Personnel Psychology

Alexandra Luong, Justin M. Sprung, Michael J. Zickar

Accessible and engaging, this textbook introduces students to the field of personnel psychology, also known as industrial psychology. Based on their years of teaching in this area, Luong, Sprung, and Zickar survey core topics in the field, including job analysis, recruitment, selection, assessment, and performance evaluation. Written in a clear and engaging style, this book introduces students to the most recent and pertinent scientific research in personnel psychology, and inspires future study in Industrial-Organizational Psychology and related fields.

2ND EDITION

Addictions

Maree Teesson, Wayne Hall, Heather Proudfoot, Louisa Degenhardt

Series: Clinical Psychology: A Modular Course

The addictions field is a fast growing, dynamic area, with major advances over the last 7 years. This second edition incorporates new evidence in the field of addictions to provide an up-to-date, authoritative text for students and professionals. Addictions is written by experts in the field of drug and alcohol research, and takes into account a variety of theories, including neuroscientific, psychological, behavioural, personality and rational choice. It draws on new research from The National Drug and Alcohol Research Centre, Sydney, and on a wide variety of international surveys. Selected Contents: The Nature of Addiction. Who Becomes Addicted? The Health Consequences of Alcohol and Other Drug Use and Dependence. Theories of Addiction: Causes and Maintenance of Addiction. Alcohol. Nicotine. Cannabis. Opioids. Psychostimulants: Cocaine, Amphetamines and Ecstasy. Addiction: Looking Ahead.

Behavioural Addiction in Women

An International Female Perspective on Treatment and Research

Edited by Fulvia Prever, Gretchen Blycker, Laura Brandt

Behavioural Addiction in Women gives insight into ongoing research efforts and clinical developments across the globe, focusing specifically on women with behavioural addictions. The book brings together an international network of clinicians and researchers to offer a unique transcultural female perspective on female-specific aspects of addiction, which is underrepresented in the available literature. The book is an important first step towards building a shared knowledge base on the subject, spanning the importance of female-specific diagnostic criteria to new therapeutic strategies. The book will be of great interest to researchers and clinicians in the field of addiction.

Evaluating the Brain Disease Model of Addiction

Edited by Nick Heather, Matt Field, Antony Moss, Sally Satel

This ground-breaking book advances the fundamental debate about the nature of addiction. As well as presenting the case for seeing addiction as a brain disease, it brings together all the most cogent and penetrating critiques of the brain disease model of addiction (BDMA) and the main grounds for being skeptical of BDMA claims. The result is a landmark volume in the study of addiction which will be essential reading for advanced students and researchers in addiction as well as professionals such as medical practitioners, psychiatrists, psychologists of all varieties, and social workers.

3RD EDITION

Adolescent Coping

Promoting Resilience and Well-Being

Erica Frydenberg

Series: Adolescence and Society

This thoroughly revised edition presents the latest developments in the field of coping. It includes new coverage of positive psychology and updated research in neuroscience, mindfulness and the impact of social media, whilst retaining the focus on resilience and the achievement of happiness. The book includes coping in the family, how culture and context or gender determine how young people cope and decisional, problem solving and social coping. Each chapter is framed with quotes from young people and take-home messages, with implications for practice or applications. It will be of use for students of psychology, social work, mental health and education, and practitioners in these fields.

Adolescent Development

Longitudinal Research into the Self, Personal Relationships and Psychopathology

Wim Meeus

This ground-breaking book overviews the longitudinal study of adolescent development. It offers a comprehensive introduction to theories on adolescent development, and a non-statistical overview of longitudinal models used to study development. Key topics include the development of the self, adolescent identity and personality; parent-adolescent relationships; friendships; and psychosocial problems such as anxiety, depression, delinquency, aggression and substance use. Meeus identifies fundamental patterns of adolescent development to determine why most adolescents develop into mature and organized individuals, whilst a substantial minority show an inability to mature.

2ND EDITION

Adolescent Mental Health

Prevention and Intervention

Terje Ogden, Kristine Amlund Hagen

Series: Adolescence and Society

Adolescent Mental Health is an accessible overview of effective treatment and prevention programs for youths with mental health problems. It addresses some of the most common mental health issues among young people, including externalizing, internalizing and drug use problems.

Bullying in Youth Sports Training

New perspectives and practical strategies

Miguel Nery, Carlos Neto, António Rosado, Peter K. Smith

This book explores how often bullying occurs, how long it lasts, where and when bullying takes place, the coping strategies used by victims, and the roles of bystanders and bullies. It provides new insights into theories of youth sport bullying and highlights the particular characteristics specific to bullying in sport. The book features both theoretical and practical approaches to bullying in youth sport training, providing anti-bullying guidelines based on the results of the research. It is essential reading for scholars and students in child development and sport sciences as well as sports coaches and professionals in mental health, education and social work.

Emotional Development from Infancy to Adolescence

Pathways to Emotional Competence and Emotional Problems

Dale F. Hay

Series: International Texts in Developmental Psychology

This undergraduate textbook offers a broad introductory survey of all aspects of emotional development. Taking a chronological approach, each chapter focuses on a specific emotion and covers the theories and research relating to its development, from infant emotional capabilities to the changes in self-understanding and self-conscious emotions of adolescence. The book includes coverage of differences in temperament, developmental psychopathology, emotion regulation and development of emotional understanding, and highlights the importance of early experiences such as attachment. It is core reading for social and emotional development courses in developmental psychology.

Gen Z

Between Climate Crisis and Coronavirus Pandemic

Klaus Hurrelmann, Erik Albrecht

Gen Z is a vital, thought-provoking portrait of an astonishing generation. Drawing on firsthand interviews and empirical evidence, it offers insight into the boom in political activism amongst those born post-2000, exploring its roots and wide implications for the future of our society. Gen Z is a compelling study of how fighting the climate crisis is only the beginning for these young people. It offers insight for all those interested in the study of adolescence and emerging adulthood, as well as teachers, youth workers, civil society activists, policymakers, politicians and parents who want to understand young people's aspirations for the future.

4TH EDITION

Identity in Adolescence 4e

The Balance between Self and Other

Laura Ferrer-Wreder, Jane Kroger

Series: Adolescence and Society

This 4th edition has been completely revised to address the huge social shifts in the concept of identity over the past decade. The notion of a stable identity is questioned as ideas about the fluidity of sexual, cultural and gender identity are discussed, and coverage of identity crises throughout the lifespan demonstrates how identity development now goes beyond the adolescent period.

Online Peer Engagement in Adolescence

Positive and Negative Aspects of Online Social Interaction

Edited by Nejra Van Zalk, Claire P. Monks

Series: Studies in Adolescent Development

This book provides an in-depth insight into what is currently known and relatively unknown about youths' online-exclusive, offline-exclusive, and conjoint social networks. It delivers state-of-the-art current reviews of the literature in the field, along with implications for future research directions and practical applications. With a focus on what spending time with online-exclusive peers entails, in terms of both potential positive as well as negative consequences for friendship quality, intimacy, and well-being, it offers a more nuanced commentary on youths' online peer engagement. It is important reading for students and researchers in adolescent development and psychology.

Psychosocial Development in Adolescence

Insights from the Dynamic Systems Approach

Edited by E. Saskia Kunnen, Naomi M. P. Ruiter, Bertus F. Jeronimus, Mandy A. E. Gaag

Series: Studies in Adolescent Development

This is the first book of its kind to conceptualise adolescent development using Dynamic Systems Theory (DST). Drawing on multiple variants of DST, international experts illustrate why this approach, which allows for non-linear trends and different trajectories of development, is particularly suitable for examining this period of transition. With a specific focus on applications, each chapter covers key topics in both normative and non-normative development to address the mechanisms that underlie the developmental process of individual adolescents in different domains.

The Psychology of the Teenage Brain

John Coleman

Series: The Psychology of Everything

The Psychology of the Teenage Brain offers all those involved in teenagers' lives insight into what's happening in their brains and how understanding this can improve relationships and communication at this crucial stage. Written for all parents and caregivers, this book will help with the challenges of having a teenager in the home. It also offers crucial understanding for all students and practising professionals in the fields of social work, counselling, health and education working with teenagers.

The Teacher and the Teenage Brain

John Coleman

The Teacher and the Teenage Brain is essential reading for all teachers and students of education. This book offers a fascinating introduction to teenage brain development, and shows how this knowledge has changed the way we understand young people. It provides a critical insight into strategies for improving relationships in the classroom and helping both adults and teenagers cope better with this stage of life. This book represents an important contribution to teacher training and to the enhancement of learning in the classroom.

2ND EDITION

Wired Youth

The Online Social World of Adolescence

Ilan Talmud, Gustavo Mesch

Series: Adolescence and Society

This fully updated new edition offers a research-based analysis of the online social world of adolescence. Combining perspectives from sociology, psychology and education with a focus on social constructionism, technological determinism and social networking, the authors present an empirically anchored review of the field. The book covers topics such as youth sociability, relationship formation, and cyberbullying to examine how young people use the internet to construct or maintain their inter-personal relationships. It is suitable for advanced students of adolescent psychology, youth studies, media studies and the psychology and sociology of interpersonal relationships.

Youth and Internet Pornography

The impact and influence on adolescent development

Richard Behun, Eric W. Owens

Series: Adolescence and Society

This much-needed book provides an in-depth, non-judgemental look at how consumption of Internet pornography and Sexually Explicit Internet Material (SEIM) impacts the social, physical, emotional, and sexual development of adolescents. The book blends theory and application, offering a thorough understanding of the theoretical constructs and research, alongside clinical illustrations and guided practice exercises. It will be essential reading for professionals and policy makers hoping to mitigate outcomes in counselling, youth and social work and education, as well as supplementary reading for courses in human sexuality and development.

Youth Civic and Political Engagement

Martyn Barrett, Dimitra Pachi

Series: Adolescence and Society

Grounded in a detailed review of relevant literature, Barrett and Pachi outline the numerous available definitions of civic and political participation, before evaluating how psychological, social and macropolitical factors might influence the way in which young people choose to engage with their communities. Youth Civic and Political Engagement provides a unique overview of empirical findings drawn from various geographical regions and disciplines, incorporated with the authors' own research.

Youth in Superdiverse Societies

Growing up with globalization, diversity, and acculturation

Edited by Peter F. Titzmann, Philipp Jugert

Series: Studies in Adolescent Development

This important volume brings together a variety of theoretical, methodological and international approaches to the study of multiculturalism and diversity in adolescence. The first part looks how adolescents from both immigrant and non-immigrant populations negotiate diversity and multiculturalism. The second part presents new methods and innovative migration research, and the final part focuses on interventions, highlighting approaches that help in dealing with multicultural societies in classrooms and schools or other settings. It is valuable reading for students studying ethnic identity in psychology sociology, education, anthropology, linguistics and political science.

Mental Health and Relationships from Early Adulthood through Old Age

Paris S. Strom, Robert D. Strom

This unique text encourages young adults to reflect on their prospective longevity for setting goals and making decisions, become aware of the aspirations and concerns of other generations, and consider personal direction in relation to peer group norms. The sources for learning about mental health and relationships include a blend of academic research, insights from literature, student interviews with older and younger relatives, and personal observations.

Adulthood

An Introduction

Rita M. Curl-Langager

Adulthood: An Introduction offers a thorough foundation to learn, consolidate, and apply developmental concepts and current knowledge to the psychology of adult development. It illustrates major ideas with carefully selected research that is widely referenced and topically pertinent to development in early, middle, and late adulthood. Designed to encourage students to think critically about topics of adulthood in both academic and applied settings, Adulthood is appropriate for undergraduate students in psychology and related disciplines such as addiction studies, speech pathology, criminal justice, nursing, and business.

Advanced Multitrait-Multimethod Analyses for the Behavioral and Social Sciences

Edited by **Jonathan Lee Helm**

Series: *European Association of Methodology Series*

This book summarizes a range of new analytic tools for multitrait-multimethod (MTMM) data. Providing an expository yet accessible approach to cutting-edge developments for MTMM analysis, a selection of quantitative researchers reveal their recent contributions to the field including non-technical summaries and empirical examples. This book will serve as a stepping stone for applied researchers seeking to adopt MTMM analysis into their program of research, and will be relevant to researchers, both within a professional and academic context, across the social and behavioral sciences.

4TH EDITION

An Introduction to Multilevel Modeling Techniques

MLM and SEM Approaches

Ronald Heck, Scott L. Thomas

Series: *Quantitative Methodology Series*

This text offers a comprehensive treatment of multilevel models for univariate and multivariate outcomes. It explores their similarities and differences and demonstrates why one model may be more appropriate than another, given the research objectives. New to this edition is an expanded focus on the nature of different types of multilevel data structures, varied modelling methods for examining longitudinal data, expanded coverage illustrating different model-building sequences, an expanded set of applied examples; and use of Mplus, R, SPSS, Stata with selected examples of model-building input files included in the chapter appendices and a more complete set of files available online

Applied Multivariate Statistical Concepts

Debbie L. Hahs-Vaughn

This new book covers the classic and cutting edge multivariate techniques used in today's research. Through clear writing and engaging pedagogy and examples using real data, Hahs-Vaughn walks readers through the most used methods to learn why and how to apply each technique so they can implement and interpret results. Screenshots from SPSS and other packages are integrated throughout. Designed for utmost flexibility, readers can review chapters in any sequence after the first four. Outlines, key concepts, and vignettes related to key concepts preview what's to come in each chapter and problems encourage critical thinking. Only crucial equations are included.

2ND EDITION

Applied Power Analysis for the Behavioral Sciences

2nd Edition

Christopher L. Abersson

Applied Power Analysis for the Behavioral Sciences is a practical guide to statistical power analyses for psychology and related fields. The book provides a guide to conducting analyses that is appropriate for researchers and students, including those with limited quantitative backgrounds. It covers in detail practical topics such as how to estimate expected effect sizes and power analyses for complex designs. The topical coverage of the text, an applied approach, in-depth coverage of popular statistical procedures, and a focus on conducting analyses using R make the text a unique contribution to the power literature. An accompanying R package called `pwr2ppl` (av

Applied Structural Equation Modeling using AMOS

Basic to Advanced Techniques

Joel Collier

An integral guide for postgraduates and researchers on how to forge a strong methodology while studying their respective phenomenon of interest. Cutting out any abstract definitions and highlighting current best practices heavily prevalent in psychology literature, Collier tackles advanced topics in an accessible and engaging manner. He provides step-by-step instructions on how to run analyses, highlights where the important results are in the output, and shows how to clearly present final results.

4TH EDITION

Applying the Rasch Model

Fundamental Measurement in the Human Sciences

Trevor Bond, Zi Yan, Moritz Heene

Recognised as the most influential publication in the field, ARM facilitates deep understanding of the Rasch model and its practical applications. The authors review the crucial properties of the model and demonstrate its use with examples across the human sciences. Readers will be able to understand and critically evaluate Rasch measurement research, perform their own Rasch analyses and interpret their results. Intended as a text for graduate courses in measurement, item response theory, (advanced) research methods or quantitative analysis in social sciences. Professionals in these areas will also appreciate the book's accessible introduction.

Applying the Rasch Model in Social Sciences Using R

Iasonas Lamprianou

Series: Quantitative Methodology Series

This book provides a step-by-step beginner's guide to using the Rasch Model in R, with each chapter devoted to one popular Rasch Model and ranging from least to most complex. It presents the range of options for presenting results, critically examines to strengths and weaknesses of using the Rasch Model in each instance, and suggests more effective methodology where applicable. Free from heavy mathematics, its focus is on clarity, simple software code and broad application across the full range of Social Sciences.

2ND EDITION

Categorical Data Analysis for the Behavioral and Social Sciences

Razia Azen, Cindy M. Walker

Featuring a practical approach with numerous examples, the second edition focuses on helping the reader develop a conceptual understanding of categorical methods, making it a much more accessible text than others on the market. The authors cover common categorical analysis methods and emphasize specific research questions that can be addressed by each analytic procedure, including how to obtain results using SPSS, SAS, and R, so that readers are able to address the research questions they wish to answer. This book is ideal for graduate students of psychology, educational psychology, human development and family studies, sociology, public health, and business.

Contemporary Issues in Exploratory Data Mining in the Behavioral Sciences

Edited by John J. McArdle, Gilbert Ritschard

Series: Quantitative Methodology Series

This book reviews the latest techniques and the most popular software programs in exploratory data mining (EDM) for the analysis of data in the social and behavioral sciences to help readers assess the predictive value of combinations of variables in large data sets. Reliable EDM techniques for predicting various risk mechanisms are integrated throughout. Examples and insights from the contributors illustrate the use of the techniques in practice. Reviewing methodology and applications, the techniques covered include decision, regression, and SEM tree models, growth mixture modeling, and time based categorical sequential analysis. The book is intended for researchers and advanced students.

3RD EDITION

Detection Theory

A User's Guide

Michael J. Hautus, Neil A. Macmillan, C. Douglas Creelman

Detection Theory: A User's Guide is an introduction to one of the most important tools for the analysis of data where choices must be made, and performance is not perfect. In these cases, detection theory can transform judgments about subjective experiences, such as perceptions and memories, into quantitative data ready for analysis and modeling. This modern summary of signal detection theory is both a self-contained reference work for users and a readable text for graduate students and researchers learning the material either in courses or on their own.

2ND EDITION

Event History Analysis With Stata

2nd Edition

Hans-Peter Blossfeld, Gotz Rohwer, Thorsten Schneider

This volume provides an introduction to event history models using Stata, a widely used and powerful statistical program that provides tools for data analysis. It guides students and researchers from recording event-oriented data, to data organization to application using the software to the interpretation of results. Throughout, statistical theory is explained, and the strengths and limitations of each model are described in detail. Thoroughly updated for use with Stata v.14, the volume is an invaluable resource for students and researchers in psychology, economics, sociology and political science.

Handbook of Advanced Multilevel Analysis

Edited by Joop Hox, J. Kyle Roberts

Series: European Association of Methodology Series

Considered the definitive resource on advanced multilevel analysis, this new handbook features contributions from the leaders in the field. The authors address the latest applications and the difficulties that result as more complicated models are developed. Each chapter features examples that use actual datasets. These datasets, and the code to run the models, are available on the book's website. Divided into five sections, the first provides an introduction, Part 2 focuses on multilevel latent variable modeling, Section 3 addresses longitudinal models, and estimation problems are examined in section 4. The book concludes with statistical design issues. Intended for researchers in psychology, education, and the social and health sciences, as well as a text for graduate level courses. A basic knowledge of multilevel modeling is assumed.

Handbook of Computational Social Science, Volume 1

Theory, Case Studies and Ethics

Edited by **Uwe Engel, Anabel Quan-Haase, Sunny Liu, Lars E Lyberg**

Series: *European Association of Methodology Series*

This handbook is a comprehensive reference source for scholars across multiple disciplines. It outlines key debates in the field, showcasing novel statistical modeling and machine learning methods, and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches. With its broad coverage of perspectives (theoretical, methodological, computational), international scope, and interdisciplinary approach, this important resource is integral reading for advanced undergraduates, postgraduates and researchers engaging with computational methods across the social sciences, as well as those within the scientific and engineering sectors.

Handbook of Item Response Theory Modeling

Applications to Typical Performance Assessment

Edited by **Steven P. Reise, Dennis A. Revicki**

Series: *Multivariate Applications Series*

This handbook reviews classic and emerging IRT methods & applications that are revolutionizing psychological measurement, particularly for health outcome assessments used to demonstrate treatment effectiveness. Conceptual & statistical issues confronting researchers in psychology, education, & medicine are addressed including multidimensional & explanatory models. There are examples using real data, some from NIH-PROMIS. The book reviews the most significant IRT models & the obstacles that arise in their application. Chapters review the literature & describe related research methods, apply the material, and suggest future directions.

Higher-Order Growth Curves and Mixture Modeling with Mplus

A Practical Guide

Kandauda Wickrama, Tae Kyoung Lee, Catherine Walker O'Neal, Frederick Lorenz

Series: *Multivariate Applications Series*

This practical introduction to second-order and growth mixture models using Mplus introduces simple and complex techniques through incremental steps. This text is ideal for use in graduate courses or workshops on advanced structural equation, multilevel, longitudinal or latent variable modeling, latent growth curve and mixture modeling, factor analysis, multivariate statistics, or advanced quantitative techniques (methods) across the social and behavioral sciences.

5TH EDITION

IBM SPSS for Intermediate Statistics

Use and Interpretation, Fifth Edition

Nancy L. Leech, Karen C. Barrett, George A. Morgan

This book reviews how to choose the statistic based on the design, interpret output, and write about the results to help readers analyze data using SPSS 22. Readers learn to: assess data reliability; determine whether data meet the assumptions of statistical tests; and calculate and interpret effect sizes and power. Basic statistics is reviewed along with chapters on MLM, MANOVA, and factor analysis. The key SPSS windows needed to perform the analyses are provided along with annotated output, interpretation questions, and problems for review. Data sets, SPSS syntax, and instructors' materials are on the web. This text is ideal for students and researchers in a variety of disciplines.

Introduction to Item Response Theory Models and Applications

James Carlson

Series: *Multivariate Applications Series*

This is a highly accessible, comprehensive introduction to item response theory (IRT) models and their use in various aspects of assessment/testing. The book employs a mixture of graphics and simulated data sets to ease the reader into the material and covers the basics required to obtain a solid grounding in IRT. This book is an essential text for instructors and higher level undergraduate and postgraduate students of statistics, psychometrics, and measurement theory across the behavioral and social sciences, as well as testing professionals.

Introductory Statistics

A Conceptual Approach Using R

William B. Ware, John M. Ferron, Barbara M. Miller

This comprehensive text is aimed at undergraduate and graduate level statistics courses in education, psychology, and other social sciences. A conceptual approach, built around common issues and problems rather than statistical techniques, allows students to understand the conceptual nature of statistical procedures and to focus on cases and examples of analysis. This is one of the first statistics texts in the social sciences using R as the principal statistical package.

