical technique without overemphasizing advanced math. This highly applied approach covers the why, what, when and how of advanced and multivariate statistics in a way that is neither too technical nor too mathematical. Students also learn how to compute each technique using SPSS software. New to the seventh edition: Updated to SPSS 26 All screenshots and images in full colour Fully updated ancillaries including how to videos for both statistical techniques and SPSS walkthroughs

5TH EDITION

A Beginner's Guide to Structural Equation Modeling

Tiffany A. Whittaker, Randall E. Schumacker

A Beginner's Guide to Structural Equation Modeling, fifth edition, has been redesigned with consideration of a true beginner in structural equation modeling (SEM) in mind. The book covers introductory through intermediate topics in SEM in more detail than in any previous edition. This book is intended for true beginners in structural equation modeling and is designed for introductory graduate courses in structural equation modeling taught in psychology, education, business, and the social and healthcare sciences. This book also appeals to researchers and faculty in various disciplines. Prerequisites include correlation and regression methods.

2ND EDITION

Regression Analysis

A Practical Introduction

Jeremy Arkes

Regression Analysis covers the concepts needed to design optimal regression models and to properly interpret regressions. It details the most common pitfalls, including three sources of bias not covered in other textbooks. This second edition features a new chapter on integrity and ethics, and has been updated throughout to include more international examples. It is ideal for anyone learning quantitative methods in the social sciences, business, medicine, and data analytics. It will also appeal to researchers and academics looking to better understand regressions.

5TH EDITION

Fundamentals of Probability

Saeed Ghahramani

This one- or two-term calculus-based basic probability text is written for majors in mathematics, physical sciences, engineering, statistics, actuarial science, business and finance, operations research, and computer science. It presents probability in a natural way: through interesting and instructive examples and exercises that motivate the theory, definitions, theorems, and methodology. This book is mathematically rigorous and, at the same time, closely matches the historical development of probability. Whenever appropriate, historical remarks are included, and the 2096 examples and exercises have been designed to arouse curiosity and encourage students to delve into the theory.

Bayes Rules!

An Introduction to Applied Bayesian Modeling

Alicia A. Johnson, Miles Q. Ott, Mine Dogucu

Series: Chapman & Hall/CRC Texts in Statistical Science

An engaging, sophisticated, and fun introduction to the field of Bayesian Statistics, Bayes Rules! An Introduction to Bayesian Modeling with R brings the power of modern Bayesian thinking, modeling, and computing to a broad audience. In particular, it is an ideal resource for advanced undergraduate Statistics students and practitioners with comparable experience. Bayes Rules! empowers readers to weave Bayesian approaches into their everyday practice.

2ND EDITION

Bayesian Statistics for the Social Sciences, Second Edition

David Kaplan

This book equips social science researchers to apply the latest Bayesian methodologies to their data analysis problems. The second edition includes new chapters on model uncertainty, Bayesian variable selection and sparsity, and Bayesian workflow for statistical modeling, and emphasizes use of the RStan software package. Topics include frequentist and epistemic probability, prior distributions, Hamiltonian Monte Carlo, Bayesian linear regression and generalized linear models, model evaluation and comparison, multilevel modeling, missing data, and more. The book includes worked-through examples with annotated RStan code, and features a helpful companion website.

The Effect

An Introduction to Research Design and Causality

Nick Huntington-Klein

The Effect: An Introduction to Research Design and Causality is about research design, specifically concerning research that uses observational data to make a causal inference. It is separated into two halves, each with different approaches to that subject. The first half goes through the concepts of causality, with very little in the way of estimation. It introduces the concept of identification thoroughly and clearly and discusses it as a process of trying to isolate variation that has a causal interpretation. Subjects include heavy emphasis on data-generating processes and causal diagrams.

Causal Inference

What If

Miguel A. Hernan, James M. Robins

The application of causal inference methods is growing exponentially in fields that deal with observational data. Written by pioneers in the field, this practical book presents an authoritative yet accessible overview of the methods and applications of causal inference. With a wide range of detailed, worked examples using real epidemiologic data as well as software for replicating the analyses, the text provides a thorough introduction to the basics of the theory for non-time-varying treatments and the generalization to complex longitudinal data.