Longitudinal Analysis

Modeling Within-Person Fluctuation and Change

Lesla Hoffman

Series: Multivariate Applications Series

This class-tested introduction emphasizes the relatedness of the models that builds a strong foundation of the basics to better prepare readers for the more advanced models to come. Organized by research design, the text emphasizes modeling decisions unique to longitudinal or repeated measures data. Examples with sample results sections emphasize the steps involved in reporting the model specification and the decision-making and interpretation processes. The website features the book's data sets, syntax and sample output for various programs, and exercises. Ideal for advanced students and researchers in the behavioral and social sciences, prerequisites include familiarity with GLM and SEM.

Longitudinal Multivariate Psychology

Edited by Emilio Ferrer, Steven M. Boker, Kevin J. Grimm

Series: Multivariate Applications Series

This volume presents a collection of chapters focused on the study of multivariate change. As people develop and change, multivariate measurement of that change and analysis of those measures can illuminate the regularities in the trajectories of individual development, as well as time dependent changes in population averages. As longitudinal data have recently become much more prevalent in psychology and the social sciences, models of change have become increasingly important. This collection focuses on methodological, statistical, and modeling aspects of multivariate change and applications of longitudinal models to the study of psychological processes.

3RD EDITION

Multilevel Analysis

Techniques and Applications, Third Edition

Joop Hox, Mirjam Moerbeek, Rens van de Schoot

Series: Quantitative Methodology Series

Applauded for its clarity, this accessible text helps readers apply multilevel techniques to their research. Hox introduces a general framework on multilevel modeling which covers both observed and latent variables in the same model. Basic models and examples are discussed in non-technical terms with an emphasis on understanding the methodological and statistical issues involved in using these models. The estimation and interpretation of multilevel models is demonstrated using realistic examples from various disciplines including psychology, education, public health, and sociology.

Multilevel and Longitudinal Modeling with IBM SPSS

Ronald H. Heck, Scott L. Thomas, Lynn Tabata

Series: Quantitative Methodology Series

This text demonstrates how to use the multilevel- and longitudinal-modeling techniques available in IBM SPSS (Version 26). Adopting a workbook format, the text walks readers through setting up, running, and interpreting a variety of different types of multilevel and longitudinal models using the linear mixed-effects model (MIXED and GENLINMIXED) platforms in SPSS. This text is an essential resource for graduate students taking courses on multilevel, longitudinal, and latent variable modeling, multivariate statistics, or advanced quantitative techniques.

3RD EDITION

Multiple Regression and Beyond

An Introduction to Multiple Regression and Structural Equation Modeling

Timothy Z. Keith

Multiple Regression and Beyond offers a conceptually oriented introduction to multiple regression (MR) analysis and structural equation modeling (SEM), along with analyses that flow naturally from those methods. By focusing on the concepts and purposes of MR and related methods, rather than the derivation and calculation of formulae, this book introduces material to students more clearly, and in a less threatening way. In addition to illuminating content necessary for coursework, the accessibility of this approach means students are more likely to be able to conduct research using MR or SEM--and more likely to use the methods wisely.

3RD EDITION

Structural Equation Modeling With AMOS

Basic Concepts, Applications, and Programming, Third Edition

**Barbara M. Byrne***Series: Multivariate Applications Series*

This bestselling text provides a practical guide to structural equation modeling (SEM) using Amos Version 23. The text is ideal for those with little to no exposure to either SEM or Amos. Each chapter walks readers through the steps involved (specification, estimation, evaluation, and post hoc modification) in testing a variety of SEM models. Accompanying each application is: an explanation of the issues addressed; Amos input and output with interpretations; use of the Amos toolbar icons and pull-down menus; and data upon which the model application was based. The new edition features all new screen shots featuring Amos Version 23. All application data files are available on the web.

Using R for Item Response Theory Model Applications**Insu Paek, Ki Cole**

This book introduces basic concepts of IRT and detailed information on how to use R IRT programs for IRT applications. It focuses on the widely used IRT applications using R, with detailed guidance with which readers can follow and conduct IRT applications. Datasets are provided on the supplementary website so that readers can follow along with the provided code and understanding the output. It covers both unidimensional and multidimensional IRT modeling. It is intended for beginners of IRT, graduate students, applied researchers, and those who want to learn and use R IRT programs, in education, psychology and other related disciplines.

An Interdisciplinary Approach to Aging, Biohacking and Technology

Hacking Your Age

Edited by **L.F. Carver**

An Interdisciplinary Approach to Aging, Biohacking and Technology focuses on a broad range of issues that covers everything from the most basic ways technology and biohacking influence people's everyday lives to concerns about equity, globalization, and how we humans produce, consume, and are consumed by our technologies. Critically examining the journey of ageing and exploring techniques such as biohacking, this book is for students studying ageing and technology, including courses such as psychology, sociology, philosophy, cultural studies, health studies and gerontology. It will also be of interest to scholars curious about an interdisciplinary approach to age and technology.

Development of Adult Thinking

Interdisciplinary Perspectives on Cognitive Development and Adult Learning

Edited by **Eeva K. Kallio**

Development of Thinking in Adulthood is a timely synthesis and evaluation of the current knowledge and emerging issues relating to adult cognitive development and learning. Focusing on psychological and educational cutting-edge research as well as giving an overview of the key theorists such as Piaget and Kohlberg, the authors offer a holistic view on the development of adult thinking, representing perspectives from developmental, personality and social psychology, as well as education, comparative religion, and philosophy. It will suit students and researchers in developmental psychology and related courses as well as adult educators and teachers working in adult education.

Getting Old

A Positive and Practical Approach

Rowan Bayne, Carol Parkes

Essential advice and practical suggestions for all readers interested in or worried about ageing. With a focus on a positive view of ageing, it discusses the main physical and mental aspects of getting old, as well as the social and psychological aspects such as choosing where to live and becoming more oneself. Topics covered include: Mobility; diet and digestion; sleep; memory problems and dementia; healthcare; relationships and loneliness; deciding where to live; and the end of life. Getting Old offers valuable guidance for all those and their relatives going through this life stage, as well as health, social care and counselling students and professionals.

Handbook of Gerontology Research Methods

Understanding successful aging

Edited by **Leigh Riby**

Series: *Research Methods in Developmental Psychology: A Handbook Series*

The Handbook of Gerontology Research Methods is a primer that provides an overview of key areas of interest, as well as an understanding of the most important research challenges and issues in this growing field. Written by a collection of international scholars, the book addresses both typical and atypical aging, highlighting hot topics such as dementia, exercise, nutrition, stress, diabetes, Parkinson's and Alzheimer's disease. Each chapter concludes with a series of practical tips on how to undertake successful research in this area. It is essential reading for students and researchers interested in the psychology of aging, and in related fields such as health psychology and social care.

Intergenerational Contact Zones

Place-based Strategies for Promoting Social Inclusion and Belonging

Edited by **Matthew Kaplan, Leng Leng Thang, Mariano Sánchez, Jaco Hoffman**

This is the first book to explore the foundations and applications of intergenerational contact zones (ICZs) from an international perspective. The book is filled with poignant examples of how ICZs breathe new life into communities and social practices. It focuses on practical descriptions and developments around ICZ to nurture practitioners' and researchers' capacity to translate and infuse the notion of ICZ into their work. Containing over 25 short chapters that showcase a wide range of possibilities with ICZs, this book is a how-to tool kit to help various professionals and user groups as they begin to consider ways to develop and nurture engaging intergenerational spaces.

International Handbook of Positive Aging

Edited by **Rachael E. Docking, Jennifer Stock**

Our increasingly aging population will have a considerable impact on society and policy development is required. This book focuses on positive aging, based on research conducted by the new Centre for Positive Ageing within the University of Greenwich in collaboration with NHS partners, service users, and international research leaders in the field of aging. Sections include the body over the life course (focusing on patient empowerment), well-being and care delivery. It will be essential for those working in developmental psychology, clinical psychology, mental health, health sciences, medicine, neuropsychological rehabilitation, sociology, anthropology, social policy and social work.

Research Design in Aging and Social Gerontology

Quantitative, Qualitative, and Mixed Methods

Joyce Weil

Series: Textbooks in Aging

This text provides a review of methodological approaches and data-collection methods commonly used with older adults in real-life settings. It addresses the role of normative age-related sensory, cognitive, and functional changes, as well as the influence of generational cohort upon each design. It discusses the role of older adults as true co-researchers; issues uniquely related to studies of persons residing in community-based, assisted, skilled, and memory-care settings; and ethical concerns related to cognitive status changes. The text concludes with guidelines for improving existing data collection methods and selecting the best fitting methodologies for use in planning research.

Women and Retirement

Challenges of a New Life Stage

Susan Moore, Doreen Rosenthal

This is the first book of its kind to examine women's retirement within a lifespan perspective. Based on the authors' extensive research study with 1000 retired Australian women, the book presents models of various retirement trajectories and compares women's experiences with the more widely researched retirement experiences of men. Problems that women face in managing this life stage in fulfilling ways while juggling family, financial, friendship, ageing and health issues are examined, and guidelines for successful retirement are offered. It is invaluable for courses on aging and health within psychology, women's studies and sociology, and of use to health and social care professionals.

2ND EDITION

An Introduction to Psychometrics and Psychological Assessment

Using, Interpreting and Developing Tests

**Colin Cooper**

The successor to Cooper's prize-winning book shows how psychological questionnaires and tests can be chosen, administered, scored, interpreted and developed. An evaluative guide to choosing, using, interpreting and developing tests, it provides readers a thorough grasp of the principles (and limitations) of testing, together with the necessary methodological detail. The book is written for students studying psychological assessment or psychometrics, and for researchers and practitioners who use questionnaires to measure personality, cognitive abilities, educational attainment, or mood.

2ND EDITION

The Science of Learning

Joseph J. Pear

This text comprehensively and systematically covers the large body of knowledge and powerful methodologies and applications that have developed in the science of learning since the late 19th Century. It starts with the most fundamental principles and progresses toward greater complexity. The connections with biology and evolutionary science are referenced throughout, and there is coverage of both humans and animals in their natural settings. It may be used as a primary text in courses on learning, behavior analysis and conditioning, and is a resource for professional and trainee behavior analysts and those in biology, education, and clinical psychology.

4TH EDITION

Anxiety

**S Rachman, Stanley J. Rachman***Series: Clinical Psychology: A Modular Course*

This new edition of *Anxiety*, part of the popular *Clinical Psychology: A Modular Course Series*, details the growth of positive psychology, with its emphasis on learned optimism and resilience, is influencing clinical psychology and psychological therapy, and explains the new concept of prospection, a key element in positive psychology based on the human ability to imagine thoughts and images about the future. The recent infusion of positivity into theorising about anxiety, has introduced a welcome balance into our understanding of this phenomenon.

Advanced Research Methods for Applied Psychology

Design, Analysis and Reporting

Edited by **Paula Brough**

This is the first comprehensive guide to the range of research methods available to applied psychologists. Ideally suited to students and researchers alike, and covering both quantitative and qualitative techniques, the book takes readers on a journey from research design to final reporting. With coverage of sampling and ethical issues, and chapters on everything from experimental and quasi-experimental designs to longitudinal data collection and focus groups, the book provides a concise overview not only of the options available for applied research, but also of how to make sense of the data produced.

6TH EDITION

Applied Multivariate Statistics for the Social Sciences

Analyses with SAS and IBM's SPSS, Sixth Edition

Keenan A. Pituch, James P. Stevens

Noted for its breadth and depth of coverage of multivariate statistics and its emphasis on power, this classic text focuses on a conceptual understanding of the material rather than on proving results. Numerous examples, along with use of SAS and SPSS, indicate what the numbers mean and how to interpret the results.

3RD EDITION

Research Methods in Applied Settings

An Integrated Approach to Design and Analysis, Third Edition

Jeffrey A. Gliner, George A. Morgan, Nancy Leech

This crystal clear, applied text teaches readers how to plan, conduct, and write a research project and select and interpret data through its integrated approach to research methods. Although not a statistics book, readers learn to master which technique to use when and how to analyze results, making them better consumers of research. Organized around the steps of conducting a research project, independent sections and chapters can be read in any order for utmost learning flexibility. A consistent framework increases comprehension. Numerous examples, diagrams, tables, key terms, summaries, applied problems and questions, and suggested readings further promote understanding.

Teaching Statistics and Quantitative Methods in the 21st Century

Edited by **Joseph Lee Rodgers**

Series: *Multivariate Applications Series*

This volume has two principal aims. Firstly, it provides innovative, practical and clear guidance for students who are training to teach statistics and quantitative methods to undergraduates or who are already teaching and want to improve their knowledge and skills. Secondly, it inspires students and instructors to think critically about their teaching of statistics and quantitative methods, and to be more aware of, and receptive to, the developments in their field and to be willing to incorporate these developments into their teaching. It will appeal to instructors and graduate students in all behavioral and social science disciplines that require the teaching of statistics.

Transforming Professional Practice in Education

Psychology, Dialogue, and the Practice of Becoming Human

Simon Gibbs, David Leat, Wilma Barrow

Focusing on teaching and learning in educational institutions, this text explores the value of enhancing dialogue to improve both professional relationships and practices. It focuses on the belief that education should be about being and becoming human, and that humans are relational beings who develop and flourish within reciprocal relationships. This book is important reading for clinical, educational and other applied psychologists. It is also of value to those within educational institutions, such as SENDCos and those responsible for the safety of children and young people.

6TH EDITION

Community Psychology

John Moritsugu, Elizabeth Vera, Frank Y Wong, Karen Duffy

Community Psychology, 6th Edition offers an easy-to-navigate, clearly organized and comprehensive overview of the field, with theoretical roots that carry over to practical applications. Presenting the concepts of community psychology and social change, these concepts are then applied to various systems addressing the human condition: mental health, medical, public health, school, legal, industrial/organizational. It will appeal to advanced undergraduates as well as graduates taking courses on community psychology, social psychology, and clinical psychology, and related fields.

Human Rights Education for Psychologists

Edited by Polli Hagenaars, Marlena Plavšić, Nora Sveaass, Ulrich Wagner, Tony Wainwright

This book is designed to raise awareness of human rights implications in psychology, and provide knowledge and tools enabling psychologists to put a human rights perspective into practice. Including hands-on recommendations, case studies, and discussion points, the book identifies how psychologists can ensure they are practicing in a responsible way, as well as contributing to wider society with a clear knowledge of human rights issues in relation to culture, gender, organisations, and more. This is essential reading for professional psychologists as part of continuing professional development and those in training and taking psychology courses.

2ND EDITION

Psychology and Behavioral Economics

Applications for Public Policy

Edited by Kai Ruggeri

This book offers an expert introduction to how psychology can be applied to a range of public policy areas. It examines the impact of psychological research for public policy making in economic, financial and consumer sectors, in education, healthcare and at workplace, for energy and the environment, and in communications. This is the perfect textbook for students of psychology, economics, public health, education, and organizational sciences, as well as public policy professionals looking for fresh insight into the underlying theory and practical applications in a range of public policy areas.

Social Psychology and Justice

Edited by E. Allan Lind

Series: Frontiers of Social Psychology

This volume reviews and extends theory and research on the psychology of justice in social contexts. It examines how people judge whether the treatment they experience with individuals or groups is fair, and shows how this has major consequences for attitudes and behaviors, including the decision to trust or invest emotionally in social relationships and groups. Incorporating many major theories in social psychology, including groundbreaking work from neuroscience, it brings together two traditionally distinct branches of the discipline: social cognition and interpersonal relations. Finally, it illustrates how justice concepts may be applied in law, government, business, and medicine.

The Psychology of Conspiracy Theories

Jan-Willem Prooijsen

Series: The Psychology of Everything

The Psychology of Conspiracy Theories presents an engaging introduction to the origins of widespread belief in conspiracy theories. Through a discussion of the history of conspiracy theories, the book will debunk the myth that they are a modern phenomenon, exploring the broad contexts they can appear in from politics to the workplace. It will then go on to consider why some people are more susceptible to these beliefs than others, and why such beliefs are not a pathological trait. The book draws on a wealth of examples surrounding events and issues such as the 9/11 terrorist attacks and climate change.

The Psychology of Terrorism

Neil Shortland

Series: The Psychology of Everything

What is terrorism? Can anyone be radicalized? How can we respond to terrorist acts? The Psychology of Terrorism seeks to explain why some acts of violence are considered terrorism, and others are not, and why some individuals may be more susceptible to engaging in terrorist behavior. Debunking myths and lazy stereotypes, the book delves into some of the most shocking atrocities of our times to discuss the complex psychological characteristics of individual terrorists, organised groups, and their acts. Whilst there is no simple solution, The Psychology of Terrorism shows us that a growing reverse radicalization movement and modern interventionist techniques can give us hope for the future.

The Psychology of Trust

Ken Rotenberg

Series: The Psychology of Everything

Western societies today are facing a crisis of trust. Politicians, journalists, police officers, church officials, CEOs: all are distrusted. Based on a series of popular Psychology Today blogs, this engaging summary reviews the psychological research on trust so that student, practitioner, and members of the public at large understand how people trust others. The purpose of the book is to identify the factors that cause people to trust, the contexts for trust, and the consequences of trust. It is designed to provide a concise and coherent body of knowledge regarding the role that trust plays in humans.

2ND EDITION

Attitudes and Attitude Change

Tobias Vogel, Michaela Wanke

This new edition of *Attitudes and Attitude Change* provides a comprehensive and accessible introduction to basic issues in the psychological study of attitudes. Drawing on the latest research it provides coverage of all the key issues in this area, including attitude formation and change, the functions of attitudes, attitude measurement, attitudes as temporary constructs, persuasion processes, and prediction of behaviour from attitudes. The new edition has been thoroughly revised and updated to take account of the most recent research in the field. It will be essential reading for students and researchers in social psychology.

The Science of Attitudes

Joel Cooper, Shane Blackman, Kyle Keller

This textbook is aimed primarily at advanced undergraduates and graduate students interested in how attitudes are formed and changed. It uniquely integrates classic and contemporary research to give a comprehensive and rounded view of the field from its inception to present-day theory, methodology, and controversies. It is also the first textbook on attitudes to devote entire chapters to work on implicit measurements, resistance to persuasion, and social neuroscience. The book provides a comprehensive and engaging text for upper-level students of social psychology and related fields with an interest in attitudes and attitude change, including marketing, advertising, and political science.

10TH EDITION

An Introduction to Theories of Learning

Matthew H. Olson, Julio J. Ramirez

This text defines learning and shows how the learning process is studied, places learning theory in historical perspective, and presents essential features of the major theories of learning with implications for educational practices. The authors retained the best features of earlier editions and incorporated current research, including coverage of active learning and the testing effect, data showing the neurobiological basis of the cognitive map and spatial learning, new research on brain plasticity and its role in learning as well as the impact of poverty on brain and cognitive development, and new evidence that challenges the notion of learning styles.

7TH EDITION

Behavior Analysis and Learning

A Biobehavioral Approach

Erin B. Rasmussen, Casey J. Clay, W. David Pierce, Carl D. Cheney

Using a behavioral perspective, Behavior Analysis and Learning provides an advanced introduction to the principles of behavior analysis and learned behaviors, covering a full range of principles from basic respondent and operant conditioning through applied behavior analysis into cultural design. The text uses Darwinian, neurophysiological, and biological theories and research to inform B. F. Skinner's philosophy of radical behaviorism. This edition expands the focus on neurophysiological mechanisms and their relation to the experimental analysis of behavior, providing updated studies and references to reflect current expansions and changes in the field of behavior analysis.

12TH EDITION

Behavior Modification

What It Is and How To Do It

Garry Martin, Joseph J. Pear

This text is a comprehensive, practical presentation of the principles of behavior modification and guidelines for their application. It introduces forms of behavior modification ranging from helping children learn necessary life skills to solving personal behavior problems. The material assumes no prior knowledge of behavior modification or psychology. Cases and examples clarify issues and make the principles real. Questions for Learning support students in checking their knowledge, and Application Exercises assist students in the development of the practical skills they will need to complete behavior modification projects effectively.

9TH EDITION

Learning and Behavior

James E. Mazur, Amy L. Odum

Learning and Behavior reviews how people and animals learn and how their behaviors are changed because of learning. It describes the most important principles, theories, controversies, and experiments that pertain to learning and behavior that are applicable to diverse species and different learning situations. Both classic studies and recent trends and developments are explored, providing a comprehensive survey of the field. Although the behavioral approach is emphasized, many cognitive theories are covered as well, along with a chapter on comparative cognition. Real-world examples and analogies make the concepts and theories more concrete and relevant to students.

6TH EDITION

Learning and Memory

Basic Principles, Processes, and Procedures

W. Scott Terry

Learning and Memory provides a balanced review of the core methods and the latest research on animal learning and human memory. Topical coverage ranges from the basic and central processes of learning, including classical and instrumental conditioning and encoding and storage in long-term memory, to topics not traditionally covered, such as spatial learning, motor skills, and implicit memory. Each chapter begins with an outline and concludes with a detailed summary. Applications and extensions are showcased in text boxes as well as in distinct applications sections in every chapter, and review and recapitulation sections are interspersed throughout the chapters.

8TH EDITION

Principles of Behavior

Richard W. Malott, Kelly T. Kohler

Known for both its narrative style and scientific rigor, Principles of Behavior is the premier introduction to behavior analysis. Through an exploration of experimental, applied, and theoretical concepts, the authors summarize the key conversations in the field. The text can also function as the first step in a student's journey into becoming a professional behavior analyst at the BA, MA, or PhD/EdD level. Each chapter of the text is integrated with the Behavior Analyst Certification Board (BACB) task list, serving as an excellent primer to many of the BACB tasks.

3RD EDITION

The New Behaviorism

Foundations of Behavioral Science

**John Staddon**

This ground-breaking book presents a brief history of behaviorism, along with a critical analysis of radical behaviorism, its philosophy and its applications to social issues. This third edition is much expanded and includes a new chapter on experimental method as well as longer sections on the philosophy of behaviorism. It offers experimental and theoretical examples of a new approach to behavioral science. This new behaviorism provides a unified framework for the science of behavior that can be applied both to the laboratory and to broader practical issues such as law and punishment, the health-care system, and teaching.