A First Course in Causal Inference

Peng Ding

Series: Chapman & Hall/CRC Texts in Statistical Science

This textbook, based on the author's course on causal inference at UC Berkeley taught over the past seven years, only requires basic knowledge of probability theory, statistical inference, and linear and logistic regressions. It assumes minimal knowledge of causal inference, and reviews basic probability and statistics in the appendix. It covers causal inference from a statistical perspective and includes examples and applications from biostatistics and econometrics. This book is suitable for an advanced undergraduate or graduate-level course on causal inference, or postgraduate and PhD-level course in statistics and biostatistics departments.

Statistical Analyses for Criminal Justice and Criminology

A Conceptual Introduction

Michael J. DeValve

This book is a how-to guide for statistical analyses designed for undergraduates and others new to the subject. Written in an easy-going and clear style, the book uses policing data to illustrate concepts and includes a short narrative at the beginning of each chapter to engage readers. Easily identified Main Take-Aways and Key Terms features aid student understanding. Designed to combat the fear of mathematics and statistics often held by students in the social sciences, plain verbiage, multiple examples, and clear demonstrations combine to achieve the actualization and proper contextualized use of univariate and bivariate statistics.

Engineering Data Analysis with MATLAB®

Tanvir Mustafy, Tauhid Rahman, Nafisa Siddiqui

This book provides a concise overview of a variety of techniques for analyzing statistical, scientific, and financial data, using MATLAB® to integrate several approaches to data analysis and statistics. Chapters offer a broad review of computational data analysis, illustrated with many examples and applications. Each chapter combines theoretical concepts with practical MATLAB® applications and includes practice exercises, ensuring a comprehensive understanding of the material. With coverage of both basic and more complex ideas in applied statistics, the book has broad appeal for undergraduate students up to practicing engineers.

Data Science

A First Introduction

Tiffany Timbers, Trevor Campbell, Melissa Lee

Series: Chapman & Hall/CRC Data Science Series

Data Science: A First Introduction focuses on using the R programming language in Jupyter notebooks to perform data manipulation and cleaning, create effective visualizations, and extract insights from data using classification, regression, clustering, and inference. The text emphasizes workflows that are clear, reproducible, and shareable, and includes coverage of the basics of version control. All source code is available online, demonstrating the use of good reproducible project workflows.

A Tour of Data Science

Learn R and Python in Parallel

Nailong Zhang

Series: Chapman & Hall/CRC Data Science Series

This book covers the fundamentals of data science, including programming, statistics, optimization, and machine learning in a single and short book. It does not cover everything, but instead, teaches the key concepts and topics. It also covers two of the most popular programming languages used in Data Science, R and Python, in one source.

Data Science in Practice

Tom Alby

Series: Chapman & Hall/CRC Data Science Series

Data Science in Practice is the ideal introduction to data science. With or without math skills: Here you get the all-round view that you need for your projects. This book describes how to properly question data, to unearth the treasure that data can be. As technology alone is not enough, this book also deals with problems in project implementation, illuminates various fields of application and addresses ethical aspects. Data Science in Practice includes many examples, notes on errors, decision-making aids and other practical tips, and is ideal as a complementary text for university students, or as a useful learning tool for those starting more data-related roles.

Data Science and Analytics with Python

Jesus Rogel-Salazar

Series: Chapman & Hall/CRC Data Mining and Knowledge Discovery Series

The book is designed for practitioners in data science and data analytics in both academic and business environments. The aim is to present the reader with the main concepts used in data analytics using tools developed in Python, such as SciKit Learn, Pandas, Numpy, etc. The use of Python is of particular benefit given its recent popularity in the data science community, and the book can be used by seasoned programmers and newcomers alike.

Advanced Data Science and Analytics with Python

Jesus Rogel-Salazar

Series: Chapman & Hall/CRC Data Mining and Knowledge Discovery Series

The book is intended for practitioners in data science and data analytics in both academic and business environments. It aims to present the reader with concepts in data science and analytics that were deemed to be more advanced or simply out of scope in the author's first book, and are used in data analytics using tools developed in Python such as SciKit Learn, Pandas, Numpy, etc. The use of Python is of particular benefit given its recent popularity in the data science community. The book is therefore a reference to be used by seasoned programmers and newcomers alike and the key benefit is the practical approach presented throughout the book.