2ND EDITION

The Science of Learning

**Joseph J. Pear**

This text comprehensively and systematically covers the large body of knowledge and powerful methodologies and applications that have developed in the science of learning since the late 19th Century. It starts with the most fundamental principles and progresses toward greater complexity. The connections with biology and evolutionary science are referenced throughout, and there is coverage of both humans and animals in their natural settings. It may be used as a primary text in courses on learning, behavior analysis and conditioning, and is a resource for professional and trainee behavior analysts and those in biology, education, and clinical psychology.

Career Paths in Human-Animal Interaction for Social and Behavioral Scientists

Edited by **Lori Kogan, Phyllis Erdman**

Career Paths in Human-Animal Interaction for Social and Behavioral Scientists is an essential text for students and professionals wanting to pursue a career in Human-Animal Interaction (HAI). It is exclusively designed to navigate this field and provide information on the best education, training, and background one might need to incorporate HAI into a successful career. The book clearly outlines the career paths available to social science students and professionals, from careers connected to human services of psychology, therapy, social work and journalism to research or other scholarship.

2ND EDITION

Children and Television

Barrie Gunter, Jill Gunter

Series: Psychology Press & Routledge Classic Editions

Does violence on TV lead to violent behaviour? Children and Television presents research evidence into the effects of television on children and their responses to it. This Classic Edition includes a new introduction to the current context of the book, exploring the emergence of new TV channels, enhanced home recording capacity, archiving and streaming services replacing traditional forms of viewing with non-linear viewing, and their impact on children.

Children and Television Consumption in the Digital Era

Use, Impact and Regulation

Barrie Gunter

Do children spend too much time with screen technologies? This key new volume explores the rapid evolution of television and how children in particular have led the way in non-linear viewing. It examines the wide body of literature to present evidence for positive and negative effects of children's screen experiences, exploring the perennial question of the impact on children's cognitive and behavioural development of exposure to specific types of content. Key topics explored include television's role in how children learn about social roles, antisocial and prosocial behaviour, in child health and well-being, and how parents can mediate children's screen behaviour.

Children as Agents in Their Worlds

A Psychological-Relational Perspective

Sheila Greene, Elizabeth Nixon

This book approaches the topic of children's agency from a fresh perspective, emphasising what psychological and developmental science can bring to a debate which has been dominated by sociology and anthropology. It reviews research on agency from family, school and wider society domains, pinpointing both strengths and weaknesses and drawing out ways in which theory and practice in relation to children as agents in their own lives might be developed. Combining a psychosocial approach with perspectives from sociology, anthropology and education it offers a stronger theoretical base for research and policy and will be essential reading for students and professionals in these fields.

Developmental Transitions

Exploring stability and change through the lifespan

Sarah Crafter, Rachel Maunder, Laura Soulsby

Series: International Texts in Developmental Psychology

Bringing together different theoretical and conceptual perspectives and a broad range of empirical research, this book encompasses a range of complex transitional forms. Covering topics such as health transitions, transitions in friendships and romantic relationships, career transitions, and societal transitions, this book takes the reader beyond a focus on childhood and adolescence, to look at the whole lifespan. Developmental Transitions is essential reading for all undergraduate and graduate students of developmental and cultural psychology and is also a valuable resource for academics and practitioner audiences interested in stability and change as people age.

Developmental Trauma

Theory, Research and Practice

Daniel Cruz

Developmental Trauma offers a comprehensive introduction to the research findings that help us understand the effects on human development of early childhood trauma and adaptation to stress. It explains how DTD differs from PTSD and emerges from a toxic seed planted at the beginning of an individual's lifespan development. Ideal for students of child and adolescent psychology, developmental psychology, clinical psychology, primary care and health psychology, education, social work, and urban studies. It is relevant for graduate students in applied fields such as clinical and counseling psychology, and those working with diverse children, and public health and policy.

2ND EDITION

Developments

Child, Image, Nation

Erica Burman

How does developmental psychology connect with (what used to be called) the developing world? What do cultural representations indicate about the contemporary politics of childhood? How is concern about child sexual exploitation linked to wider securitization anxieties? In other words: what is the political economy of childhood, and how is this affectively organized? This new edition of Developments: Child, Image, Nation, fully updated, is a key conceptual intervention and resource, reflecting further on the contexts and frameworks that tie children to national and international agendas.

Emotional Development from Infancy to Adolescence

Pathways to Emotional Competence and Emotional Problems

Dale F. Hay

Series: International Texts in Developmental Psychology

This undergraduate textbook offers a broad introductory survey of all aspects of emotional development. Taking a chronological approach, each chapter focuses on a specific emotion and covers the theories and research relating to its development, from infant emotional capabilities to the changes in self-understanding and self-conscious emotions of adolescence. The book includes coverage of differences in temperament, developmental psychopathology, emotion regulation and development of emotional understanding, and highlights the importance of early experiences such as attachment. It is core reading for social and emotional development courses in developmental psychology.

Handbook of Children's Rights

Global and Multidisciplinary Perspectives

Edited by **Martin D. Ruck, Michele Peterson-Badali, Michael Freeman**

With contributions from a wide range of international scholars, The Handbook of Children's Rights brings together research, theory, and practice from diverse perspectives on children's rights. It addresses some of the major scholarly tensions and policy debates comprising the current discourse on children's rights, including the best interests of the child, evolving capacities of the child, states' rights versus children's rights, rights of children versus parental or family rights, and balancing protection and participation. This comprehensive and cosmopolitan volume serves as an important reference for scholarly and policy-driven interest in the voices and perspectives of children and youth.

4TH EDITION

The Development Of Play

David Cohen

The Development of Play explores the central role of play in childhood development. David Cohen examines how children play with objects, language, each other, and their parents to reveal how play enables children to learn how to move, think, speak and imagine, as well as to develop emotionally and socially. This new edition includes the latest research on the impact of digital technology, brain development, cultural differences in play and gendered toys, whilst providing advice on how parents can play creatively with their children. It is essential reading for Early Years, health care and education professionals as well as undergraduate students in developmental psychology and education.

Understanding Children's Worry

Clinical, Developmental and Cognitive Psychological Perspectives

Charlotte Wilson

Series: Essays in Developmental Psychology

Wilson draws on theories from across psychology to explain how children's worry is influenced by developmental and systemic factors, examining the processes involved in pathological worry in a range of childhood anxiety disorders. Covering topics including different definitions of worry, the influence of children's development on worry, Generalised Anxiety Disorder in children, and the role parents play in children's worry, this book offers a new model of worry in children with important implications for prevention and intervention strategies. This is valuable reading for students in clinical, educational and developmental psychology, and professionals in child mental health.

3RD EDITION

The Handbook of Child and Adolescent Clinical Psychology

A Contextual Approach

Alan Carr

The third edition incorporates important advances in the field to provide a reliable and accessible resource for clinical psychologists. Thoroughly updated throughout, each chapter dealing with specific clinical problems includes cases examples and detailed discussion of diagnosis, classification, epidemiology and clinical features. New material includes the latest advances in: child and adolescent clinical psychology; developmental psychology and developmental psychopathology; assessment and treatment programmes. This book is invaluable as both a reference work for experienced practitioners and as an up-to-date, evidence-based practice manual for clinical psychologists in training.

2ND EDITION

Abnormal Child and Adolescent Psychology

A Developmental Perspective, Second Edition

Linda Wilmschurst

Abnormal Child and Adolescent Psychology is organized around five prominent and recurring themes: the course of normal development proceeds in an orderly and predictable direction; maladaptive behaviors represent deviations from the normal path; maladaptive behavior is represented by a continuum of severity based on the degree to which behaviors deviate from the norm; individual, interpersonal, contextual and cultural factors interact in a reciprocal way to influence normal development and abnormal deviations; theoretical input from diverse perspectives can guide our understanding of underlying processes that precipitate behaviors and the different developmental pathways that might result.

2ND EDITION

Clinical Psychology

A Modern Health Profession

Wolfgang Linden, Paul L. Hewitt

Clinical Psychology invites students to think like a clinical psychologist and develop an integrated sense of how science, experience, ethical behavior, and intuition get woven into our professional identity. The text uniquely portrays clinical psychology as a modern health care profession that bridges physical and mental health and takes a holistic stance. Committed to training future professionals, this text navigates students through the career path of a clinical psychologist and provides guidance on evolving education and training models. It contains a dedicated chapter on ethics, covering contemporary issues faced on the job.

Investigating Clinical Psychology

Pseudoscience, Fringe Science, and Controversies

Edited by Jonathan N. Stea, Stephen Hupp

Series: Investigating Psychology Pseudoscience

Investigating Clinical Psychology takes a deep dive into the field of clinical psychology through the lens of pseudoscience and fringe science. An expert panel of authors honor the role of science in the field while also exploring and guarding against the harms that pseudoscience can cause. Aligning with many major undergraduate textbooks for easy course integration, Investigating Clinical Psychology is valuable supplemental reading in undergraduate and graduate courses in clinical psychology. It is also a beneficial reference for clinicians in practice, as well as anyone interested in pseudoscience psychology within the mental health sector.

Making an Impact on Mental Health

The Applications of Psychological Research

Edited by **James N. Kirby, Paul Gilbert**

Series: *Routledge Psychological Impacts*

Advancements in research in psychological science have afforded great insights into how our minds work. *Making an Impact on Mental Health* analyzes contemporary, international research to examine a number of core themes in mental health, such as mindfulness and attachment, and provide an understanding of the sources of mentally ill health and strategies for remediation. The originality of this work is the embedding of psychological science in an evolutionary approach. This work is invaluable reading for advanced students in clinical psychology and professionals in the mental health field.

Single Case Methods in Clinical Psychology

A Practical Guide

Stephen Morley

This text provides a comprehensive introduction to quantitative single case methods, including experimental single case designs, for those studying clinical, health and counselling psychology and training for a professional qualification. It introduces students to the basic principles needed to appreciate and conduct single case research using quantitative methods. Students are required to prepare case studies for assessment; formal single case research designs can be used to investigate one-off clinical problems and they can also be the method of choice for research projects.

2ND EDITION

The Handbook of Intellectual Disability and Clinical Psychology Practice

Edited by **Alan Carr, Christine Linehan, Gary O'Reilly, Patricia Noonan Walsh, John McEvoy**

The *Handbook of Intellectual Disability and Clinical Psychology Practice* is an essential companion for clinical psychologists in practice and training. The book is divided into eight sections, covering conceptual frameworks, assessment frameworks and intervention frameworks, and the specific problems that arise in infancy and early childhood, middle childhood, adolescence and adulthood. This new edition is updated throughout and includes a new chapter on dementia.

9TH EDITION

The Internship, Practicum, and Field Placement Handbook

A Guide for the Helping Professions

**Brian N. Baird, Debra Mollen**

This text offers real-world knowledge of the skills interns in the helping professions need through every phase of their internship, practicum, or field placement. Drawing from the fields of psychology, counseling, social work, school counseling, and psychiatry, this edition features up-to-date coverage of remote education, training, supervision, and practice as impacted by Covid-19 and technological changes. Diversity awareness and insights are woven through every element of the text, taking into account recent developments such as Black Lives Matter, the MeToo movement, gender awareness, and others.

5TH EDITION

Trancework

An Introduction to the Practice of Clinical Hypnosis

**Michael D. Yapko, Michael D Yapko**

For nearly four decades, Trancework has been the definitive textbook for thousands of professionals undergoing training in the art and science of clinical hypnosis. Now in its 5th edition, this classic text continues its legacy of encouraging sound clinical practice based in established scientific research. This latest edition incorporates new studies and emerging topics within the field of hypnosis, including new chapters on depression and the construction of process-oriented interventions. This thorough, engaging text equips professionals with the essential skills to change clients' lives by using hypnosis to enhance treatment of both medical and psychological issues.

Emotion and Cognition

An Introduction

Patrick Lemaire

This book provides a complete and integrated assessment of the role of emotions in a wide variety of cognitive functions. Including both empirical and theoretical works and debates, this book presents the results of research aimed at understanding how our emotions influence cognitive performance in as diverse areas as attention, memory, judgment, decision-making or reasoning, and emotional regulation. Emotion and Cognition is a valuable source for all undergraduate and graduate students in the disciplines of cognitive and affective sciences, as well as for experts in the field.

Healing the Reason-Emotion Split

Scarecrows, Tin Woodmen, and the Wizard

Daniel S. Levine

Healing the Reason-Emotion Split draws on research from experimental psychology and neuroscience to dispel the myth that there is a fundamental opposition between reason and emotion. Arguing that reason and emotion mutually benefit our decision-making abilities, the book explores the idea that understanding this relationship could have long-term advantages for our management of societies biggest problems. Levine contends that we should change how we conceive our relationships with each other and the earth, using our emotions and innate reasoning abilities to aid mental processing and prove that individuals and societies can be empathic and practical at the same time.

An Introduction to Mathematical Cognition

Camilla Gilmore, Silke M. Göbel, Matthew Inglis

Series: International Texts in Developmental Psychology

The last decade has seen a rapid growth in our understanding of mathematical learning and performance and an increased recognition of the importance of the topic. The book traces the development of mathematical skills from basic number concepts to mathematical proofs, emphasising the hierarchical nature of mathematical development from early childhood to research-level mathematics. Drawing on diverse methodology from behavioural experiments to brain imaging, each chapter begins with a classic problem used to investigate mathematical cognition. The book provides an essential introduction to the field of mathematical cognition suitable for undergraduate or graduate students.

2ND EDITION

Cognitive Development and Cognitive Neuroscience

The Learning Brain

Usha Goswami

The new edition of this best-selling textbook on Cognitive Development has been thoroughly updated with the latest research in neuroscience. Going beyond Piaget and traditional theories it demonstrates how new data from brain science require a new theoretical framework for teaching cognitive development, based on learning. Coverage new to this edition includes a focus on epigenetics and the nature-nurture debate, the latest cross-cultural research and developments in the study of Theory of Mind. This book is essential for students of developmental and cognitive psychology, education, language and the learning sciences.

Development of Adult Thinking

Interdisciplinary Perspectives on Cognitive Development and Adult Learning

Edited by Eeva K. Kallio

Development of Thinking in Adulthood is a timely synthesis and evaluation of the current knowledge and emerging issues relating to adult cognitive development and learning. Focusing on psychological and educational cutting-edge research as well as giving an overview of the key theorists such as Piaget and Kohlberg, the authors offer a holistic view on the development of adult thinking, representing perspectives from developmental, personality and social psychology, as well as education, comparative religion, and philosophy. It will suit students and researchers in developmental psychology and related courses as well as adult educators and teachers working in adult education.

Early Word Learning

Edited by Gert Westermann, Nivedita Mani

Series: Current Issues in Developmental Psychology

Word learning may seem like a relatively simple task facing young language learners, when compared with the demands of learning grammar. However, closer enquiry highlights the multiple challenges in lexical acquisition. In this compilation, international experts consider word learning to be a continuous learning process, examining children's interaction with words in their entirety. This novel approach looks at the full evolution of the word from the proto-word unit devoid of meaning, to mapping meaning, to skilled recognition. The book draws on cutting-edge research in infant eye-tracking, neuroimaging techniques and computational modelling to bring together diverse perspectives.

International Handbook of Language Acquisition

Edited by Jessica Horst, Janne von Koss Torkildsen

Series: Routledge International Handbooks

This outstanding new international reference book covers a wide range of topics central to language development, from the underlying processes and role of language input to key areas of development such as semantics and morphology. It also includes broad coverage of topics in atypical language development and interventions targeting language skills. Through an expert balance of theoretical underpinnings with data from applied settings, the book considers differences between language learning in the lab as compared to the real world. It will be essential reading for students and researchers in psychology, and related fields such as linguistics and communication disorders.

Routledge International Handbook of Visual-motor skills, Handwriting, and Spelling

Theory, Research, and Practice

Edited by Yanyan Ye, Tomohiro Inoue, Urs Maurer, Catherine McBride

Series: Routledge International Handbooks

The Routledge International Handbook of Visual-motor skills, Handwriting, and Spelling explores the potentially controversial field of early literacy education. It aims to offer scholars and practitioners an analysis of how and why handwriting skills benefit early literacy learning, especially spelling acquisition, and how this can enrich experiences for children and educators. This comprehensive survey will be essential reading for scholars and students of developmental psychology, education, and literacy research.

Visual and Motor Cognition in Infants and Children

What Develops and What Stays the Same

Christiane Lange-Küttner

Series: International Texts in Developmental Psychology

This insightful book offers an authoritative yet accessible introduction to the development of visual abilities and motor skills in infants and children. Based on theory and cutting-edge up-to-date research about the development of non-verbal intelligence, it provides readers with essential knowledge about the foundations of typical and atypical development. The book encourages and stimulates new research ideas by discussing the most important research results to date. This text will be of interest to students and instructors as well as researchers in the fields of developmental, clinical, educational and cognitive psychology as well as neuroscience and physical education.

4TH EDITION

The Student's Guide to Cognitive Neuroscience

Jamie Ward

Reflecting recent changes in the way cognition and the brain are studied, this thoroughly updated fourth edition of this bestselling textbook provides a comprehensive and student-friendly guide to cognitive neuroscience. This book will be invaluable as a core text for undergraduate modules in cognitive neuroscience and can also be used as a key text on courses in cognition, cognitive neuropsychology, biopsychology or brain and behavior. New material for this edition includes more on the impact of genetics on cognition and new coverage of the cutting-edge field of connectomics. Student-friendly pedagogy is included in every chapter, alongside an extensive companion website.

2ND EDITION

An Introduction to Applied Cognitive Psychology

David Groome, Michael W. Eysenck

Using real-world scenarios and everyday examples this book offers an engaging and student-friendly review of how the findings of cognitive psychologists have been put to use. The book explores all of the major areas of cognitive psychology, including attention, perception, memory, thinking and decision making, as well as some of the factors that affect cognition processes, such as drugs and biological cycles. Now in full colour, this new edition has been thoroughly updated to include recent research and theories. There are also new chapters on perceptual errors and accidents, the influence of emotion, cognitive factors in music, and also in sport.

Fundamentals of Cognitive Science

Minds, Brain, Magic, and Evolution

Thomas Hardy Leahey

Fundamentals of Cognitive Science draws on research from psychology, philosophy, artificial intelligence, linguistics, evolution, and neuroscience to provide an engaging and student-friendly introduction to this interdisciplinary field. Whilst structured around traditional cognitive psychology topics, the book also looks at cognitive neuroscience, embodied cognition, and magic to illustrate cognitive science principles. Using extended case studies to address the most important themes, this book is suitable for upper level undergraduate and graduate courses in psychology and related fields. Cognitive Psychology

The Basics

Sandie Taylor, Lance Workman

Series: The Basics

Cognitive Psychology: The Basics provides a compact introduction to the core topics in the field, discussing the science behind the everyday cognitive phenomena experienced by us all. The book considers laboratory and applied theory and research alongside technological developments to demonstrate how our understanding of the brain's role in cognition is improving all the time. It is an essential introductory text suitable for all students of Cognitive Psychology and related disciplines. It will also be an ideal read for any reader interested in the role of the brain in human behavior.

Critical Community Psychology

Critical Action and Social Change

Carolyn Kagan, Mark Burton, Paul Duckett, Rebecca Lawthom, Asiya Siddiquee

This accessible textbook provides an overview of theoretical and practical issues around psychological work in a range of community settings. Covering key issues including migration, social justice, and the environment, the three sections of the book allow students to think, act, and reflect on their work. The book utilises examples and reflections on practice drawn from years of experience of the authors which helps students to see the application of theory and encourages them to engage in their own critical thinking. This is the ideal resource for students of different community based professions, working in a range of applied settings, at both undergraduate and postgraduate levels.

Primatology, Ethics and Trauma

The Oklahoma Chimpanzee Studies

**Robert Ingersoll, Antonina Anna Scarnà**

Primatology, Ethics and Trauma offers an analytical re-examination of the research conducted into the linguistic abilities of the Oklahoma chimpanzees. It uncovers the historical reality of this research. It has been 50 years since the first language experiments on chimpanzees. Ingersoll and Scarnà discuss how this research failed to address the emotional needs of the animals. Research into trauma has made scientific advances since those studies. It is time to consider the research from a different perspective, examining the neglect and cruelty that was inflicted on those animals in the name of psychological science.

3RD EDITION

Consciousness

An Introduction

Susan Blackmore, Emily T. Troscianko

Is there a theory that explains the essence of consciousness? Or is consciousness itself just an illusion? The 'last great mystery of science', consciousness is an area of cognitive psychology that was once viewed with extreme scepticism and was consequently avoided by the majority of mainstream scientific researchers. However, it has now become a significant area of research despite the complexity of the subject matter. *Consciousness: An Introduction* provides a comprehensive introduction to the study of this complex field. The book draws on theories and examples from psychology, neuroscience, philosophy, and biology to provide students with a thorough understanding of this subject

Foundations of Consciousness

Antti Revonsuo

The conscious mind is life as we experience it; we see the world, feel our emotions and think our thoughts thanks to consciousness. Yet for 21st century science one of the greatest challenges is to explain what consciousness really is. This book provides an easy introduction to the foundations of consciousness, asking how does consciousness, our subjective self or soul, arise from the activities of the brain? Addressing the philosophical and historical roots of the problems alongside the current scientific approaches to consciousness in psychology and neuroscience, this book examines key questions as well as delving deeper to look at altered and higher states of consciousness.

Becoming a Consumer Psychologist

Ashwani Monga, Rajesh Bagchi

This book provides a guide to what it takes to become a consumer psychologist, and achieve success in the field. Because consumer psychologists take on a variety of roles such as professor, market research professional, or consumer insights manager, it is often hard to know who to approach for career advice on consumer psychology. Becoming a consumer psychologist opens up diverse opportunities in the marketing function of firms, in academic departments, and in organizations that aim to enhance consumer welfare.

2ND EDITION

Behavioral Economics

The Basics

Philip Corr, Anke Plagnol

Series: The Basics

The second edition of Behavioral Economics: The Basics, summarizes behavioral economics, which uses insights from the social sciences, especially psychology, to explain real-world economic behavior. This is a comprehensive overview of the whole field, covering all the main areas, presented in a rigorous yet accessible form. It should especially appeal to students, those with an interest in applying behavioral economic knowledge in their professional life, and anyone who wants to know how they are being influenced every day of their lives by (usually unseen) behavioral insights.