Foundations of Data Science with Python

John M. Shea

Series: Chapman & Hall/CRC The Python Series

Foundations of Data Science with Python introduces readers to the fundamentals of data science, including data manipulation and visualization, probability, statistics, and dimensionality reduction. This book is targeted toward engineers and scientists, but it should be readily understandable to anyone who knows basic calculus and the essentials of computer programming. This book can be used as an undergraduate textbook for an Introduction to Data Science course or to provide a more contemporary approach in courses like Engineering Statistics. It is also intended to be accessible to practicing engineers and scientists.

2ND EDITION

Modern Data Science with R

Benjamin S. Baumer, Daniel T. Kaplan, Nicholas J. Horton

Series: Chapman & Hall/CRC Texts in Statistical Science

New data technologies and database systems facilitate scraping data and merging information from different sources and formats and restructuring data into a form suitable for analysis. State-of-the-art workflow and tools foster well-documented and reproducible analysis. Modern statistical methods allow the analyst to fit and assess models as well as to undertake supervised or unsupervised learning to extract information. Contemporary data science requires tight integration of these statistics, computing, data skills, mathematics, and communication. The text is intended for readers with some background in statistics and modest prior experience in scripting and programming.

Exploring Data Science with R and the Tidyverse

A Concise Introduction

Jerry Bonnell, Mitsunori Ogihara

This book introduces the reader to data science using R and the tidyverse. No prerequisite knowledge is needed in college-level programming or mathematics (e.g., calculus or statistics). The book is self-contained so readers can immediately begin building data science workflows without needing to reference extensive amounts of external resources for onboarding. The contents are targeted for undergraduate students but are equally applicable to students at the graduate level and beyond. The book develops concepts using many real-world examples to motivate the reader. An exercise set is made available and designed for compatibility with automated grading tools for instructor use.

Statistical Inference via Data Science: A ModernDive into R and the Tidyverse

Chester Ismay, Albert Y. Kim

Series: Chapman & Hall/CRC The R Series

This is a modern textbook in statistical inference, using the principles of data science through R and the Tidyverse. It assumes minimal background knowledge of the reader: there is no algebra, no calculus, and no prior programming/coding experience. It is designed to be a gentle introduction to the practice of analyzing data and answering questions using data the way data scientists, statisticians, data journalists, and other researchers would. This book is suitable for teaching a first course in statistical inference at undergraduate level.

Telling Stories with Data

With Applications in R

Rohan Alexander

Series: Chapman & Hall/CRC Data Science Series

The book equips students with the end-to-end skills needed to do data science. That means gathering, cleaning, preparing, and sharing data, then using statistical models to analyse data, writing about the results of those models, drawing conclusions from them, and finally, using the cloud to put a model into production, all done in a reproducible way. This book will achieve the goals by working through extensive case studies in terms of gathering and preparing data, and integrating ethics throughout. It is specifically designed around teaching how to write about the data and models, so aspects such as writing are explicitly covered.

Practitioner's Guide to Data Science

Hui Lin, Ming Li

Series: Chapman & Hall/CRC Data Science Series

This book aims to increase the visibility of data science in real-world, which differs from what you learn from a typical textbook. Many aspects of day-to-day data science work are almost absent from conventional statistics, machine learning, and data science curriculum. This book is for readers who want to explore possible career paths and eventually become data scientists. This book comprehensively introduces various data science fields, and programming skills in data science projects. Traditional data-related practitioners such as statisticians, business analysts, and data analysts will find this book helpful in expanding their skills for future data science careers.

2ND EDITION

Big Data and Social Science

Data Science Methods and Tools for Research and Practice

Edited by **Ian Foster, Rayid Ghani, Ron S. Jarmin, Frauke Kreuter, Julia Lane**

Series: *Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences*

This classroom-tested book fills a major gap in graduate- and professional-level data science and social science education. It can be used to train a new generation of social data scientists to tackle real-world problems and improve the skills and competencies of applied social scientists and public policy practitioners. It empowers you to use the massive and rapidly growing amounts of available data to interpret economic and social activities in a scientific and rigorous manner.

Model-Based Machine Learning

John Winn

Machine learning is being applied to a growing variety of problems in a variety of domains. A fundamental challenge when using machine learning is connecting the abstract mathematics of a machine learning technique to real world problems. This book tackles this through model-based machine learning, focusing on understanding the assumptions encoded in a machine learning system and their impact on the behaviour of the system. The key ideas of model-based machine learning are introduced through case studies involving real-world applications. It aims not just to explain machine learning methods, but also how to create, debug, and evolve them to solve a problem.

Applied Machine Learning Using mlr3 in R

Edited by **Bernd Bischl, Raphael Sonabend, Lars Kottthoff, Michel Lang**

mlr3 is an award-winning ecosystem of R packages that have been developed to enable state-of-the-art machine learning capabilities in R. This book gives an overview of flexible and robust machine learning methods, with an emphasis on how to implement them using mlr3 in R. It covers many key topics, including basic machine learning tasks, such as building and evaluating a predictive model; hyperparameter tuning of machine learning approaches to obtain peak performance; building machine learning pipelines that perform complex operations

2ND EDITION

A First Course in Machine Learning

Simon Rogers, Mark Girolami

The new edition of this popular, undergraduate textbook has been revised and updated to reflect current growth areas in Machine Learning. The new edition includes three new chapters with more detailed discussion of Markov Chain Monte Carlo techniques, Classification and Regression with Gaussian Processes, and Dirichlet Process models. Previous chapters have also been updated to reflect new developments in Machine Learning, and correct any previous errors in the text.

2ND EDITION

Introduction to Machine Learning with Applications in Information Security

Mark Stamp

Series: Chapman & Hall/CRC Machine Learning & Pattern Recognition

Introduction to Machine Learning with Applications in Information Security, Second Edition provides a classroom-tested introduction to a wide variety of machine learning and deep learning algorithms and techniques, reinforced via realistic applications. The book is accessible and doesn't prove theorems, or dwell on mathematical theory. The goal is to present topics at an intuitive level, with just enough detail to clarify the underlying concepts. The applications presented serve to demystify the topics by illustrating the use of various learning techniques in straightforward scenarios.

Machine Learning Toolbox for Social Scientists

Applied Predictive Analytics with R

Yigit Aydede

Machine Learning Toolbox for Social Scientists covers predictive methods with complementary statistical "tools" that make it mostly self-contained. The inferential statistics is the traditional framework for most data analytics courses in social science and business fields, especially in Economics and Finance. The new organization that this book offers goes beyond standard machine learning code applications, providing intuitive backgrounds for new predictive methods that social science and business students can follow. The modern statistical methods the book provides allows it to be effectively used in teaching in the social science and business fields.

Data Science and Machine Learning

Mathematical and Statistical Methods

Dirk P. Kroese, Zdravko Botev, Thomas Taimre

Series: Chapman & Hall/CRC Machine Learning & Pattern Recognition

The purpose of this book is to provide an accessible, comprehensive textbook in data science and machine learning. The book will provide a solid basis in linear algebra, optimization, probability, and statistics. The main body will discuss the major topics in machine learning and data science: data manipulation, supervised and unsupervised learning, modelling of data, linear models, regression, classification, principal component analysis, deep learning, high dimensional data, regularization, kernel methods, support vector machines, etc.

Statistical Machine Learning

A Unified Framework

Richard Golden

Series: *Chapman & Hall/CRC Texts in Statistical Science*

For advanced undergraduate students, graduate students, and professional. Presents a wide range of popular, disparate, and diverse machine learning algorithms within a unified theoretical framework, characterized by a collection of carefully chosen theorems from the fields of nonlinear optimization theory and mathematical statistics which respectively characterize both asymptotic behavior and generalization performance. The purpose is to teach students how to confidently apply these theorems in practice. The only required mathematical prerequisites are lower-division linear algebra, lower-division calculus, and an upper-division calculus-based course in probability theory.

A Computational Approach to Statistical Learning

Taylor Arnold, Michael Kane, Bryan W. Lewis

This book synthesizes those techniques from numerical analysis, algorithms, data structures, and optimization theory most commonly employed in statistics and machine learning. We provide concrete applications of these methods by giving complete reference implementations for a large set of the most commonly used statistical estimators. The goal is to provide a self-contained textbook explaining the inner algorithmic workings of statistical estimators.