2ND EDITION

Psychological Foundations of Marketing

The Keys to Consumer Behavior

Allan Kimmel, Allan J. Kimmel

This is the only textbook to provide an applied, critical introduction to the role of psychology in marketing, branding and consumer behavior. Addressing issues of motivation, perception and decision-making, the book features case studies throughout to highlight how psychological research can be applied in the marketplace. Updated to include analysis of the effects of digital media and technology, as well as the role of personality and social context, the book is ideal for both students and professionals, building to provide a complete primer on how psychology informs and explains marketing strategies, and how consumers respond to them.

Conducting Interviews with Child Victims of Abuse and Witnesses of Crime

A Practical Guide

Mireille Cyr

This book is a practical and thoughtful guide for the forensic interview of children, presenting a synthesis of the empirical and theoretical knowledge necessary to understand the account of child victims of abuse or witnesses of crime. It is a complex task to interview children who are suspected of being abused in order to gather their stories, requiring the mastery of many skills and knowledge. This book is innovative by the constant links that are made between the results of the research into interviewing and understanding the accounts of child victims of abuse or witnesses of crime and its significance for the interventions made to the field.

Forensic Case Histories

Understanding Serious Offending Behaviour in Men

Jackie Craissati

Forensic Case Histories examines men's violent and sexual offending behaviors, outlined through a series of real offender narratives, from a psychological perspective and in an accessible manner that will engage any audience, from the criminology-intrigued layperson to the specialist in the field. Both educational and accessible, this book will appeal not only to specialists but to any layperson curious to understand more about criminal acts. It is especially valuable to students and instructors of criminal justice, mental health, and related fields.

Making an Impact on Policing and Crime

Psychological Research, Policy and Practice

Edited by **Clifford Stott, Ben Bradford, Matthew Radburn, Leanne Savigar-Shaw**

Series: Routledge Psychological Impacts

Making an Impact on Policing and Crime documents the application of cutting-edge research to real-world policing and explains how psychologists' insights have been adapted and developed to offer effective solutions across the criminal justice system. The experts featured in this collection cover a range of psychological topics surrounding the field, including the use of CCTV and 'super-recognisers' and forensic questioning of vulnerable witnesses. This collection is a vital resource for practitioners in policing fields and the court system and professionals working with offenders, as well as students and researchers in related disciplines.

Psychological Criminology

An Integrative Approach

Richard Wortley

Series: Crime Science Series

Psychological Criminology addresses the question: what is it about individuals and their experiences that cause them to commit crime and/or to become criminal? The book provides a comprehensive coverage of psychological theories of crime and criminality, emphasising the connections among approaches, and to show how, taken together, they provide a more complete picture of crime and criminality.

2ND EDITION

Understanding Criminal Behaviour

Psychosocial Perspectives on Criminality and Violence

David Jones

This book offers an accessible introduction to criminal behaviour, examining perspectives from criminology and psychology. It explores a range of 'psychosocial' approaches that seek to understand the emotions that surround criminal behaviour. This new edition has been fully updated, including a revised introduction to psychosocial criminology, up-to-date discussion of changes in the criminal justice system in the context of mental health and two new chapters on race and crime, and public violence, extremism and terrorism. This book is essential reading for students of criminal behaviour, criminological theory, criminal psychology and psychological criminology.

Why We Kill

Understanding Violence Across Cultures and Disciplines

Edited by **Nancy Loucks, Sally Smith Holt, Joanna R. Adler**

Why We Kill examines this violence in its many forms, exploring how culture plays a role in people's understanding and definition of violent action. From the first chapter, which examines 'conventional' homicide to the final chapter's bone-chilling account of the Rwandan genocide, this fascinating book makes compelling reading.

Adapting Psychological Tests and Measurement Instruments for Cross-Cultural Research

An Introduction

Vladimir Hedrih

Psychologists are becoming more aware of the importance of cross-cultural adaptation of tests and the need to have adequate skills in this area. This book provides a thorough introduction to challenges faced and methods used for adapting psychological tests for application in multiple cultures. It covers an array of topics, including the conceptualization of cultural differences and its relevance for psychological testing and functioning of psychological tests, intellectual property regulations relevant for psychological testing and adaptation, personal data protection and rights of test examinees/research participants, and interpretation of individual results.

2ND EDITION

Cross-Cultural Analysis

Methods and Applications, Second Edition

Edited by **Eldad Davidov, Peter Schmidt, Jaak Billiet, Bart Meuleman**

Series: European Association of Methodology Series

Intended to bridge the gap between the latest methodological developments and cross-cultural research, this interdisciplinary resource presents the latest strategies for analyzing cross-cultural data. Techniques are demonstrated through the use of applications that employ cross-national data sets such as the latest European Social Survey. With an emphasis on the generalized latent variable approach, internationally prominent researchers from a variety of fields explain how the methods work, how to apply them, and how they relate to other methods presented in the book.

Fundamentals of Research on Culture and Psychology

Theory and Methods

Valery Chirkov

This unique text covers the core research methods and the philosophical assumptions that underlie various strategies, designs, and methodologies used when researching cultural issues. It teaches readers why and for what purpose one conducts research on cultural issues so as to give them a better sense of the thinking that should happen before they go out and collect data. More than a "methods text", it is about all the steps that go into doing cross-cultural research. It discusses how to select the most appropriate methods for data analysis and which approach to use, and details quantitative, qualitative, and mixed methods for experimental lab studies and ethnographic field work.

Cross-Cultural Psychology

Critical Thinking and Contemporary Applications

Eric B. Shiraev, David A. Levy

This international best-selling textbook provides an interdisciplinary review of the theories and research in cross-cultural psychology. The dynamic author team brings a diverse set of experiences in writing this text that provides cross-cultural perspectives on a wide range of applied topics in psychology, such as consciousness, intelligence, emotion, motivation, human development, psychological disorders, and social perception. Written in a conversational style that transforms complex ideas into accessible ones, its numerous applications also prepare students for working in various multicultural contexts such as teaching, counseling, business, health care, and social work.

2ND EDITION

Cultural Issues in Psychology

An Introduction to a Global Discipline

Andrew Stevenson

This book offers an engaging introduction to cultural and cross-cultural psychology, and offers an interdisciplinary approach to the key research theories and controversies that impact on human behaviour in a global context. The new edition will be updated to include a new chapter on migration, and additional coverage of indigenous psychologies, ethnographic research methods, and cosmopolitanism, reflecting the latest developments in this global discipline. Also including chapters on culture and lifespan, and culture and psychopathology, this is the essential entry-level text on cultural and cross-cultural psychology for students taking psychology and related courses.

Interactive Exercises for Cross-Cultural Psychology

Encounters With a Complex World

David C. Devonis

This book provides material for interactive discussion of a range of topics in cross-cultural psychology, including regional and indigenous psychology; symbolic and expressive psychology; identity; social perception and cognition; interpersonal interaction; emotion, motivation, and health; development and family; government and law; economics and work; environmental psychology, animals and other species; and the psychology of recreation and sport. It offers suggestions for exposition, simulation, and, occasionally, confrontation of important cultural issues, and allows for maximum creativity in instructional design.

Theories of Culture

**Arnold Groh**

What is culture? Why do cultures change over time? Are there any discernible rules or principles behind culture-related phenomena and processes? Familiarity with the most significant cultural theories of the 20th and 21st centuries is vital for anyone studying or researching in the field. This guide describes these theories and their originators, as well as the links between them and their mutual influences. It explains different ideas in clear and objective fashion and includes approaches that have been unduly neglected, but which have high explanatory value. It offers readers an up-to-date idea of what culture is, and how our understanding of it has developed over the past century.

Individual-Based Models of Cultural Evolution

A Step-by-Step Guide Using R

Alberto Acerbi, Alex Mesoudi, Marco Smolla

Individual-Based Models of Cultural Evolution shows readers how to create individual-based models of cultural evolution using the programming language R. The field of cultural evolution has emerged in the last few decades as a thriving, interdisciplinary effort to understand cultural change and cultural diversity within an evolutionary framework and using evolutionary tools, concepts and methods. This is an essential resource for researchers and students interested in cultural evolution, from disciplines including psychology, anthropology, archaeology, and biology as well as sociology and digital humanities.

3RD EDITION

Depression

Constance Hammen, Ed Watkins

Series: Clinical Psychology: A Modular Course

Depression is intended for students and professionals seeking a readable and up-to-date summary of research-based information on this disorder. With the help of clinical examples, the authors present chapters covering the presumed cause of depression, including genetic and biological factors, life stress, family, and interpersonal contributors to depression. The new edition retains the features that have made previous editions so popular, while providing updated research throughout, and highlighting areas of new development and change.

Depression

Current Perspectives in Research and Treatment

Gary Christopher

Depression, now recognized as a significant source of disability across the globe, is something many of us will be familiar with. This book explores the way people have discussed depression and examines how scientific understanding has led to ways to better appreciate and treat the condition. This book is an essential read for practicing and trainee clinical psychologists, but its accessible and readable style will appeal to a broader audience of those looking to further understand depression.

Designing and Implementing Effective Evaluations

Comprehensive Case Studies in Program Evaluation

Edited by **Kenneth J. Linfield, Steven Kniffley**

Designing and Implementing Effective Evaluations provides extensive real-life examples of program evaluations that illustrate the various elements and steps in conducting a successful evaluation. The detailed and diverse range of case studies show the common elements, methods, approaches, and processes of program evaluations, while also demonstrating the way that good evaluators adapt and tailor those methods to the specific characteristics and needs of a given program. The text is a vital resource for postgraduate students in program evaluation courses in Psychology, Education, Public Health, Social Work and related fields.

7TH EDITION

Developmental Science

An Advanced Textbook

Edited by **Marc H. Bornstein, Michael E. Lamb**

Developmental Science: An Advanced Textbook is the most complete and cutting-edge introduction to the field available today. In this Seventh Edition, international experts prepare original, comprehensive, and topical treatments of the major areas of developmental science, which are masterfully woven into a single coherent volume. Some chapters in this edition are new, and those carried forward from the sixth edition have been extensively revised. Ideal for advanced undergraduate and introductory graduate courses, the text is accompanied by a website with supplementary material for students and instructors.

2ND EDITION

Developments

Child, Image, Nation

Erica Burman

How does developmental psychology connect with (what used to be called) the developing world? What do cultural representations indicate about the contemporary politics of childhood? How is concern about child sexual exploitation linked to wider securitization anxieties? In other words: what is the political economy of childhood, and how is this affectively organized? This new edition of *Developments: Child, Image, Nation*, fully updated, is a key conceptual intervention and resource, reflecting further on the contexts and frameworks that tie children to national and international agendas.

2ND EDITION

Fundamentals of Developmental Psychology

Peter Mitchell, Fenja Ziegler

This new edition of the highly successful *Fundamentals of Development: The Psychology of Childhood* has been thoroughly revised and updated to reflect the exciting new findings in the thriving area of developmental psychology. The book addresses a number of fascinating questions including: Are children born good or bad? What do children understand about the mind? What roles do nature and nurture play in child development? The book is student-friendly, with all topics described in straightforward language, amply illustrated in full colour, and organized as standalone chapters. The text will make an excellent companion to introductory courses on developmental psychology.

Lifespan Developmental Systems

Meta-theory, Methodology and the Study of Applied Problems

Ellen A. Skinner, Thomas Kindermann, Andrew Mashburn

This innovative textbook takes advanced undergraduate and graduate students "behind the curtain" of standard developmental science, so they can begin to appreciate the generative value and methodological challenges of a lifespan developmental systems perspective. With the aid of extensive online supplementary materials, it envisions applied developmental science as focused on ways to use knowledge about human development to help solve societal problems in real-life contexts, and considers applied developmental research as purpose-driven, field-based, community-engaged, and oriented toward efforts to optimize development.

The Psychology of Human Social Development

From Infancy to Adolescence

Sandie Taylor, Lance Workman

The Psychology of Human Social Development is a major new undergraduate textbook which presents the essential core topics and reflects the exciting new findings in this thriving field. The book follows a thematic approach looking at key topics in social development in childhood and adolescence, including personality development and research methods. The authors examine multiple perspectives, including the state-of-the-art social-ecological approach, and discuss normative development with issues related to "abnormal" development. It will be essential reading for psychology students on courses in Social Development and relevant for related fields such as education, gender studies and nursing.

2ND EDITION

Understanding Child Development

Psychological Perspectives and Applications

Sara Meadows

Understanding Child Development follows a thematic approach and outlines the main areas of developmental psychology in childhood at introductory level. It draws together strands of knowledge from psychology, neuroscience, social and cognitive sciences in a concise and accessible format. Alongside coverage of classic and contemporary theories and research it has a clear focus on applications, looking at the child in real-world settings. Coverage new to this edition includes the latest research on Theory of Mind, bullying, cultural variations in development, parental discipline, behavioural genetics, prenatal development and foetal learning.

Providing insight into human lives

Robert Lewis Wilson, Rachel Wilson

Drawing on contemporary research from neuroscience, psychology, education and social welfare, Understanding Emotional Development provides an overview of the full course of emotional development – from infancy and toddlerhood, to key changes which occur during adolescence. Written in an engaging and accessible style, each chapter contains a number of useful pedagogical features, including summaries, review questions, and further reading. The book will be essential reading on all courses covering social and emotional development, and it will also be of interest to professionals working in education, child welfare, and social work.

2ND EDITION

Autism

A New Introduction to Psychological Theory and Current Debate

**Sue Fletcher-Watson, Francesca Happé**

This new edition of Happé's provides a concise overview of contemporary psychological theories about autism. Using a 'levels of explanation' framework, the authors explore the relationship between psychological (cognitive) explanatory models and biological or behavioural models and considers their clinical and educational impact. The book includes voices giving the autistic point of view, as well as an analysis of cutting edge questions for future research such as issues of neurodiversity. It is essential reading for undergraduate and postgraduate students in psychology as well as practitioners in clinical or educational psychology who require theoretical understanding.

Child and Adolescent Psychology

Typical and Atypical Development

**Stephen von Tetzchner**

The developmental pathways that children and adolescents follow can be typical or atypical, and our understanding of each is changing. This unique textbook provides an engaging and comprehensive overview of the major themes and perspectives within developmental psychology, but also integrates an understanding of the processes that result in common disorders.

3RD EDITION

The Handbook of Child and Adolescent Clinical Psychology

A Contextual Approach

**Alan Carr**

The third edition incorporates important advances in the field to provide a reliable and accessible resource for clinical psychologists. Thoroughly updated throughout, each chapter dealing with specific clinical problems includes cases examples and detailed discussion of diagnosis, classification, epidemiology and clinical features. New material includes the latest advances in: child and adolescent clinical psychology; developmental psychology and developmental psychopathology; assessment and treatment programmes. This book is invaluable as both a reference work for experienced practitioners and as an up-to-date, evidence-based practice manual for clinical psychologists in training.

Understanding ADHD

A Guide to Symptoms, Management and Treatment

**Anna Maria Re, Agnese Capodice***Series: Understanding Atypical Development*

This essential guide provides accessible, concise, evidence-based guidelines on ADHD, offering a deeper scientific understanding of the condition and its consequences. Written for parents and health, education and social care professionals involved in the field, it offers ideas and insights for managing the condition in daily family life and promoting the most effective self-regulation strategies for children and adolescents. It explains the basic theories on ADHD and covers key topics including parent-child relationships, helping children understand their condition, friendships with peers, comorbidities, classroom strategies, and how families and professionals can best work together.

D-scoring Method of Measurement

Classical and Latent Frameworks

Dimitar Dimitrov

Series: Quantitative Methodology Series

D-scoring Method of Measurement presents a unified framework of classical and latent measurement referred to as D-scoring method of measurement (DSM). Provided are detailed descriptions of DSM procedures and illustrative examples of how to apply the DSM in various scenarios of measurement. The DSM is designed to combine merits of the traditional CTT and IRT for the purpose of transparency, ease of interpretations, computational simplicity of test scoring and scaling, and practical efficiency, particularly in large-scale assessments.

Bullying in Youth Sports Training

New perspectives and practical strategies

Miguel Nery, Carlos Neto, António Rosado, Peter K. Smith

This book explores how often bullying occurs, how long it lasts, where and when bullying takes place, the coping strategies used by victims, and the roles of bystanders and bullies. It provides new insights into theories of youth sport bullying and highlights the particular characteristics specific to bullying in sport. The book features both theoretical and practical approaches to bullying in youth sport training, providing anti-bullying guidelines based on the results of the research. It is essential reading for scholars and students in child development and sport sciences as well as sports coaches and professionals in mental health, education and social work.

Developmentally Appropriate Curriculum and Instruction

Pedagogy for Knowledge, Attitudes, and Values

Edited by Ana Garcia-Nevarez, Kimberly A. Gordon Biddle

This timely and accessible volume explores how our understanding of research in child development can help cultivate the knowledge, skills, and attitudes children need for informed and thoughtful participation in society by viewing the curriculum through a developmental lens. Developmentally Appropriate Curriculum and Instruction will be essential reading for students of child development and education, as well as educators and those in teacher training who are interested in how theory and research can be effectively harnessed to improve children's outcomes.

Educational Neuroscience

Development Across the Life Span

Edited by Michael S. C. Thomas, Denis Mareschal, Iroise Dumontheil

Series: Frontiers of Developmental Science

Expert contributors offer state of the art research in educational neuroscience together with evidence-based recommendations for practice. This important volume explores four key themes: Individual differences, or what makes children perform better or worse in the classroom; the nature of individual differences at different stages in development; research that has investigated activities that might give general benefits to cognition; and the translation of research findings into classroom practices. Specific topics explored include neuropsychological perspectives on socioeconomic disparities in educational achievement, executive function, and emotional development.

The Child at School

Interactions with peers and teachers, 2nd Edition

Peter Blatchford, Anthony D. Pellegrini, Ed Baines

Series: International Texts in Developmental Psychology

The Child at School presents a rigorous overview of child development in the school environment. It provides the theoretical foundations necessary to understand child development in school contexts, and practical guidance grounded on empirical research. Written by leading researchers, it is informed by a multi-cultural perspective, making its conclusions relevant to students and practitioners internationally. This edition includes a new chapter on how peer relationships affect learning. It will be essential for students of child development and educational psychology and for trainee and practicing teachers, social workers, clinical psychologists and policy makers.

4TH EDITION

The Development Of Play

David Cohen

The Development of Play explores the central role of play in childhood development. David Cohen examines how children play with objects, language, each other, and their parents to reveal how play enables children to learn how to move, think, speak and imagine, as well as to develop emotionally and socially. This new edition includes the latest research on the impact of digital technology, brain development, cultural differences in play and gendered toys, whilst providing advice on how parents can play creatively with their children. It is essential reading for Early Years, health care and education professionals as well as undergraduate students in developmental psychology and education.

3RD EDITION

Educational Psychology

Edited by **Tony Cline, Anthea Gulliford, Susan Birch**

Series: *Topics in Applied Psychology*

Now in its Third Edition, *Educational Psychology* offers a comprehensive overview of how key advances in social, developmental and cognitive psychology impact upon the role of educational psychologists working today. The book also provides students with a balanced and cutting-edge introduction to both the field and the profession. By integrating both research and everyday practice, the book is unique in engaging a critical appreciation of both the possibilities and limitations of educational psychology. It is the ideal book for any student wishing to engage with this important and evolving field of study.

Learning in Organizations

An Evidence-Based Approach

J. Kevin Ford

Learning in Organizations: An Evidence-Based Approach examines the variety of systematic approaches and strategies for learning and development used in the workplace through the implementation of formal training, guided instruction, developmental job experiences, and self-directed learning. For learning practitioners, research evidence is translated into best practices that can be applied to enhance workplace learning and development. For undergraduate and graduate students, the book provides an up-to-date review of the key concepts and ways of thinking about and studying learning in the workplace.

Environmental and Architectural Psychology

The Basics

Ian Donald

Series: The Basics

This new 'Basics' of environmental and architectural psychology provides an overview of the discipline in a jargon free and accessible manner. The book addresses issues around sustainability, climate change, and behaviour, grounded in theory drawn from psychology, geography, and architecture. The author examines how people shape and affect the environment, but also in turn how the environment shapes and affects people's thoughts, feelings, and behaviours. Readers will be encouraged to reflect on the role design and policies have in shaping the environment, making this the ideal book for anyone interested in environmental and architectural psychology.

5TH EDITION

Psychology for Sustainability

Britain A. Scott, Elise L. Amel, Susan M. Koger, Christie M. Manning

Psychology for Sustainability applies psychological science to so-called "environmental" problems that manifest when human behavior disrupts and degrades natural systems. This edition represents a substantial revision and expansion spurred by a burgeoning body of research and by global ecological, political, and social developments. Particular attention is paid to environmental justice and collective action for systems change. Timely topics include climate change, biodiversity loss, environmental racism, Indigenous perspectives, social media, and Covid-19 and other pandemics.

The Psychology of Climate Change

Geoffrey Beattie, Laura McGuire

Series: The Psychology of Everything

This book offers a psychological perspective on the current thinking on climate change, an issue of major global importance. The authors seek to demonstrate that there's a significant psychological issue connected with climate change in relation to the development of the climate change debate, optimism bias, the failure of climate change initiatives, and our attitudes towards the environment. There is also discussion of how behaviour in relation to climate change can be changed, to go some way to resolve the mistakes that have been made in the past in relation to our environment. This is fascinating reading for students, general readers and policy makers interested in climate change.

Designing Experiments and Analyzing Data

A Model Comparison Perspective, Third Edition

**Scott E. Maxwell, Harold D. Delaney, Ken Kelley**

This text offers an integrative conceptual framework for understanding experimental design and data analysis. Examples of published research demonstrate the applicability of each chapter's content; flowcharts assist in choosing the most appropriate procedure; end-of-chapter lists of important formulas highlight key ideas and assist readers in locating the initial presentation of equations; programming code and tips and extensive sets of exercises help develop a deeper understanding of the subject. The book and its website, with web apps, tutorials, and detailed code, are ideal for students and researchers seeking the optimal way to design their studies and analyze the resulting data.

Statistical Power Analysis

A Simple and General Model for Traditional and Modern Hypothesis Tests, Fifth Edition

**Brett Myers, Kevin R. Murphy**

Statistical Power Analysis explains the key concepts in statistical power analysis and illustrates their application in both tests of traditional null hypotheses. It provides readers with the tools to understand and perform power analyses for virtually all the statistical methods used in the social and behavioral sciences. This edition includes new material and new power software. The programs used for power analysis in this book have been re-written in R, a language that is widely used and freely available. Statistical Power Analysis helps readers design studies, diagnose existing studies, and understand why hypothesis tests come out the way they do.

Experimental Design in Psychology

A Case Approach

**M. Kimberly MacLin**

MacLin combines a text and case approach to examine methods of experimental psychology. Using published research findings, students read, critique, and analyze over seventy five actual experiments, representing every major area of psychology - from animal studies to child psychology. This textbook is designed to engage students on a deeper and more relatable level with ethical experimental design and analysis. It provides them with real world information about how science in psychology is conducted and how they can participate.

3RD EDITION

Research Design and Statistical Analysis

Third Edition

**Jerome L. Myers, Arnold D. Well, Robert F. Lorch Jr**

Featuring comprehensive coverage of the design principals and statistical concepts necessary to make sense of real data, this book helps readers more easily generalize concepts to new research situations. Emphasis is placed on the underlying logic and assumptions of the analysis and what it tells the researcher, the limitations of the analysis, and the consequences of violating assumptions. "Real-world" data is used to illustrate the concepts. Extensively revised, this edition features a new chapter at the end of each section that provides an integrated example of how to apply the concepts and procedures covered in the section. Three additional new chapters demonstrate how to plan and execute a study, compare experimental designs, and spot the most common errors in data analysis and interpretation. Many new data sets, problems, and SPSS (PASW) examples are also provided. A new website features the SPSS syntax files and all of the data files in SPSS and Excel format. One of the few b

A Case Approach

**M. Kimberly MacLin**

In easy-to-read, conversational language, Kim MacLin teaches students experimental design principles and techniques using a tutorial approach in which students read, critique, and analyze over 75 actual experiments from every major area of psychology. She provides them with real-world information about how science in psychology is conducted and how they can participate. This text is essential reading for students and researchers interested in and studying experimental design in psychology.

2ND EDITION

Social Groups in Action and Interaction

2nd Edition

**Charles Stangor**

This textbook reviews and analyzes the human group as it operates to create both social good and, potentially, social harm. It uniquely blends social psychological research on intra-group behavior with research on inter-group behavior to give a more rounded perspective on the dynamics of social groups. In addition, topics that are not unique to either of these two approaches, and yet which are important aspects of group relations, such as culture, are also covered in depth. As such, this thoroughly revised 2nd Edition provides the most wide-ranging and contemporary resource for courses on group dynamics and behavior.

Career Paths in Human-Animal Interaction for Social and Behavioral Scientists

Edited by **Lori Kogan, Phyllis Erdman**

Career Paths in Human-Animal Interaction for Social and Behavioral Scientists is an essential text for students and professionals wanting to pursue a career in Human-Animal Interaction (HAI). It is exclusively designed to navigate this field and provide information on the best education, training, and background one might need to incorporate HAI into a successful career. The book clearly outlines the career paths available to social science students and professionals, from careers connected to human services of psychology, therapy, social work and journalism to research or other scholarship.

2ND EDITION

Health Behavior Change

Theories, Methods and Interventions

**Andrew Prestwich, Jared Kenworthy, Mark Conner**

This new and updated edition provides a complete understanding of health behavior change, from its theoretical building blocks to the practical challenges of developing and testing an intervention. It presents a theory-driven, scientific approach to understanding and changing health behaviors. It will be essential reading for students and researchers of health psychology, public health and social work, as well as any professional working in this important area, particularly those tasked with reducing the high proportion of individuals failing to meet national health behavior targets.

Behavioral Economics and Healthy Behaviors

Key Concepts and Current Research

Edited by **Yaniv Hanoch, Andrew Barnes, Thomas Rice**

This important book provides the first overview of the role that behavioural economics can play in tackling the most pernicious health issues we face today. Each chapter discusses the core theoretical concepts while synthesizing what research has shown us so far. Covering a range of key topics, from the prevention of HIV and the promotion of exercise to the cessation of smoking and adherence to medication in chronic conditions, it is the first collection to consolidate how this dynamic field can inform our health-related behaviours. It will be essential reading for students and researchers in psychology and economics, as well as policy makers and practitioners working in public health.

A Guide to Managing Atypical Communication in Healthcare

Meaningful Conversations in Challenging Consultations

Edited by **Riya Elizabeth George, Michelle O'Reilly**

This book presents a supportive and practical guide for healthcare professionals and trainees in a way that considers a wide spectrum of atypical communication conditions, their impact on everyday healthcare interactions, and the social and cultural contexts in which interactions with atypical communicators take place. This book will be a valuable resource for health and mental healthcare professionals as well as undergraduate and postgraduate students in healthcare and allied healthcare courses. It can be included as recommended reading material in clinical communication curricula.

eHealth Research, Theory and Development

A Multi-Disciplinary Approach

Edited by **Hanneke Kip, Nienke Beerlage-de Jong, Lisette (J.E.W.C.) van Gemert-Pijnen, Robbert Sanderman, Saskia M. Kelders**

This is the first book to provide a comprehensive overview of the social and technological context in which e-health applications have arisen, the psychological principles on which they are based, and the key development and measurement issues to their successful intervention. Covering the use of e-health applications across both mental and physical health issues, it is an ideal companion not only for students of health psychology, public health and beyond, but also professionals wishing to become cognisant of this important area. Including case studies throughout to illustrate key issues and theories, this is a complete guide to what e-health means, and how it can be used in practice.

Health Psychology in Clinical Practice

Edited by **Mark Forshaw**

Health Psychology in Clinical Practice provides a collection of first-hand accounts from several of the most established and experienced clinically working health psychologists in the UK explaining what they do, how they do it, and why their work is important. This book is an essential resource as a crucial snapshot of practice in the discipline in the UK and will additionally support trainees and those seeking a career in health psychology centered on practice rather than research or teaching.

Handbook of Health Psychology

Edited by **Tracey A. Revenson, Regan A. R. Gurung**

This rich resource provides a thorough overview of current knowledge and new directions in the study of the biological, psychological, social, and cultural factors that affect health, health behavior, and illness. Chapters review the latest theories and research with an emphasis on how research is translated into behavioral interventions. It considers the intersections of populations (women's and sexual minority health), cultural groups (African American, Asian American, and Latino), risk and protective factors (obesity), and diseases (diabetes, HIV), making it essential reading for scholars of health psychology, public health, epidemiology, gender studies, and cultural psychology.

Health Psychology

The Basics

Erica Cook, Lynne Wood

Series: *The Basics*

This accessible primer on health psychology covers the key theories and models of the discipline. Through the use of real-life case studies and examples, it covers a broad range of topics related to the field of health psychology including: health promotion, risky health behaviour and health in healthcare settings. It explains how health psychology serves to not only promote positive health and reduce maladaptive health behaviours, but also support those who are chronically ill. It is an essential introductory text suitable for students, professionals and general readers interested in this important and emerging topic area.

3RD EDITION

Health Psychology

An Interdisciplinary Approach

Deborah Fish Ragin

This textbook takes a truly interdisciplinary approach to studying health psychology. It examines five systems that affect individual health outcomes: individual, family/community, social/physical environment, healthcare systems, and health policy. While grounded in psychology, it takes a social ecological perspective, incorporating ideas from anthropology, biology, economics, environmental studies, medicine, public health, and sociology. This text also examines health from a global perspective by exploring the impact of illnesses locally, regionally and globally. This edition includes a new chapter on psychoneuroimmunology and will be of particular interest to undergraduate students.

2ND EDITION

Health Psychology

Charles Abraham, Mark Conner, Fiona Jones, Daryl O'Connor

Series: *Topics in Applied Psychology*

This concise but comprehensive introduction to health psychology links theory and practice to provide an overview of both the academic and professional aspects of this field. The book is split into five clear sections: biological bases of health and illness; stress and health; coping resources; motivation and behavior; relating to patients. Each chapter builds on the previous one and contains discussion of ethical issues, research methods, and real-world applied examples. The integrated and interactive approach, combined with full online support and comprehensive coverage, make this book the ideal companion for courses in health psychology.

Becoming a Health Psychologist

Tracey A. Revenson, Patrice G. Saab, Peggy M. Zoccola, Lara N. Traeger

This book details what is involved in becoming a health psychologist, what a health psychology career entails, and how to reach that goal. This book describes different career paths and the roles assumed by health psychologists, including in academic psychology departments, schools of medicine, nursing and public health, research think tanks, and government agencies. The book features profiles of a diverse group of successful health psychologists discussing their career paths. Additionally, through the inclusion of sidebar tips and action plans, this book helps those interested in the field to develop an individualized plan for choosing a career path and applying to graduate school.

6TH EDITION

A Brief History of Psychology

Michael Wertheimer, Antonio E. Puente

This book provides a balanced coverage of experimental, applied, and clinical psychology, as well as the clear and succinct presentation of the field's major events and schools of thought. The sixth edition features an expanded pedagogical program with bolded terms, a complete glossary, more illustrations, and web-based instructional materials including Power Points, a test bank, discussion question, and more. Special emphasis has also been placed on the role of the American Psychological Association (APA) in the history of psychology.

2ND EDITION

A History of Psychology

Globalization, Ideas, and Applications

Robert B. Lawson, E. Doris Anderson, Antonio Cepeda-Benito

Global, interdisciplinary, and engaging, this textbook integrates materials from philosophical and biological origins to the historical development of psychology. Its extensive coverage of women, minorities, and psychologists around the world emphasizes psychology as a global phenomenon. In tracing psychology from its origins in early civilizations, ancient philosophy, and religions to modern science, technology, and applications, this book integrates overarching psychological principles and ideas that have shaped the global history of psychology, keeping an eye toward the future of psychology. Revised throughout, this new edition also includes a new chapter on clinical psychology.

8TH EDITION

A History of Psychology

From Antiquity to Modernity

Thomas Hardy Leahey

A History of Psychology places social, economic, and political forces of change alongside psychology's internal theoretical and empirical arguments, illuminating how the external world has shaped psychology's development, and, in turn, how the late 20th century's psychology has shaped society. The textbook approaches the material from an integrative rather than wholly linear perspective and carefully examines how issues in psychology reflect and affect concepts that lie outside the field of psychology's technical concerns as a science and profession. It covers scientific, applied, and professional psychology, and is appropriate for higher-level undergraduate and graduate students.

7TH EDITION

A History of Psychology

The Emergence of Science and Applications

William Douglas Woody, Wayne Viney

This text traces the history of psychology from antiquity through the early 21st century. It presents internal, disciplinary history as well as external contextual history, emphasizing the interactions between psychological ideas and the larger cultural and historical contexts in which psychologists and other thinkers conduct research, teach, and live. The new edition features more women, people of color, and others who are historically marginalized; expanded discussions of eugenics and racism in early psychology; and new content on the history of the biological basis of psychology, the emergence of qualitative methods, and ecopsychology, ecotherapy, and environmental psychology.

2ND EDITION

A History of Psychology in Ten Questions

Lessons for Modern Life

Michael Hyland

The second edition of this student-friendly book uses the history of psychology as a backdrop to provide a commentary on key historical developments and modern dilemmas, whilst encouraging readers to think about questions affecting life today. This insightful text encourages readers to question their own lives and the wider society by providing an engaging introduction to debates in history and contemporary society. The book is also the ideal resource for undergraduate students of psychology taking CHIPS and other history of psychology modules, as well as anyone generally interested in learning more about this fascinating subject.

The History and Evolution of Psychology

A Philosophical and Biological Perspective

Brian D. Cox

This book discusses key figures in history in the context of their time, takes students on a carefully-formulated, chronological journey through the build-up of psychology from ancient times to the present, and seeks to draw students into the way science is done, rather than merely presenting them with historical fact. Students will learn not only the 'what', but the 'why' of the history of psychology and will acquire the necessary background historical material to fully understand those concepts. Organized around a series of paradigms, the book seeks to portray psychology as an on-going, evolving process, rather than a theory.

Psychology

The Basics

Rolf Reber

Series: The Basics

Psychology is the science of mind and behaviour. This compact introduction to the basic principles is the ideal primer for anyone looking for an accessible overview of this fascinating subject. Illustrating how everyday behaviours can be explained through these fundamental tenets, the book covers the core areas of cognitive, developmental and social psychology, as well as behaviorism, the brain, our emotions, personality and individual differences, and psychological disorders. Including further reading in each chapter for those wishing to go further, this book shows how Psychology can explain not only how we perceive the world, but also how we behave in it. It is the perfect introduction.

2ND EDITION

Writing in Psychology

Scott A. Miller

The second edition of Writing in Psychology by Scott A. Miller is a comprehensive guide to addressing the most challenging issues that students face while writing about psychology, including what to say and how to say it. It offers practical tools to overcome the challenges and create an engaging work. The book will benefit anyone looking for guidance on how to write about psychological content. It is ideal for research scholars and psychology students as a primary text for writing in psychology courses and a supplement for graduate or advanced undergraduate courses in research design or research methods.

Foundations of Islāmic Psychology

From Classical Scholars to Contemporary Thinkers

G. Hussein Rassool, Mugheera M. Luqman

This book examines the history of Islāmic psychology from the Islamic Golden age through the early 21st century, giving a thorough look into Islāmic psychology's origins, Islamic philosophy and theology and key developments in Islāmic psychology. This book aims to engage and inspire students taking undergraduate and graduate courses on Islāmic psychology, to recognise the power of history in the academic studies of Islamic psychology, to connect history to the present and the future, and to think critically. It is also ideal reading for researchers and those undertaking continuing professional development in Islāmic psychology, psychotherapy and counselling.

Islamic Psychology

Human Behaviour and Experience from an Islamic Perspective

G. Hussein Rassool

Islamic Psychology or ilm an-nafs (Science of the Soul) is an important textbook drawing on the latest evidence in the sub-disciplines of psychology to provide a balanced and comprehensive view of human nature, behaviour and experience. Its foundation to develop theories about human nature is based upon the writings of Muslim scholars and contemporary research findings. This book is a core text on Islamic psychology for undergraduate and post-graduate students and those undertaking continuing professional development in Islamic psychology, psychotherapy and counselling. Beyond this, it is also a good supporting resource for teachers and lecturers in this field.

Essentials of Job Attitudes and Other Workplace Psychological Constructs

Edited by **Valerie I. Sessa, Nathan A. Bowling**

Series: *Essentials of Industrial and Organizational Psychology*

Although the topic of job attitudes and other workplace psychological constructs such as perceptions, identity, bonds, and motivational states is important, there are no books addressing the topic as a whole; *Essentials of Job Attitudes and Other Workplace Psychological Constructs* seeks to fill that void in a comprehensive edited volume that compiles chapters by experts on each construct. This is an ideal text for students and professionals in industrial and organizational psychology, organizational behavior, and human resource management.

2ND EDITION

Snapshots of Great Leadership

Jon P. Howell, Isaac Wanasika

Series: Leadership: Research and Practice

Snapshots of Great Leadership describes leaders who have either accomplished amazing feats or brought destruction. Although the goals of these individuals were often quite different, the leadership processes they used were frequently similar. The opening chapter explains the latest theories of leadership. Each leader snapshot adds an important "reality check" to the theories and models described in most introductory leadership textbooks, making this a key text for students taking leadership courses. This new edition features additional women and international leaders, a new "You Decide" section, and a Conclusion that clarifies the differences between good and bad leaders.

Autism Spectrum Disorder in the Criminal Justice System

A Guide to Understanding Suspects, Defendants and Offenders with Autism

Dr Clare S. Allely

This book focuses on autism spectrum disorder (ASD) in the criminal justice system. Rather than being the perpetrators of offending, individuals with ASD are more likely to be the victim of crime. However, there is nevertheless a small subset of individuals with ASD who do offend, and this book provides an in-depth understanding of how certain features of ASD may provide the context of vulnerability to engaging in a number of types of offending behaviours. This book is ideal for criminal defense lawyers and practitioners in psychology, psychiatry, and social work as well as policy makers and reformers.

Becoming a Forensic Psychologist

David DeMatteo, Jaymes Fairfax-Columbo, Alisha Desai

This book provides a clear understanding of the specialized skill set that forensic psychologists possess, and the job contexts in which forensic psychologists use those skills, as well as a straightforward blueprint and options for becoming a forensic psychologist. The book also features sidebars that highlight key court decisions in forensic psychology and define key terms in forensic psychology to further highlight the specialized skill set that forensic psychologists possess. Additional sidebars provide brief career profiles of notable forensic psychologists to give readers a sense of the varied careers that forensic psychologists can pursue.

Case Studies in Forensic Psychology

Clinical Assessment and Treatment

Edited by Ruth Tully, Jennifer Bamford

This fascinating text gives insights and reflections from practising forensic psychologists working with a range of different offender populations. Covering issues around personality disorder, psychopathy, learning disability and those at risk of offending, the cases include both assessment for legal purposes and clinical treatment, using a range of treatment models. Ideally suited for any student of forensic psychology, clinical psychology or criminology, each case is contextualised with a discussion of the broader issues involved alongside a focus on 'what works'. The book will also appeal to practitioners in this rapidly expanding field.

Challenging Bias in Forensic Psychological Assessment and Testing

Theoretical and Practical Approaches to Working with Diverse Populations

Edited by Glenda C. Liell, Martin J. Fisher, Lawrence F. Jones

Series: Issues in Forensic Psychology

Challenging Bias in Forensic Psychological Assessment and Testing is a ground-breaking work that addresses the biases and inequalities within the field of forensic psychology. It gives valuable insights into individuals practices and wider criminal justice approaches at an international level, while providing tangible solutions to tackle the disparities. It's a must read for professionals working in criminal justice, forensic psychology, legal psychology and related fields. It is also a compelling resource for students and researchers of forensic psychology with particular interest in social diversity and inclusion.

Black Matters

African American and African College Students and Graduates Tell Their Life Stories

Edited by **Andrew Garrod, Robert Kilkenny**

Black Matters presents an anthology of stories of African American and African undergraduate and graduate students' experiences at college, offering lifespan perspectives on their formative relationships and influences, life-changing events, and the role their heritage has played in shaping their personal identities. The rich narratives in this text provide insight into the relationship between collegiate experiences and racial identities. It will be essential reading for students and scholars of psychology, education, cultural anthropology, sociology and creative writing, and for those responsible for campus climate and student experience.

Socialisation During the Life Course

Klaus Hurrelmann, Ullrich Bauer

This comprehensive text highlights new developments in sociological, educational and psychological aspects of socialisation, examining how human beings as "subjects" – experiencing, thinking and acting individuals – confront the material, social and cultural "objects" of their environment and sustain their position. The authors provide an overview of the most important theories of socialisation, then integrate these using the Productive Processing of Reality (PPR) model. This novel approach is applied to a life course analysis, examining developmental tasks and the challenges of productive processing of the internal and external reality at various stages of development.

Internet Psychology

The Basics

Yair Amichai-Hamburger

Series: The Basics

We can't imagine our lives without the Internet. It is the tool of our existence; without it we couldn't work, plan our social and leisure activities and interact with friends. The internet's influence on contemporary society extends across every aspect of our personal and professional lives, but how has this altered us in psychological terms? How are we to understand how the internet can promote enormous amounts of caring and kindness to strangers and yet be the source of unremitting acts of terror? *Internet Psychology: The Basics* is a vital and fascinating guide to the online world, drawing on classic theories of human behaviour to shed fresh light on this central facet of modern life.

The Psychology of Social Media

Ciarán Mc Mahon

Series: The Psychology of Everything

The *Psychology of Social Media* will examine the core features of social media services – profiles, newsfeeds, connections, media and so on – and explain the psychological aspects of how they are used. The book will draw on groundbreaking modern research programmes in addition to long-standing scholarship, in order to blend these very new technologies with the ancient progress of humanity. This is the ideal introductory resource for students on cyberpsychology courses, as well as general readers interested in this topic.

The Science and Best Practices of Behavioral Safety

The Source for Reducing Injuries on the Front Line

Timothy D. Ludwig, Matthew M. Laske

This book presents the scientific principles and real-world best-practices of behavioral safety, one of the most mature and impactful applications of behavioral science to reduce injuries in industrial workplaces. The book is essential reading for safety professionals, process safety engineers, and leaders in companies who have implemented behavioral safety, are considering it, or as an aid to learning more about the scientific background behind effective and practical safety practices. Researchers, expert consultants, and students who are already familiar with the practice will also find the book a valuable source to further develop their expertise.

Coping with Chronic Illness

Theories, Issues and Lived Experiences

Silvia Bonino

This valuable book combines psychological theories of health with the lived experience of coping with chronic health conditions, focusing on the 'ill person' as an actor of their own development. It considers all aspects of living with illness, from issues that impact on everyday functioning such as pain and fatigue, to the rebuilding of identity and the building of therapeutic relationships. It is important reading for those living with chronic health conditions, as well as for healthcare professionals to gain awareness of the psychological issues that exist alongside living with illness. It is also relevant for postgraduate students of health psychology.

2ND EDITION

Father-Daughter Relationships

Contemporary Research and Issues

Linda Nielsen

Series: Textbooks in Family Studies

A new, fully updated edition of the first research based text to focus on father-daughter relationships, this provocative book examines factors that can strengthen or weaken these relationships. Compelling personal stories from fathers and daughters, including celebrities and politicians, bring the research to life. Controversial questions engage the reader and questionnaires demonstrate how to apply the research to one's life. How these relationships are denigrated in the media and in some mental health and legal systems, is examined along with the changing patterns of these relationships and behaviors that constitute good fathering.

Fathering in Cultural Contexts

Developmental and Clinical Issues

Jaipaul Roopnarine, Elif Dede Yildirim

Series: International Texts in Developmental Psychology

Fathering in Cultural Contexts brings together the most recent theory and research on fathering in diverse cultural communities. Exploring a range of disciplinary perspectives, fathering is considered within the major sociocultural, demographic and economic factors that influence men's involvement and their family relationships. The book highlights the changing nature of fathering, draws connections to child development and well-being, and discusses the efficacy of interventions with fathers. It will be essential reading for students in child development, family studies, psychology, education, anthropology, sociology and social work, and for professionals providing child and family services.