Statistics and Data Visualisation with Python

Jesus Rogel-Salazar

Series: Chapman & Hall/CRC The Python Series

Statistics and Data Visualisation with Python aims to build statistical knowledge from the ground up by enabling the reader to understand the ideas behind inferential statistics, and begin to formulate hypotheses that form the foundations for the applications and algorithms in statistical analysis, business analytics, machine learning and applied machine learning. This book is intended to serve as a bridge in statistics for graduates and business practitioners interested in using their skills in the area of statistical science, and data science and analytics, acting as a refresher for readers that have taken some courses in statistics, but not necessarily use it in their daily work.

Modern Data Visualization with R

Robert Kabacoff

Series: Chapman & Hall/CRC The R Series

Describes ways that raw and summary data can be turned into visualizations that convey meaningful insights: basic graphs, bar charts, scatter plots, and line charts, and progresses to tree maps, alluvial plots, radar charts, mosaic plots, grouped dot plots, effects plots, multivariate presentations such as corrgrams, biplots, network diagrams.

Data Visualization Made Simple

Insights into Becoming Visual

Kristen Sosulski

Data Visualization Made Simple is a practical guide to the fundamentals, strategies, and real-world cases for data visualization, an essential skill required in today's information-rich world. With foundations rooted in statistics, psychology, and computer science, data visualization offers practitioners in almost every field a coherent way to share findings from original research, big data, learning analytics, and more. Both novices and seasoned designers in education, business, and other areas can use this book's effective, linear process to develop data visualization literacy and promote exploratory, inquiry-based approaches to visualization problems.

Data Visualization

Charts, Maps, and Interactive Graphics

Robert Grant

Series: ASA-CRC Series on Statistical Reasoning in Science and Society

This is the age of data. There are more innovations and more opportunities for interesting work with data than ever before, but there is also an overwhelming amount of quantitative information being published every day. Data visualisation has become big business, because communication is the difference between success and failure, no matter how clever the analysis may have been. The ability to visualize data is now a skill in demand across business, government, NGOs and academia. Data Visualization: Charts, Maps, and Interactive Graphics gives an overview of a wide range of techniques and challenges, while staying accessible to anyone interested in working with and understanding data.

Data Sketches

A journey of imagination, exploration, and beautiful data visualizations

Nadieh Bremer, Shirley Wu

Series: AK Peters Visualization Series

In Data Sketches, Nadieh Bremer and Shirley Wu document the creative and collaborative process behind 24 unique data visualization projects, spanning different topics, technologies, and forms. Features: Technical write-ups with beginner-friendly explanations of core concepts; Practical lessons on data and design challenges; Full-color; Interview with Tamara Munzner; Foreword by Alberto Cairo. This book is perfect for anyone interested or working in data visualization and information design, especially those who want to take their work to the next level and are inspired by unique and compelling data-driven storytelling.

Data Visualization in Excel

A Guide for Beginners, Intermediates, and Wonks

Jonathan Schwabish

Series: AK Peters Visualization Series

Data Visualization in Excel closes the gap between what people think Excel can do and what they can achieve in the tool. Over the past few years, recognition of the importance of effectively visualizing data has led to an explosion data analysis and visualization software tools. But for many people, Microsoft Excel continues to be the workhorse for their data visualization needs, not to mention the only tool that many data workers have access to. This book is the perfect guide for anyone who wants to create better, more effective, and more engaging data visualizations.

Narrative by Numbers

How to Tell Powerful and Purposeful Stories with Data

Sam Knowles

Series: Using Data Better

As jobs in the knowledge economy become increasingly similar, there are two core skills that everyone needs if they are going to thrive and succeed and to make a difference. These are the ability to interrogate and make sense of data, and the ability to use the insights extracted from the data to persuade others to take action. Analytics + storytelling = influence. Humans are hardwired to respond to stories and story structure. There are some simple and effective rules of data-driven storytelling that will help everyone tell more compelling, evidence-based stories, whoever they need to convince to create positive change. Narrative by Numbers shows you how.

Building Science Graphics

An Illustrated Guide to Communicating Science through Diagrams and Visualizations

Jen Christiansen

Series: AK Peters Visualization Series

Building Science Graphics is a practical guide for anyone interested in creating science-centric illustrated explanatory diagrams. Starting with a clear introduction to the concept of information graphics and their role in contemporary science communication, it then outlines a process for creating graphics using evidence-based design strategies. The heart of the book is composed of two step-by-step graphical worksheets, designed to help jump-start any new project.