3RD EDITION

Handbook of Parenting

Volume 2: Biology and Ecology of Parenting, Third Edition

Edited by **Marc H. Bornstein**

This third edition of the Handbook of Parenting brings together an array of field-leading experts to understand many diverse aspects of parenting. Volume 2 relates parenting to its biological roots and sets it in its ecological framework. Part I, on the Biology of Parenting, examines the evolution of parenting and non-human parenting, as well as the biological bases of human parenting. A deep understanding of parenting also depends on the ecologies in which it takes place. Part II, on the Ecology of Parenting, examines ancient and modern histories of parenting as well as various social factors to provide an overarching relational developmental contextual systems perspective.

Parenting Across Cultures from Childhood to Adolescence

Development in Nine Countries

Edited by **Jennifer E. Lansford, W. Andrew Rothenberg, Marc H. Bornstein**

Series: *Studies in Parenting Series*

This vital volume advances understanding of how parenting changes or remains the same from childhood to adolescence in diverse cultural contexts. Revealing the Parenting Across Cultures project, it analyses annual interviews with parents and children in nine countries. It offers insight into trajectories of parenting, exploring parents' warmth, control, setting rules, and knowledge of children's activities and whereabouts. Expert authors based in the countries examined, provide researchers and students of psychology, human development, family studies, sociology, and cultural anthropology, as well as professionals working with families, with a truly global understanding of parenting.

Transforming Early Head Start Home Visiting

A Family Life Education Approach

Bridget A. Walsh, Jennifer A. Mortensen

Research on home visiting shows that Early Head Start (EHS) programs benefit from additional training and resources that streamline philosophy and content. The authors propose that alignment with Family Life Education's (FLE) strengths-based methodology brings more consistency through a model of prevention, education, and collaboration with families. This text is the first to outline a partnership between FLE and EHS home visiting. It explores a qualitative study of FLE integrated in a current EHS program and application of FLE methodology to home visiting topics.

Personality Psychology

The Basics

Stanley Gaines Jr.

Series: The Basics

This new 'Basics' of personality psychology provides an overview of the discipline in a jargon free and accessible manner. It offers a brief history of the topic area, and covers a range of perspectives on personality including psychodynamic, behaviourist, humanistic, and cognitive approaches. The author examines the fundamental principles of personality psychology in a rigorous way, and outlines the future of the area in relation to cutting edge research and potential future trends. Exploring major personality theories that seek to explain why people behave as they do, this is the essential introduction for students who are approaching personality psychology for the first time.

Human Resources for the Non-HR Manager

Carol T. Kulik, Elissa L. Perry

This book gives access to cutting-edge research and evidence-based recommendations to help managers approach their people management responsibilities with confidence. It describes managers' responsibilities across the entire employee lifecycle. Grounded in rigorous academic research but with a conversational tone, it conveys basic principles without technical jargon. Each chapter includes Manager's Checkpoints to help readers apply the material to their own workplace, and Manager's Knots that address gray areas inherent in people management. It is essential reading for anyone working as a line manager or aspiring to a managerial role wanting to improve their people management skills.

The Psychology of Democracy

Darren G. Lilleker, Billur Aslan Ozgul

Series: The Psychology of Everything

This book explains the psychological underpinnings behind why people engage with and participate in politics. Covering the influence that political campaigns and media play, it analyses real-world political events including the Trump administration, Brexit, the Arab Spring, and Gezi Park, taking the reader on a journey from engagement with a political news item all the way through to taking to the streets to protest government policy and action. In an age of post-truth and populism, this book shows us how a strong democracy depends upon the feelings and emotions of its citizens, from trust, belonging, empowerment and representation, as much as on electoral processes.

The Psychology of Politics

Barry Richards

Series: The Psychology of Everything

This accessible book examines key psychological ideas in relation to contemporary politics. It shows how the emotions which underpin everyday life are also vital in what happens on the political stage and draws on psychoanalytic ideas to explore how our societies and cultures are changing. Topics such as leaders, conflicts, democracies, and ideologies are analysed in relation to psychological theories, and the author demonstrates how fear and passion shapes the political sphere. This is the ideal introductory resource for students on a range of courses who are exploring politics in relation to psychology, as well as general readers interested in this topic.

Positive Health

100+ Research-based Positive Psychology and Lifestyle Medicine Tools to Enhance Your Wellbeing

Jolanta Burke, Pádraic J. Dunne, Trudy Meehan, Ciaran A. O'Boyle, Christian van Nieuwerburgh

This comprehensive compendium offers a wealth of evidence-based tools that can boost both physical and mental wellbeing throughout the lifespan. Filled with over 100 activities to help you live a good life, this book is the first of its kind to integrate the latest research from the fields of positive psychology and lifestyle medicine. Striking an expert balance between theory and practice, the book first reviews what is known about positive psychology and health, presenting a new approach to holistic well-being. It then goes on to provide 100+ tools designed to increase physical, mental and social health and well-being, and also to decrease the risk of illness and disease.

2ND EDITION

Positive Psychological Science

Improving Everyday Life, Well-Being, Work, Education, and Societies Across the Globe

Edited by Stewart I. Donaldson, Mihaly Csikszentmihalyi, Jeanne Nakamura

Series: Applied Psychology Series

Positive psychological science has experienced extraordinary growth over the past two decades. Contributions from luminaries in the field provide excellent reviews of the selected topics, summarizing empirical evidence, describing measurement tools, and offering recommendations for improving several aspects of life.

3RD EDITION

Positive Psychology

The Science of Wellbeing and Human Strengths

Alan Carr

The third edition of Positive Psychology is an accessible introduction to this rapidly growing field. This new edition has been completely updated to take account of the exponential growth of research in the field. It will prove a valuable resource for students and faculty in psychology and related disciplines including social work, nursing, teaching, counselling, and psychotherapy. This edition also provides access to online teaching resources.

4TH EDITION

Principles and Methods of Social Research

William D. Crano, Marilyn B. Brewer, Andrew Lac

Through a multi-methodology approach, *Principles and Methods of Social Research*, Fourth Edition covers the latest research techniques and designs and guides readers toward the design and conduct of social research from the ground up. Applauded for its comprehensive coverage, the breadth and depth of content of this new edition is unparalleled. It is intended for graduate or advanced undergraduate courses in research methods in psychology, communication, sociology, education, public health, and marketing, and further appeals to researchers in various fields of social research, such as social psychology and communication.

3RD EDITION

An Introduction to Psychological Tests and Scales

Kate Miriam Loewenthal, Christopher Alan Lewis

Fully revised and updated, the third edition provides a clear, concise and jargon-free primer for all those embarking in fieldwork or research analysis or who wish to investigate new areas requiring psychometric assessment, providing user-friendly instructions on applying the most appropriate statistics, and suggesting the most relevant websites and books. It continues to be an invaluable tool for undergraduates and postgraduates in psychology and the social sciences. It will also be equally useful to professionals in business, management and related disciplines who wish to develop tests and other instruments for selection and survey.

Improving Survey Methods

Lessons from Recent Research

Edited by **Uwe Engel, Ben Jann, Peter Lynn, Annette Scherpenzeel, Patrick Sturgis**

Series: European Association of Methodology Series

This book reviews the latest statistical and methodological research on survey research techniques to help improve the reliability of survey generated data. The various methods studied are reviewed along with the resulting empirical evidence and insights gained from the results. The evidence is based on field- or quasi-experimental research, observational or simulation studies or a combination thereof. The book examines: survey modes and response effects, interviewers and survey error, asking sensitive questions, conducting web surveys and access panels, coping with non-response, and handling missing data. This book is ideal for students or professionals who employ survey research methods.

Designing and Implementing Effective Evaluations

Comprehensive Case Studies in Program Evaluation

Edited by **Kenneth J. Linfield, Steven Kniffley**

Designing and Implementing Effective Evaluations provides extensive real-life examples of program evaluations that illustrate the various elements and steps in conducting a successful evaluation. The detailed and diverse range of case studies show the common elements, methods, approaches, and processes of program evaluations, while also demonstrating the way that good evaluators adapt and tailor those methods to the specific characteristics and needs of a given program. The text is a vital resource for postgraduate students in program evaluation courses in Psychology, Education, Public Health, Social Work and related fields.

International Handbook of Survey Methodology

Edited by **Edith D. de Leeuw, Joop Hox, Don Dillman**

Series: European Association of Methodology Series

This Handbook reviews the methodological and statistical issues in designing and analyzing surveys with contributions from leading methodologists. Featuring examples from a variety of countries, the book examines: the foundations of survey design, including sources of error and ethical issues; designing surveys with tips on writing questions for multiple methods; and challenges involved in mixing these modes within one survey. Intended for advanced students and researchers in the behavioral, social, and health sciences, the book also serves as a text for graduate level courses on survey methodology. Selected Contents: The Cornerstones of Survey Research. The Psychology of Asking Questions. Ethical Issues in Surveys. Design.

Educational and Psychological Measurement

W. Holmes Finch, Brian F. French

This text provides the most current coverage of measurement and psychometrics in a single volume. W. Holmes Finch and Brian F. French first review the basics of psychometrics and measurement, before moving on to more complex topics such as equating and scaling, item response theory, standard setting, and computer adaptive testing. Also included are discussions of cutting-edge topics utilized by practitioners in the field, such as automated test development, game based assessment, and automated test scoring. This book is ideal for use as a primary text for graduate-level psychometrics/measurement courses, and for researchers in need of a broad resource for understanding test theory.

2ND EDITION

Introduction to Theory-Driven Program Evaluation

Culturally Responsive and Strengths-Focused Applications

Stewart I. Donaldson

Introduction to Theory-Drive Programming provides a clear guide for practicing evaluation science, and numerous examples of how these evaluations actually unfold in contemporary practice. A special emphasis is placed how to conduct theory-program evaluations that are culturally responsive and strengths-focused. The volume is of significant value to practicing evaluators, professors of introductory evaluation courses and their students, advanced undergraduate and graduate students, and serves as a text or a supplementary text for a wide range of evaluation and applied research courses.

3RD EDITION

Measurement Theory in Action

Case Studies and Exercises

**Kenneth S Shultz, David Whitney, Michael J. Zickar**

This book helps readers apply testing and measurement theories and features 22 self-contained modules which instructors can match to their courses. Each module features an overview of a measurement issue and a step-by-step application of that theory. Best Practices provide recommendations for ensuring the appropriate application of the theory. Practical Questions help students assess their understanding of the topic. Students can apply the material using real data in the Exercises, some of which require no computer access, while others involve the use of statistical software to solve the problem.

9TH EDITION

Program Evaluation

Methods and Case Studies

**Kenneth J. Linfield, Emil J. Posavac**

This text provides a solid foundation in program evaluation, covering the main components of evaluating agencies and their programs, how best to address those components, and the procedures to follow when conducting evaluations. Different models and approaches are paired with practical techniques, such as how to plan an interview to collect qualitative data and how to use statistical analyses to report results. This edition also offers expanded case studies, making them a central organizing theme, and more global examples. New eResources include a table of evaluation models, program evaluation report examples, and a bounty of annotated resources.

Modern Psychometrics

The Science of Psychological Assessment

**John Rust, Michal Kosinski, David Stillwell**

This popular text introduces the reader to all aspects of psychometric assessment, including its history, how to construct and administer traditional tests and the latest techniques for psychometric assessment online. Modern Psychometrics combines an up to date scientific approach with full consideration of the political and ethical issues involved in the implementation of psychometrics testing in today's society. It will be invaluable to both undergraduate and postgraduate students as well as practitioners who are seeking an introduction to modern psychometric methods.

Network Psychometrics with R

A Guide for Behavioral and Social Scientists

**Edited by Adela-Maria Isvoranu, Sacha Epskamp, Lourens Waldorp, Denny Borsboom**

A systematic, innovative introduction to the field of network analysis, *Network Psychometrics with R: A Guide for Behavioral and Social Scientists* provides a comprehensive overview of and guide to both the theoretical foundations of network psychometrics as well as modelling techniques developed from this perspective. Written by pioneers in the field, this textbook showcases cutting-edge methods in an easily accessible format, accompanied by problem sets and code. It is ideal for instructors and students of undergraduate and graduate level courses and workshops in the field of network psychometrics as well as established researchers looking to master new methods.

D-scoring Method of Measurement

Classical and Latent Frameworks

Dimitar Dimitrov

Series: Quantitative Methodology Series

D-scoring Method of Measurement presents a unified framework of classical and latent measurement referred to as D-scoring method of measurement (DSM). Provided are detailed descriptions of DSM procedures and illustrative examples of how to apply the DSM in various scenarios of measurement. The DSM is designed to combine merits of the traditional CTT and IRT for the purpose of transparency, ease of interpretations, computational simplicity of test scoring and scaling, and practical efficiency, particularly in large-scale assessments.

3RD EDITION

The Psychology of Advertising

Bob M Fennis, Wolfgang Stroebe

The Psychology of Advertising offers a comprehensive exploration of theory and research in (consumer) psychology on how advertising impacts the thoughts, emotions, and actions of consumers. It links psychological theories and empirical research findings to real-life industry examples, showing how scientific research can inform marketing practice. Including a glossary of key concepts, updated examples, and illustrations, this is a unique and invaluable resource for advanced undergraduate and graduate students and instructors. Suitable for psychology, advertising, marketing, and media courses.

3RD EDITION

The Social Psychology of Aggression

3rd Edition

**Barbara Krahé**

This book offers a comprehensive introduction to the social psychology of aggression, covering the major theories, situational factors, and applied contexts it is relevant to. It addresses a range of sub-topics, including the individual and situational factors that cause or precipitate aggression, and the different forms of aggressive behaviour in a wide range of social domains. The new edition will be updated to include additional coverage of gender differences and terrorism, to reflect the latest research developments in the field. This is essential reading for students and researchers in psychology and related disciplines, as well as practitioners such as policy makers.

Routledge

2ND EDITION

Psychology of Emotion

Paula M. Niedenthal, François Ric

This textbook reviews fundamental issues in the definition and measurement of emotion, including: conscious and unconscious processes; how emotions arise in, and are constrained by, social processes; the regulation of emotion; and the manner in which culture shapes some of these processes. Throughout, both biology and social situation are treated as important forces in the elicitation and the experience of emotion. The 2nd Edition includes greater coverage of neuroscientific approaches and a new chapter devoted to the brain. There is also a new chapter on happiness. With a more developed set of pedagogical features, this revised edition may be used as a primary text on courses on Emotion.

Gender

Psychological Perspectives

**Linda Brannon**

This fully updated and revised 8th edition examines the behavioral, biological, and social context in which people express gendered behaviors, utilizing the latest research to help students think critically about research findings and stereotypes, and provoking them to examine and revise their own preconceptions. Intended for undergraduate or graduate courses on the psychology of gender, psychology of sex, gender issues, women in society, and women's or men's studies, this book is also applicable to sociology and anthropology courses on diversity.

Sex and Gender

A Biopsychological Approach

**Heidi R. Riggio**

Using both scientific and feminist approaches in its analysis, Sex and Gender: A Biopsychological Approach is essential for instructors hoping to offer a thorough and complex investigation of sex and gender studies to their classrooms. The focus on biological, psychological, and social processes—as separate entities and interacting processes—make Sex and Gender particularly crucial for a comprehensive and evolved understanding of the subject. The bonus features, which can be used as discussion topics, student essay topics, or special topics, are intended to transfer the information to the classroom and will be especially valuable to students and teachers alike.

The Psychology of Gender**Gary Wood**Series: *The Psychology of Everything*

The Psychology of Gender offers a concise and accessible introduction to the psychology of gender by drawing on biological, historical and cultural perspectives to consider the impact of gender roles on the individual, relationships and society in general. Topics covered include gender roles, sex differences, gender stereotypes, transgender and cisgender identities, and androgyny. The book is a cross-discipline review that offers a complete psychology of gender and addresses the 'dilemmas' we have regarding gender in a post-modern world. This is the ideal introductory resource for students on a range of courses who are starting to explore gender, and general readers interested in this topic.

Women's Lives

A Psychological Exploration

**Claire A. Etaugh, Judith S. Bridges**

Women's Lives integrates the most current research and social issues to explore the psychological diversity of girls and women varying in age, ethnicity, social class, nationality, immigrant experience, sexual orientation, gender identity, ableness and body size and shape. The text embeds a lifespan perspective within each topical chapter and has an intersectional approach that integrates women's diverse identities. It includes rich coverage of women with disabilities and on middle-aged and older women throughout. Taking a deeper transnational focus, it also examines the impact of social, cultural, and economic factors in shaping women's lives around the world.

The Psychology of Sex

Meg John Barker

Series: The Psychology of Everything

The Psychology of Sex plugs the gap between conventional wisdom about sex and what we know about sex and sexuality from academic research in this area. It draws on psychology in its broadest sense, arguing that for a complete understanding of sex we need to study the history of human sexual behaviour, and the social context in which it happens, as well as considering individual human experience and the way the body and brain work. The book looks at some of the most common myths about sex and sexuality - e.g. surrounding sexual identity, sex drive, sex addiction, "normal" and "abnormal" sex - and shows how recent research can help the way we think about all these things.

2ND EDITION

Talking the Talk

Language, Psychology and Science

Trevor A. Harley

This book provides an accessible and comprehensive introduction to psycholinguistics, which is the study of the psychological processes involved in language. It shows how it's possible to study language experimentally, and how psychologists use these experiments to build models of language processing. Structured around questions that people often ask about language, the emphasis of Talking the Talk is on how scientific knowledge can be applied to practical problems. It also stresses how language is related to other aspects of psychology, particularly in whether animals can learn language, and the relation between language and thought.

4TH EDITION

The Psychology of Language

From Data to Theory

Trevor A. Harley

"I want this book for me, not just for my students. For the student, it's a thorough, but lively, introduction to language use in a wider context. For me, it's a valuable reminder of psycholinguistics's evolution from its concerns with the psychological reality of grammar, to its current spot at the center of modern cognitive neuroscience." - Gary S. Dell, University of Illinois at Urbana-Champaign This revised edition of the popular textbook provides a comprehensive introduction to the psychology of language for undergraduates, postgraduates, and researchers. It contains everything the student needs to know about how we acquire, understand, produce, and store language.

2ND EDITION

Psychology of Music

From Sound to Significance

Siu-Lan Tan, Peter Pfordresher, Rom Harré

This thoroughly revised new edition of *The Psychology of Music* combines a comprehensive summary with critical assessments of existing research. The contents range from basic-level perception to broader socio-cultural issues, capturing the interdisciplinary breadth of the field while covering the central topics in depth. For the new edition, the authors have expanded coverage to include non-classical forms of music, added more real-world connections, and included a new chapter on practical applications. The text will be invaluable to students in the area and anyone else interested in the psychology of music.

Psychology of Music

Susan Hallam

Series: The Psychology of Everything

This book covers key concepts relating to the psychology of music including the evolutionary purpose of music, the processing of music, musical ability, and musical skills. It also examines the impact music has on everyday life and on health and well-being, and the benefits of music to intellectual functioning. It covers the way in which music enriches humanity, how it relates to religion and spirituality, and how it used to enhance and manipulate people. This is the ideal introductory resource for students on a range of courses who are exploring music in relation to psychology, as well as general readers interested in this topic.

The Psychology of Religion

Vassilis Saroglou

Series: The Psychology of Everything

Written by a leading expert in the field, this accessible introduction to the psychology of religion explores the causes, characteristics, and consequences of religion in all its forms. The author examines belief systems relating to atheism, spirituality, fundamentalism, and different religious faiths, in relation to psychological ideas including attitudes and behaviour, individual differences, and evolution. It is the ideal introduction for students and general readers alike, with an interest in the psychology of religion, spirituality, and secularism.

2ND EDITION

An Introduction to Psychometrics and Psychological Assessment

Using, Interpreting and Developing Tests

**Colin Cooper**

The successor to Cooper's prize-winning book shows how psychological questionnaires and tests can be chosen, administered, scored, interpreted and developed. An evaluative guide to choosing, using, interpreting and developing tests, it provides readers a thorough grasp of the principles (and limitations) of testing, together with the necessary methodological detail. The book is written for students studying psychological assessment or psychometrics, and for researchers and practitioners who use questionnaires to measure personality, cognitive abilities, educational attainment, or mood.

3RD EDITION

Psychopharmacology

**R. H. Ettinger**

This new edition of Psychopharmacology provides a comprehensive scientific study of the effects of drugs on the mind and behaviour. With the growing prevalence of psychiatric and behavioral disorders and the rapid advances in the development of new drug therapies, this textbook offers an essential understanding of the necessary details of drug action. Accompanied by a robust companion website of instructor materials, this textbook is ideal for undergraduate and pre-professional students on courses in Psychopharmacology, Clinical Psychopharmacology, Drugs and Behavior.

A Step-by-Step Guide to Qualitative Data Coding

Philip Adu

This book provides an easy-to-follow, step-by-step guide to those new to qualitative data coding, through the use of specific, worked examples. It covers creating codes, developing categories and themes, and determining the connections amongst them. It shows how to conduct manual coding using Microsoft Word, Excel and CAQDAS using NVivo. At the end of the coding process, it details how to present findings in such a way that readers understand the characteristics of participants, how the data was coded, and how the themes and their respective meaning and supporting evidence are presented.

How Qualitative Data Analysis Happens

Moving Beyond "Themes Emerged"

Edited by **Áine M. Humble, M. Elise Radina**

This volume offers an in-depth look into how qualitative social science researchers approach their data analysis. It moves beyond the usual vague statement of "themes emerged from the data" to show readers how researchers actively and consciously arrive at their themes, revealing the complexity of making sense of thousands of pages of interview data, multiple data sources, and diverse types of data (observations, interviews, photos, diary entries). The book focuses on a diversity of topics in family research and on different methodologies, but its findings provide an invaluable resource for experienced and novice qualitative researchers throughout the social sciences.

Qualitative Analysis Using ATLAS.ti

The Five-Level QDA™ Method

Nicholas H. Woolf, Christina Silver

Series: Developing Qualitative Inquiry

The method of Five-Level QDA® helps researchers to analyse what makes for an expert analytic performance when using qualitative data analysis software. By instituting powerful use of their chosen software, researchers learn to consciously distinguish, and translate between their analytic strategies (what you plan to do) and their software tactics (how you plan to do it). Written by experienced trainers, this practical guide to Atlas.ti, with accompanying video tutorials and online learning materials, will allow qualitative researchers at all levels to become more efficient users, and increase the effectiveness of their data analysis.

2ND EDITION

R Data Analysis without Programming

Explanation and Interpretation

David W. Gerbing

The new edition of this innovative book, prepares the readers to quickly analyse data and interpret statistical results using R. Professor Gerbing has developed lessR, which is a ground-breaking method in alleviating the challenges of R programming. The lessR extends R, removing the need for programming. This edition expands upon the first edition's introduction to R through lessR which enables the readers to learn how to organize data for analysis, read the data into R, and generate output without performing numerous functions and programming exercises first.

Hermeneutic Approaches to Interpretive Research

Dissertations In a Different Key

Edited by **Philip Cushman**

Series: Advances in Theoretical and Philosophical Psychology

This unique and insightful book brings together a collection of impactful essays written by former psychology doctoral students that feature hermeneutics as a method of qualitative inquiry. This is an illuminating reading for graduate students and scholars curious about the hermeneutic approach to research, particularly those engaged in fields like theoretical psychology, clinical psychology, psychotherapy, mental health, cultural history, and social work.

Quantitative Psychological Research

The Complete Student's Companion

**David Clark-Carter**

Quantitative Psychological Research: The Complete Student's Companion, expertly guides the reader through all the stages involved in undertaking quantitative psychological research: designing a study, choosing a sample of people, undertaking the study, analysing the data, and reporting the research. This is a must read for professional psychologists as well as students and researchers of Psychology, Statistics and Research Methods. This book is also invaluable for anyone interested in conducting quantitative psychological research.

A Beginner's Guide to Structural Equation Modeling

Tiffany A. Whittaker, Randall E. Schumacker

A Beginner's Guide to Structural Equation Modeling, fifth edition, has been redesigned with consideration of a true beginner in structural equation modeling (SEM) in mind. The book covers introductory through intermediate topics in SEM in more detail than in any previous edition. This book is intended for true beginners in structural equation modeling and is designed for introductory graduate courses in structural equation modeling taught in psychology, education, business, and the social and healthcare sciences. This book also appeals to researchers and faculty in various disciplines. Prerequisites include correlation and regression methods.

4TH EDITION

An Introduction to Statistical Concepts

Debbie L. Hahs-Vaughn, Richard Lomax

This comprehensive, flexible text is used in both one- and two-semester courses to review introductory through intermediate statistics. Instructors select the topics that are most appropriate for their course. Its conceptual approach helps students more easily understand the concepts and interpret SPSS and research results. Noted for its crystal clear explanations, key concepts are simply stated and occasionally reintroduced and related to one another for reinforcement. Numerous examples demonstrate their relevance. This edition features even more explanation to increase understanding of the concepts and has annotated script for using R.

Applied Structural Equation Modeling using AMOS

Basic to Advanced Techniques

Joel Collier

An integral guide for postgraduates and researchers on how to forge a strong methodology while studying their respective phenomenon of interest. Cutting out any abstract definitions and highlighting current best practices heavily prevalent in psychology literature, Collier tackles advanced topics in an accessible and engaging manner. He provides step-by-step instructions on how to run analyses, highlights where the important results are in the output, and shows how to clearly present final results.

3RD EDITION

Intermediate Statistics

A Modern Approach, Third Edition

**James P. Stevens**

This third edition of the best selling text focuses on a conceptual understanding of the material rather than on proving the results. Definitional formulas are used on small data sets to provide conceptual insight into what is being measured. The assumptions underlying each analysis are emphasized, and the reader is shown how to test the critical assumptions using SPSS or SAS. Printouts with annotations from SAS or SPSS show how to process the data for each analysis. The annotations highlight what the numbers mean and how to interpret the results. Numerical, conceptual, and computer exercises enhance understanding.

3RD EDITION

Learning From Data

An Introduction To Statistical Reasoning

**Arthur Glenberg, Matthew Andrzejewski**

Learning from Data reviews the basics of statistical reasoning to help students understand psychological data that affect their lives. To facilitate learning the authors devote extra attention to explaining the difficult concepts, use repetition to enhance memory, and illustrate concepts with numerous examples. A six-step procedure helps students apply all statistical tests, from simple to complex. The authors emphasize how to choose the best statistical procedure in the text, the examples, and the problems. A chapter on power and an emphasis on power analyses procedures throughout, further differentiate the book. Intended for undergraduate or graduate statistics courses in psychology, education, and other applied social and health sciences, the new edition emphasizes Excel and features two real data sets on the book CD, many new exercises, and an Instructor's Resource CD.

9TH EDITION

Interpreting Basic Statistics

A Workbook Based on Excerpts from Journal Articles

**Zealure C. Holcomb, Keith S. Cox, Zealure C. Holcomb**

Interpreting Basic Statistics gives students valuable practice in interpreting statistical reporting as it actually appears in peer-reviewed journals. The questions in each exercise are divided into two parts: (1) Factual Questions and (2) Questions for Discussion. The factual questions require careful reading for details, while the discussion questions show that interpreting statistics is more than a mathematical exercise. Each exercise covers a limited number of topics, making it easy to coordinate the exercises with lectures or a traditional statistics textbook.

* For full contents and more information, visit: www.routledge.com/9780367561970**Presenting Your Data with SPSS Explained****Perry R. Hinton, Isabella McMurray**

This introductory guide provides a clear detailed explanation of how to present data in tables and graphs using the popular software application SPSS. Using practical examples the book is simple to use for students and professionals who have collected data for a dissertation, project, or any other type of research-related exercise. No assumptions are made about the statistical or IT knowledge of the reader. The book is specifically written for students and researchers in a range of disciplines who have had little or no training in statistics but who still need to present their data clearly. Hints and tricks, FAQs, hundreds of colour screenshots, and online datasets complete the package.

Statistical Concepts - A First Course

**Debbie L. Hahs-Vaughn**

Statistical Concepts: A First Course presents the introductory chapters from An Introduction to Statistical Concepts, 4th Edition, designed for first and lower level statistics courses. The chapters review descriptive statistics including ways of representing data graphically, statistical measures, the normal distribution, and probability and sampling. This textbook contains a wide spectrum of useful features, such as conceptual, computational, and interpretative problems that ask students to critique actual studies, critical thinking problems, and templates for writing research questions.

3RD EDITION

Statistics Explained

**Perry R. Hinton**

Statistics Explained is an accessible introduction to statistical concepts and ideas. It makes few assumptions about the reader's statistical knowledge, carefully explaining each step of the analysis and the logic behind it. This fully updated edition includes developments in statistical analysis, with new sections explaining concepts such as bootstrapping and structural equation modelling, and a new chapter 'Samples and Statistical Inference'. The straightforward style of the text makes it accessible to those new to statistics, as well as more experienced students requiring a concise guide. Presented in full colour and with an updated, reader-friendly layout, this new edition also comes with a companion website featuring supplementary resources for students.

5TH EDITION

Statistics in Plain English

**Timothy C. Urdan**

Statistics in Plain English is a straightforward, conversational introduction to statistics that delivers exactly what its title promises. Each chapter begins with a brief overview of a statistic that describes what the statistic does and when to use it, followed by a detailed step-by-step explanation of how the statistic works and exactly what information it provides. Chapters also include an example of the statistic (or statistics) in use in real-world research, "Worked Examples," "Writing It Up" sections that demonstrate how to write about each statistic, "Wrapping Up and Looking Forward" sections, and practice work problems.

Routledge

6TH EDITION

Success at Statistics

A Worktext with Humor

**Fred Pyrczak**

Divided into 67 short sections, this text allows instructors to assign only those sections needed to meet the goals of the course. Humorous riddles allow students to check their work without providing the answers; if the answer to a riddle makes sense, then students know they have answered all questions in an exercise correctly. All major statistics typically introduced in a first-semester course are covered. Contains material on effect size, which provides technical solutions to issues raised earlier in the book (such as the limitations of inferential statistics).

2ND EDITION

R Data Analysis without Programming

Explanation and Interpretation

David W. Gerbing

The new edition of this innovative book, prepares the readers to quickly analyse data and interpret statistical results using R. Professor Gerbing has developed lessR, which is a ground-breaking method in alleviating the challenges of R programming. The lessR extends R, removing the need for programming. This edition expands upon the first edition's introduction to R through lessR which enables the readers to learn how to organize data for analysis, read the data into R, and generate output without performing numerous functions and programming exercises first.

Close Relationships

Pamela C. Regan

Introducing the concepts, methodologies, theories, and empirical findings of interpersonal relationships drawn from psychology, communication, sociology, philosophy, and religion, this engaging book will appeal to anyone interested in learning more about romantic relationships as well as relationships with friends and family. Numerous examples demonstrate how the material is relevant to the readers. Active learning is encouraged throughout including measurement instruments that readers can take and score themselves. The book reviews relationship experiences from all age groups, for all relationship types, and from a variety of cultures and the latest research on "cyber-flirting," sex differences in jealousy, the neurochemistry of love, and bullying.

Handbook of Ethics in Quantitative Methodology

Edited by **A. T. Panter**

Series: Multivariate Applications Series

This Handbook is the first to provide a practical, interdisciplinary review of ethical issues as they relate to quantitative methodology including how to present evidence for reliability and validity, what comprises an adequate tested population, and what constitutes scientific knowledge for eliminating biases. The book emphasizes the human cost of quantitative decision making to help researchers understand the implications of their choices. The chapter order parallels the chronology of the research process: determining the research design; data analysis; and communicating findings. Each chapter: explores the ethics of the topic; identifies methodological issues; reviews strategies for handling such issues and their ethical implications; provides a case example; and outlines plausible approaches to the issue including best-practice solutions. This Handbook appeals to researchers and practitioners in psychology, health, education, sociology, political science, and business.

Educational and Psychological Measurement

W. Holmes Finch, Brian F. French

This text provides the most current coverage of measurement and psychometrics in a single volume. W. Holmes Finch and Brian F. French first review the basics of psychometrics and measurement, before moving on to more complex topics such as equating and scaling, item response theory, standard setting, and computer adaptive testing. Also included are discussions of cutting-edge topics utilized by practitioners in the field, such as automated test development, game based assessment, and automated test scoring. This book is ideal for use as a primary text for graduate-level psychometrics/measurement courses, and for researchers in need of a broad resource for understanding test theory.

4TH EDITION

Principles of Research in Behavioral Science

Fourth Edition

Mary Kite, Bernard E Whitley

This book provides a comprehensive overview of research methods in the behavioral sciences, focusing primarily on the conceptual issues inherent in conducting research. It covers topics that are often omitted from other texts, including measurement issues, correlational research, qualitative research, and integrative literature reviews. The book also includes discussions of diversity issues as they related to behavioral science research. New to this edition are chapter boxes that focus on applied issues related to each chapter topic. Throughout the book, readable examples and informative tables and figures are provided.

7TH EDITION

Research Methods and Statistics in Psychology

Hugh Coolican

Research Methods and Statistics in Psychology provides students with the most readable and comprehensive survey of research methods, statistical concepts and procedures in psychology today. Assuming no prior knowledge, this bestselling text takes you through every stage of your research project giving advice on planning and conducting studies, analysing data and writing up reports. The book provides clear coverage of statistical procedures, and includes everything needed from nominal level tests to multi-factorial ANOVA designs, multiple regression and log linear analysis.

4TH EDITION

Strategies and Tactics of Behavioral Research and Practice

James M. Johnston, Henry S. Pennypacker, Gina Green

Extensively revised to be more accessible and practical, this text features much more discussion of how research methods are relevant to today's practitioners, including many more examples that are based on field research and service delivery scenarios. Its comprehensive treatment of single-subject or within-subject design focuses on the strategic (the overall goal) and tactical (the methods and procedures) options available to investigators as they determine the most effective way to address research questions. Noted for its strong coverage of measurement, readers are encouraged to consider the rationale for different ways of measuring behavior and designing experimental comparisons.

2ND EDITION

Experiments With People

Revelations From Social Psychology, 2nd Edition

**Kurt P. Frey, Aiden P. Gregg**

This book showcases 28 intriguing social psychological experiments that have significantly advanced our understanding of human social thinking and behavior. Each chapter focuses on the details and implications of a single study, while citing related research and real-life examples along the way. All the chapters are fully self-contained, allowing them to be read in any order without loss of coherence. This 2nd Edition contains a number of new studies and, together with its lively, conversational tone, it makes an ideal text for courses in social psychology, introductory psychology, or research design.

3RD EDITION

Principles and Methods of Social Research

**William D. Crano, Marilyn B. Brewer, Andrew Lac**

This text presents recent advances in social research design and methodology including dyadic and group methods. It provides the necessary depth to prepare graduate/advanced undergraduate students to design, execute, and interpret various methodological approaches used in the social sciences. With a heavy emphasis on reliability, validity, and measurement, the book considers experimental, quasi-experimental, and survey research designs in light of these qualities. The new edition features expanded coverage of current issues and methodologies including mediation, moderation, and irt, many more learning tools, more explanation of the basic concepts, and a new instructor's resource package.

The Psychology of Belonging

Kelly-Ann Allen

Series: The Psychology of Everything

The Psychology of Belonging explores why feeling like we belong is so important throughout our lives, from childhood to old age, irrespective of culture, race, or geography. With its virtues and shortcomings, belonging to groups such as families, social groups, schools, workplaces, and communities, is fundamental to our identity and wellbeing, even in a time where technology has changed the way we connect with each other. In a world where loneliness and social isolation is on the rise, The Psychology of Belonging shows how meaningful connections can build a sense of belonging for all of us.

2ND EDITION

The New Psychology of Leadership

Identity, Influence and Power

S. Alexander Haslam, Stephen Reicher, Michael J. Platow

The result of over two decades of research inspired by social identity and self-categorization theories, this book is the perfect introduction to new theoretical and scientific insights into leadership being produced by social psychology. The authors explore the nature of group identity, the basis of authority and legitimacy, the dynamics of justice and fairness, the determinants of followership and charisma, and the practice and politics of leadership. Written in an accessible and engaging style, the book is suitable for students on courses including social psychology, organizational psychology, business and management, sociology, economics, and leadership studies.

6TH EDITION

Sensation and Perception

Hugh J. Foley

Sensation and Perception offers students a comprehensive overview of the psychology behind human senses, from skin senses such as touch to chemical senses such as taste and smell, to our complex visual and auditory sensory systems. Featuring strong pedagogy, abundant student-friendly examples, and an engaging conversational style, this book makes technical scientific information accessible to those who are beginning to specialize in cognitive psychology. In the sixth edition, new areas of coverage include multisensory integration, neural plasticity, and cognitive neuroscience, and new pedagogy and online resources further enhance the book.

Childhood Friendships and Peer Relations

Friends and Enemies

Barry Schneider

Series: International Texts in Developmental Psychology

Substantially revised and updated, this new edition provides a fascinating and timely overview of what we know about peer relationships in childhood. It provides an up-to-date and accessible overview of how children develop social competence in different environments, from school to cyberspace. The new edition is informed by new research techniques, both qualitative and quantitative, and provides increased coverage of cultural differences in peer relationships, and how bullying is perceived and managed within peer groups. It will be essential reading for students of developmental psychology and educational psychology, and anyone training for a career working with children and young people.

6TH EDITION

Development in Infancy

Martha E. Arterberry, Marc H. Bornstein

Development in Infancy reflects many new discoveries that have transformed our understanding of infants and their place in human development, with an emphasis on 21st century research. Organized topically, the book covers physical, perceptual, cognitive, language, and social development, in addition to describing theories of development, contexts of development, research methods, and implications of research in infancy for social policies and interventions. Key issues in infancy studies—those having to do with how nature and nurture transact and with interrelations among diverse domains of development—are woven throughout the book.

Multidisciplinary Perspectives on the Psychology of Exclusion

From Rejection to Personal and Social Harmony

Agnieszka Wilczyńska

This new volume considers one of the most pressing topics of a generation, the sense of social exclusion, rejection and loneliness experienced by many adolescents and young adults. It offers insights from psychological and biochemical research, explains the role of the brain, mind and body in the development of a sense of belonging over the lifespan. Illustrated with examples of the consequences of exclusion drawn from the author's clinical work, it surveys the latest research in the field and introduces an innovative framework for understanding the development of the sense of belonging.

New Perspectives on Moral Development

Edited by Charles C. Helwig

Series: Current Issues in Developmental Psychology

The contributors to this book provide an innovative and integrative approach to fundamental questions about the nature and acquisition of morality. In addressing these questions, the chapters draw on new work on the origins of morality in infancy and the early years, comparative approaches examining morality in primates, and new perspectives on moral emotions. Each chapter is framed in theory and methodology and provides examples of new research to address important questions in the field. This book is essential reading for researchers and advanced undergraduate and postgraduate students studying moral development and developmental psychology.

Promoting Well-Being in the Pre-School Years

Research, Applications and Strategies

Erica Frydenberg, Janice Deans, Rachel Liang

This book, based on an 8-year evidence-based research study, offers real-life strategies to support social and emotional development and wellbeing for children aged 3-5 years, in both educational and family settings. Drawing on the principles from positive education, coping and resilience, it provides a range of strategies to support young children's developing understandings of what it means to be happy and to flourish as a socially responsible member of the family and wider community. It is essential reading for teachers, parents and professionals who work with young children, as well as academics in child development.

Taking Development Seriously A Festschrift for Annette Karmiloff-Smith

Neuroconstructivism and the Multi-Disciplinary Approach to Understanding the Emergence of Mind

Edited by **Michael S. C. Thomas, Denis Mareschal, Victoria Knowland**

This influential festschrift honours the legacy of Annette Karmiloff-Smith, a seminal thinker in the field of child development and a pioneer in developmental neuroscience. The current volume brings together many of the researchers, collaborators, and students who worked with Dr Karmiloff-Smith to show how her ideas have influenced and continue to influence their own research. Taking Development Seriously is essential reading for students and scholars in child development and developmental neuroscience.

The Development of Empathy

Phenomenology, Structure and Human Nature

Larysa Zhuravlova, Oleksiy Chebykin

This thought-provoking volume offers psychological perspectives on the formation of empathy and how this determines both antisocial and prosocial behaviors in individuals. It offers a theoretically grounded and empirically proven integrated approach, helping readers gain a holistic understanding of human nature, and the need for empathic interaction between people. Considering a vision for a society based on empathic relationships, which could be a deterrent to discrimination, help resolve problems of environmental issues, harmonize interpersonal relationships and resolve conflict, this new text is for advanced students of developmental, and educational psychology.

The Psychology of Attachment

Robbie Duschinsky, Pehr Granqvist, Tommie Forslund

Series: *The Psychology of Everything*

What do we actually mean by 'attachment'? How do different caregiving styles impact attachment in children? How do early caregiving experiences impact later development? The Psychology of Attachment is an essential introduction to attachment, offering an accessible explanation of the theory, unpicking common misunderstandings, and providing a balanced overview of key research findings. This unique book introduces the reader to new ways of thinking about the role of relationships, caregiving, and child development, and the way in which they shape our lives.

The Psychology of Human Social Development

From Infancy to Adolescence

Sandie Taylor, Lance Workman

The Psychology of Human Social Development is a major new undergraduate textbook which presents the essential core topics and reflects the exciting new findings in this thriving field. The book follows a thematic approach looking at key topics in social development in childhood and adolescence, including personality development and research methods. The authors examine multiple perspectives, including the state-of-the-art social-ecological approach, and discuss normative development with issues related to "abnormal" development. It will be essential reading for psychology students on courses in Social Development and relevant for related fields such as education, gender studies and nursing.

The Routledge International Handbook of Multidisciplinary Perspectives on Character Development, Volume II

Moderators, Threats, and Contexts

Edited by **Michael D. Matthews, Richard M. Lerner**

Series: *Routledge International Handbooks*

The multidisciplinary Routledge Handbook of Character Virtue Development volumes explore the meaning, structure, function, and development of the construct of character virtues — the attributes of thinking, feeling, and behavior that reflect an individual's positive and coherent contributions to self and, integratively, to the institutions of civil society, social well-being, equity, and social justice.

Theory of Mind in Middle Childhood and Adolescence

Integrating Multiple Perspectives

Edited by **Rory T. Devine, Serena Lecce**

From leading international experts, this landmark text explores how the neural, cognitive and social changes of middle childhood and adolescence shape ongoing development of theory of mind, and how theory of mind helps children navigate life. It considers three key themes: Biological and cognitive bases of theory of mind; how theory of mind is shaped by social experiences; atypical development and youth mental health in middle childhood and adolescence. It offers in depth understanding for all students of developmental and cognitive psychology, neuroscience, clinical psychology and psychiatry, and education, and identifies an agenda for future scholarship on this exciting topic.

Understanding Emotional Development

Providing insight into human lives

Robert Lewis Wilson, Rachel Wilson

Drawing on contemporary research from neuroscience, psychology, education and social welfare, Understanding Emotional Development provides an overview of the full course of emotional development – from infancy and toddlerhood, to key changes which occur during adolescence. Written in an engaging and accessible style, each chapter contains a number of useful pedagogical features, including summaries, review questions, and further reading. The book will be essential reading on all courses covering social and emotional development, and it will also be of interest to professionals working in education, child welfare, and social work.

Why Siblings Matter

The Role of Brother and Sister Relationships in Development and Well-Being

Naomi White, Claire Hughes

Series: Essays in Developmental Psychology

Why Siblings Matter is a cornerstone text on siblinghood, offering a much-needed scientific update on the supportive role of sibling relationships. Integrating findings from a 10 year longitudinal study alongside wider research, it provides a lifespan perspective examining the impact of sibling relationships on children's development and well-being. Sibling relationships in diverse populations are discussed and practical implications of the research are considered, with take-home messages for promoting positive sibling interactions. It will be invaluable for students and researchers in developmental psychology and family studies and professionals in education, health and social work.