Essentials of Communication Skill and Skill Enhancement

A Primer for Students and Professionals

John O. Greene

For those who wish to learn or teach the tools of skillful communication, this book provides concrete insight into what makes a person a successful communicator. Predicated on four simple notions—that communication can be done well or poorly, that communication skills matter, that people differ in those skills, and that those skills can be improved—the book helps readers identify and enhance their own communication strengths and address weaknesses, assess the communication skills of others, and coach others to improvement. This book is written for students and professionals in fields such as human resources, sales, training, counseling, customer relations, education, and healthcare.

2ND EDITION

Communication in Organizations

Basic Skills and Conversation Models

Henk T. Van der Molen, Yvonne Gramsbergen-Hoogland

This new edition continues to give clear advice and guidance on communicating in a range of different contexts in the workplace. From handling complaints and breaking bad news to negotiating deals and giving presentations, the book explores the building blocks to effective communication skills, nurturing the leadership qualities required in any organization. Illustrated with concrete examples throughout, the new edition includes a new chapter on career coaching, as well as exercises and ideas for role-play to enable the ideas to come alive. This will be an invaluable book for students of management and business psychology, as well as those taking courses who are already in the workplace.

Creating a Successful Digital Presence

Objectives, Strategies and Tactics

Gordon Fletcher, Noel Adolphus

Increasingly graduates, and anyone entering employment, need an individual digital presence to showcase themselves to secure their first professional role. It takes an employability approach to encourage readers to recognise and deliver an effective digital presence. By using a strategic and systematic process, this book draws together academic thinking with practical outcomes. It is essential reading for advanced undergraduate and postgraduate students studying any discipline related to the digital world, particularly digital marketing and digital business, entrepreneurship and strategy, as well as those taking employability and personal professional development programmes.

Taylor & Francis offers the flexibility you need

Whether you are interested in eBook platform integration to provide course texts, or simply purchasing books for your students, we can help make it happen.

The majority of Taylor & Francis Group content is available as both print and e-books. At Taylor & Francis we work with some of the top eBook platform providers, such as VitalSource, Kortext, BibliU. We offer our e-books as PDF and EPUB.

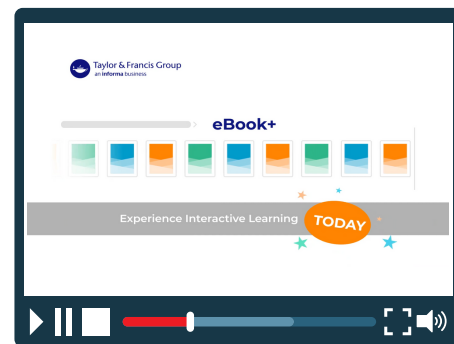

If you would like to learn more about Inclusive Coursebook Provision, please contact the Taylor & Francis sales team to discuss further. Visit our website to find out more:

<https://www.routledge.com/our-customers/instructors/affordability/inclusive-coursebook-provision>

Adding value to the learning experience

What is eBook+?

eBook+ is the enhancement of content in our eBooks with additional interactive features to provide added value and a better user experience. Our eBook+ titles are designed to make reading more engaging, increase comprehension and retention of the material and ultimately lead to greater student success.

Experience interactive learning with us

Key Features Available

Audio

Selected eBook+ contain professionally-recorded audio excerpts, including music and enunciation, to enhance learning according to individual needs.

Video

eBook+ contain video clips to assist students in gaining deeper understanding of the content and amplify the learning experience.

Further Links

Provides external links to help users access additional content for reference and further reading.

Data Visualization

Using visual elements like charts, graphs and maps to provide an accessible way to see and understand trends and data.

Quizzes and Assessments

Uses quizzes and assessments to engage learners and assess the competencies during various learning stages.

Interactive Problems and Solutions

Provide active learning through interactive problem-solving exercises to improve engagement and performance.

Benefits

Digitization

Beyond just digital versions of print materials, taking advantage of digital elements such as multimedia and real-time collaboration can improve engagement, comprehension and retention for users through interactive content

Enhanced Learning Experience

Integration of self-testing and real-world examples into study material on a single platform allows for quick and easy check for mastery of content before progressing, as well as, application of theory in the real world

Accessibility

A device-agnostic design for a seamless experience across many devices and systems; Users can access the material anytime, anywhere