Psychology and the Social Class Worldview

A Narrative-Based Introduction

Anne E. Noonan, William Ming Liu

This unique textbook explores the complex topic of social class, explaining the many psychological nuances of class and classism in people's lives as subjective and phenomenological experiences. Featuring activity suggestions, discussion questions, and writing prompts to help apply theory to real-life narratives, this is the ideal resource for students and instructors across psychology, sociology, health economics, and social work, as well as anyone taking courses on examining social class.

3RD EDITION

Social Constructionism

Vivien Burr

Now in its third edition, this popular book introduces students to the area of social science theory and research known as social constructionism. Using a variety of examples from everyday experience and from existing research in areas such as personality, sexuality and health, it explains the basic theoretical assumptions of social constructionism. Key debates, such as the nature and status of knowledge, truth, reality and the self are given in-depth analysis in an accessible style, and material covered in previous editions is extended and updated. This will be an invaluable and informative resource for undergraduate and postgraduate students across the social and behavioural sciences.

Men's Health Equity

A Handbook

Edited by **Derek M. Griffith, Marino A. Bruce, Roland J. Thorpe, Jr.**

Behavioral, social, and policy interventions to improve the health of the overall population have been less successful in reaching or improving the outcomes of men when compared with women. The field of men's health disparities explores how and why inequalities among men exist and presents evidence informing efforts to improve the health of men and reduce inequalities among them. Scholars in this field seek to use a critical lens to systematically explore the root causes of patterns of illness and disease, the specific needs of groups of men, and what can be done to improve men's health and well-being.

Numerical Cognition

André Knops

Series: The Basics

Numerical Cognition: The Basics provides an accessible and concise introduction to the cognitive and neural mechanisms underlying our ability to perceive, process and combine numerical information. The book covers the full breadth of this growing field, including the evolutionary origins of numerical capacities, life-span development, the cognitive mechanisms and strategies during mental arithmetic, and dysfunctional development. Written in student-friendly language, and featuring pointers to useful websites, the book seeks to explain the psychological and neurofunctional mechanisms that underpin one of the most crucial cultural techniques in modern societies.

2ND EDITION

Thinking Visually

Stephen K. Reed

This book documents the many ways pictures, visual images, and spatial metaphors influence our thinking. The book discusses recent empirical, theoretical, and applied contributions that support the view that visual thinking occurs not only where we expect to find it, but also where we do not. Much of comprehending language, for instance, depends on visual simulations of words or on spatial metaphors that provide a foundation for conceptual understanding. It will be an essential read for all students and researchers interested in Visual Thinking.

Building Consulting Skills for Sport and Performance Psychology

An International Case Study Collection

Edited by **Sarah L. Castillo, Chelsea Butters Wooding, Douglas A. Barba, Stilian "Ani" Chroni**

Series: Building Consulting Skills for Sport and Performance Psychology

Building Consulting Skills in Sport and Performance Psychology is an international compilation of case studies that introduces students and young professionals to pertinent issues within a variety of performance environments. With contributions from prominent international practitioners, the book offers case studies from a variety of performance environments including sport, performing arts and high-risk occupations. Each chapter presents a case study and provides exploratory questions relating to ethical considerations, intervention planning and awareness of diverse themes of race, culture, gender, immigration status, disability, among others.

The Peer Guide to Applied Sport Psychology for Consultants in Training

Edited by **Mark W. Aoyagi, Artur Poczwardowski, Jamie L. Shapiro**

The Peer Guide to Applied Sport Psychology for Consultants in Training provides a platform for the influential voices of peers, with whom graduate students relate and connect on a visceral level. Mimicking the environment of a thriving classroom, each chapter is primarily authored by graduate students and recent graduates with an academic mentor serving a secondary role. The chapter topics were selected by the editors as areas where graduate students are commonly challenged, and correspondingly, where peer support and guidance are most valued. A unique addition to the sport psychology literature, this volume is a key resource for developing and established consultants alike.

Sport, Exercise, and Performance Psychology

Theories and Applications

*Edited by* **Angus Mugford, Andrew Friesen**

This book brings together world-class professionals to share theoretical understanding applied to sport, exercise, and performance domains. It highlights how to be more effective in developing psychological skills, context, and understanding for educators, students, and professionals. From both academic and practitioner perspectives, this book takes readers through contextual understanding and into a wide variety of important areas. Specifically, the chapters focus on the mind-body relationship and performance challenges, and on core mental skills applied across different sport, exercise, and performance examples.

Statistical Power Analysis

A Simple and General Model for Traditional and Modern Hypothesis Tests, Fifth Edition

Brett Myers, Kevin R. Murphy

Statistical Power Analysis explains the key concepts in statistical power analysis and illustrates their application in both tests of traditional null hypotheses. It provides readers with the tools to understand and perform power analyses for virtually all the statistical methods used in the social and behavioral sciences. This edition includes new material and new power software. The programs used for power analysis in this book have been re-written in R, a language that is widely used and freely available. Statistical Power Analysis helps readers design studies, diagnose existing studies, and understand why hypothesis tests come out the way they do.

Psychology of Prejudice and Discrimination

Mary E. Kite, Bernard E. Whitley, Jr., Lisa S. Wagner

Psychology of Prejudice and Discrimination provides a comprehensive and compelling overview of what psychological theory and research have to say about the nature, causes, and reduction of prejudice and discrimination. It balances a detailed discussion of theories and selected research with applied examples that ensure the material is relevant to students. The theme of discrimination is developed via discussions of the nature of discrimination, the experience of discrimination, and specific forms of discrimination, including gender, gender identity, sexual orientation, age, ability, and appearance. The concluding theme is the reduction of prejudice.

The Psychology of Prejudice

Richard Gross

Series: The Psychology of Everything

This book explores the topic of prejudice from a psychological perspective, and examines the various forms it can take, from racial jokes to genocide. The author outlines the potential causes of prejudice and discrimination, including personality, social influence, group identity, and evolutionary influences. The final chapter is concerned with prejudice and discrimination reduction and refers to how education, campaigning, and consciousness raising can contribute to greater tolerance and understanding.

Including real world examples and topical references, this is the ideal accessible book for students and general readers interested in prejudice.

Stress, Cognition and Health

Real World Examples and Practical Applications

**Tony Cassidy**

The new edition of this bestselling textbook provides a comprehensive overview of the latest research on stress and health, moving beyond the former deficit model to a resource growth model. It examines all aspects of the topic, from how the external world and the impact of technology makes demands upon individuals, through biological and psychological processes, to outcomes in terms health and wellbeing. The process is set within a dynamic, multilevel systems and developmental lifespan perspective. The book includes a history of the evolution of stress research and the biological systems and immune responses that translate external pressures into health outcomes.

An Evidence-based Guide to College and University Teaching

Developing the Model Teacher

Aaron S. Richmond, Guy A. Boysen, Regan A. R. Gurung

An Evidence-based Guide to College and University Teaching outlines a definition of "model teaching" based on research evidence and accepted best practices in higher education. Teachers at all levels of skill and experience can benefit from clear, objective guidelines for defining and measuring quality teaching. To fulfil this need, this book outlines six fundamental areas of teaching competency—model teaching characteristics—and provides detailed definitions of each characteristic. The book is useful for teachers, trainers, and administrators responsible for promoting excellence in college teaching.

Advancing Developmental Science

Philosophy, Theory, and Method

Edited by **Anthony S. Dick, Ulrich Müller**

Advancing Developmental Science reviews the state-of-the-science in theoretical, methodological, and topical research, with a unique focus on the scholarship that developed within a process-relational framework. It establishes how this broad conceptual framework differs from others, introduces definitions and key figures in different topical areas within developmental science, and lays out a rationale for the topics discussed. Comprehensive in its treatment of the foundational issues that are at the forefront of human development, this text is a necessary resource for graduate students and researchers interested in how the person changes over the life span.

Childhood, Identity and Masculinity

The Boarding School Boys

Soosan Latham, Roya Ferdows

This volume examines the lives of ten Iranian men who were sent to boarding schools in England during the 1960s and 1970s. The reflective narratives explore issues of physical and emotional abuse received from administrators and peers, as well as the pressure of meeting expectations and becoming a man. It will be of interest to scholars of developmental psychology, childhood trauma, education, cultural psychology, men's studies, and gender. Individuals and parents interested in, and considering boarding school education will also find the narratives informative and educational.

4TH EDITION

Concepts and Theories of Human Development

Richard M. Lerner

Concepts and Theories of Human Development is the most comprehensive and in-depth overview of the foundational theoretical contributions to understanding human development and the influence of these contributions for contemporary research and application in developmental science. The book discusses the assumptions involved in such topics as stage theories, the nature-nurture issue, the issue of continuity-discontinuity, and the important role of philosophical ideas about theories – in particular, metatheories – in understanding the links between theory and research.

Developmental Trauma

Theory, Research and Practice

Daniel Cruz

Developmental Trauma offers a comprehensive introduction to the research findings that help us understand the effects on human development of early childhood trauma and adaptation to stress. It explains how DTD differs from PTSD and emerges from a toxic seed planted at the beginning of an individual's lifespan development. Ideal for students of child and adolescent psychology, developmental psychology, clinical psychology, primary care and health psychology, education, social work, and urban studies. It is relevant for graduate students in applied fields such as clinical and counseling psychology, and those working with diverse children, and public health and policy.

Handbook of Integrative Developmental Science

Essays in Honor of Kurt W. Fischer

Edited by **Michael F. Mascolo, Thomas R. Bidell**

The Handbook of Integrative Developmental Science explores how dynamic skill theory can be employed to further advance theory and research in developmental science. Few models today speak so systematically to both the invariant organization and dynamic variability of development, and none rival dynamic skill theory's unique juxtaposition of breadth and precision at the theoretical, methodological, and analytical levels. This handbook brings together a diverse collection of essays that not only illustrate the comprehensive scope of dynamic skill theory, but also forge new research directions for the field.

Lifespan Developmental Systems

Meta-theory, Methodology and the Study of Applied Problems

Ellen A. Skinner, Thomas Kindermann, Andrew Mashburn

This innovative textbook takes advanced undergraduate and graduate students "behind the curtain" of standard developmental science, so they can begin to appreciate the generative value and methodological challenges of a lifespan developmental systems perspective. With the aid of extensive online supplementary materials, it envisions applied developmental science as focused on ways to use knowledge about human development to help solve societal problems in real-life contexts, and considers applied developmental research as purpose-driven, field-based, community-engaged, and oriented toward efforts to optimize development.

Models Of Cognitive Development

Ken Richardson

Series: Psychology Press & Routledge Classic Editions

Models of Cognitive Development offers a careful introduction, with numerous examples, to the vast diversity of models of what knowledge and reasoning are, and how they develop. It provides students, researchers, and comparative theoreticians with a cohesive understanding of the area by organising diverse schools, frameworks and approaches according to a much smaller set of underlying assumptions or preconceptions, which themselves can be historically interrelated. By understanding these, it's possible to find pathways around the area more confidently as a whole, to see the 'wood' as well as the theoretical forest and be able to react to individual models more positively.

International Handbook of Thinking and Reasoning

Edited by **Linden J. Ball, Valerie A. Thompson**

Series: *Routledge International Handbooks*

The International Handbook of Thinking and Reasoning brings together some of the world's leading experts in decision sciences in a single comprehensive and authoritative volume. The book considers current thinking and reasoning research, both in relation to empirical evidence and theoretical analyses. Emerging trends and cutting-edge debates in the field are positioned in relation to established findings and theories, giving a clear sense of the way in which new ideas are challenging traditional viewpoints. The handbook is essential reading for all researchers of Thinking, Reasoning, and Decision Sciences.

2ND EDITION

Problem Solving

Perspectives from Cognition and Neuroscience

S. Ian Robertson

@text: Problem solving is an integral part of everyday life, yet few books are dedicated to this important aspect of human cognition. Problem Solving provides a clear introduction to the underlying mental processes involved in solving problems, examining the methods and techniques used by both novices and experts. Alongside a comprehensive update throughout, this edition also features new content on creative problem solving, insight, and neuroscience. Each chapter is written in an accessible, student-friendly style and features a range of pedagogy, including activities, chapter summaries and further reading.

6TH EDITION

Thought and Knowledge

An Introduction to Critical Thinking

Diane F. Halpern, Dana S. Dunn

Thought and Knowledge applies theory and research from the learning sciences to teach students the critical thinking skills that they need to succeed in today's world. The text is grounded in psychological science and brought to life through humorous and engaging language and numerous practical and real-world examples and anecdotes. Critical thinking skills are presented in every chapter, empowering students to learn more efficiently, research more productively, and present logical, critical, and informed arguments. The skills are reviewed at the end of the chapter, and a complete list of skills with definitions and examples are included in the appendix.

Becoming an Industrial-Organizational Psychologist

Dennis Doverspike, Catalina Flores

This book explains how to become an industrial-organizational psychologist and what different careers in industrial-organizational psychology look like. Starting with preparing for entry into graduate school, the book proceeds to discuss how to be successful in graduate school, and how to tailor academic and career trajectories toward industrial-organizational psychology. Different types of careers are discussed alongside stories of how current industrial-organizational psychologists found their careers.

Ace That Test

A Student's Guide to Learning Better

**Megan Sumeracki, Cynthia Nebel, Carolina Kuepper-Tetzl, Althea Need Kaminske**

This exciting new text reveals the effective study strategies that will help you to use your time more efficiently, ace your tests, and retain information over time. In full colour and accompanied by beautifully illustrated graphics, *Ace That Test* offers evidence-based learning strategies that students can use during their study sessions, including dual coding and the power of retrieving what they know. With QR codes linking to answers to embedded questions and supplemental material, this is essential reading for college, university, and school students as well as educators teaching study skills or learning to learn courses.

The Essential Guide to Studying Abroad

From Success in the Classroom to a Fulfilling Career

**Thomas R. Klassen, Christine Menges**

This book is an indispensable how-to-guide on flourishing when studying abroad, and how to use an international education to begin a fulfilling career after graduation. Written in an engaging and accessible style, using many examples, case studies and links to resources, the book reduces the stress of studying abroad. Covering all aspects of the international student experience – inside and outside the classroom – the book encourages young people to perform their very best and succeed in their new environment. International students preparing for cross cultural learning and recent graduates looking for employment will find this book both practical and inspiring.

How to Solve A Problem

Insights for Critical Thinking, Problem-Solving, and Success in College

**Kelling J. Donald**

This concise and accessible resource offers new college students, especially those in science degree programs, guidance on engaging successfully with the classroom experience and skillfully tackling technical or scientific questions. The author provides insights on identifying, from the outset, individual markers for what success in college will look like for students, how to think about the engagement with professors as a partnership, and how to function effectively in that partnership toward achieving their pre-defined goals or markers of success. It is an ideal companion for science degree prospects and first-generation students seeking insight into the college experience.

Making Your Doctoral Research Project Ambitious

Developing Large-Scale Studies with Real-World Impact

Edited by **Nadia Siddiqui, Stephen Gorard**

This edited collection provides real and outstanding examples of multiple research design methodologies which will allow doctoral researchers to develop a wide set of research skills, leading to the development of a high-quality academic thesis from which peer reviewed research papers and books can emerge. Ideal reading for doctoral students and supervisors, this book is a source of encouragement and motivation for new researchers seeking to challenge general perceptions in the social sciences that PhD or other doctoral research projects must be small-scale rather trivial studies, but can instead produce robust findings that have real-world implications.

The Psychology of Effective Studying

How to Succeed in Your Degree

Paul Penn

This book provides a vital guide for students to key study skills that are instrumental in success at university. It uses a combination of research from cognitive psychology, humour and practical examples to convey where students often go fundamentally wrong in their studying practices and provides clear and concise advice on how they can improve. The book covers time management, academic integrity, writing essays, team work, and other key required skills for academic study. Written in a humorous and irreverent tone, and including illustrations and examples from popular culture, this is the ideal alternative and accessible study skills resource for any student at undergraduate level.

The Student Wellbeing Toolkit

Preparing for Life at College, University and Beyond

Camila Devis-Rozental

Series: *Routledge Study Skills*

The Student Wellbeing Toolkit puts wellbeing at the centre of your journey into university and beyond. By encouraging self-efficacy and a focus on the things you can control, it provides clear guidance to enhance wellbeing and opportunities for self-reflection that help develop self-awareness and prosocial skills for life. Drawing on research evidenced theories around positive psychology, theories of learning, motivation, and self-development, the book explores what, how, and why these areas are key to our wellbeing and the rationale for taking them into account to enable you to flourish and thrive at university.

Academic Writing for University Students

Stephen Bailey

Designed to help students succeed in writing university-level essays and reports, this book has been carefully designed for use both in the classroom and for self-study. Covering three key areas: the writing process, elements of writing and writing models, it encourages critical writing and developing a voice. Academic Writing in the University provides all of the tools necessary to produce excellent written work. With progress checks, practical examples and self-testing units, this practical, user-friendly book covers all stages of the writing process and is an invaluable guide to academic writing in the university.

3RD EDITION

Academic Writing for International Students of Business and Economics

Stephen Bailey

Now in its third edition, this key text helps international students succeed in writing essays and reports for their business and economics course. Thoroughly revised and updated, it is designed to be used by teachers in the classroom and students for self-study. New topics in this edition include writing in groups, written British and American English, and reflective writing. In addition, the new interactive website has a full set of teaching notes as well as more challenging exercises, revision material and links to other sources. Written to deal with the specific language issues faced by international students, this practical, user-friendly book is an invaluable guide.

2ND EDITION

Academic Writing for International Students of Science

Jane Bottomley

This second edition is an accessible companion designed to help science and technology students develop the knowledge, skills and strategies needed to produce clear and coherent academic writing in their university assignments. Using authentic texts to explore the nature of scientific writing, the book covers key areas such as scientific style, effective sentence and paragraph structure, and coherence in texts and arguments. Throughout the book, a range of tasks offers the opportunity to put theory into practice. This is an invaluable tool for the busy science or technology student looking to improve their writing and reach their full academic potential.

Demystifying Academic Writing

Genres, Moves, Skills, and Strategies

Zhihui Fang

Accessible and informative, this book is designed to enhance the capacity of graduate and undergraduate students, as well as early career scholars, to write for academic purposes. Fang describes the key genres and types of academic writing, explains common rhetorical moves, offers linguistic strategies and insights to give students the skills they need for effective academic writing across genres and disciplines. Assuming no technical knowledge, this text is ideal for both non-native and native English speakers alike, and for courses in academic writing, composition, and L2 writing instruction.

2ND EDITION

Writing Essays

A guide for students in English and the humanities

Richard Marggraf Turley

Essays are a major form of assessment in higher education today and this is a fact that causes some writers a great deal of anxiety. Fortunately, essay writing is a skill that can be learned, like any other. Writing Essays demystifies the entire process of essay writing and reveals the tricks of the trade, making your student life easier. You'll learn how to impress tutors by discovering exactly what markers look for when they read your work. Using practical examples selected from real student assignments and tutor feedback, this book covers every aspect of composition, from introductions and conclusions, down to presentation and submission.

2ND EDITION

Writing with Clarity and Style

A Guide to Rhetorical Devices for Contemporary Writers

Robert A. Harris

Writing with Clarity and Style, 2nd Edition, will help you to improve your writing dramatically. The book shows you how to use dozens of classical rhetorical devices to bring power, clarity, and effectiveness to your writing. You will also learn about writing styles, authorial personas, and sentence syntax as tools to make your writing interesting and persuasive. If you want to improve the appeal and persuasion of your speeches, this is also the book for you.

5TH EDITION

Using Sources Effectively

Strengthening Your Writing and Avoiding Plagiarism

Robert Harris

Now in its fifth, expanded edition, Using Sources Effectively, Fifth Edition targets the two most prominent problems in current research-paper writing: the increase in unintentional plagiarism and the ineffective use of research source material. Designed as a supplementary textbook for both undergraduate and graduate courses, this book will help every student who uses research in writing. Included in this edition is coverage of research strategies and source selection (Chapter 2), a chapter on quoting sources effectively (Chapter 4), and a chapter on sentence patterns (Chapter 10). APA and MLA citation styles have been updated throughout the text.

2ND EDITION

Renovating Your Writing

Shaping Ideas and Arguments into Clear, Concise, and Compelling Messages

Richard Kallan

Renovating Your Writing outlines the principles of effective composition by focusing on the essential skill set and mindset every successful writer must possess. Now in its second edition, this novel text provides readers with unique strategies for crafting and revising their writing, whether for school, work, or play. The new edition emphasizes, in particular, the importance of the writer embracing a rhetorical perspective, distinguishing between formal and social media compositional styles, and appreciating the effort needed to produce clear, concise, and compelling messages.

Clarity and Coherence in Academic Writing

Using Language as a Resource

David Nunan, Julie Choi

This book presents a lively, rich, and concise introduction to the key concepts and tools for developing clarity and coherence in academic writing. Well-known authors and linguists David Nunan and Julie Choi provide examples of the linguistic procedures that writers can draw on to enhance clarity and coherence for the reader. This resource makes complex concepts accessible to the emergent writer and illustrates how these concepts can be applied to their own writing. In-text projects and tasks invite you, the reader, to experiment with principles and ideas in developing your identity and voice as a writer.

Guidebook to Academic Writing

Communicating in the Disciplines

Cornelia C. Paraskevas, Deborah F. Rossen-Knill

This innovative guidebook is a concise introduction to discipline-specific academic language. Using authentic texts written by both novice and expert writers and 'translating' current, corpus-based research of academic language into a practical guide, the book gives students the tools to navigate the linguistic features of various disciplines. With exercises and additional online resources, this guidebook provides students with a range of tools they can choose from in order to create effective texts that meet discipline and reader expectations. Accessibly written, it is an essential guide for all students in humanities and sciences writing academic texts in English.

How to Write Qualitative Research

Marcus B. Weaver-Hightower

Qualitative research has exploded in popularity in nearly every discipline from the social sciences to health fields to business. While many qualitative textbooks explain how to conduct an interview or analyze fieldnotes, rarely do they give more than a few scant pages to the skill many find most difficult: writing. That's where *How to Write Qualitative Research* comes in. Using clear prose, helpful examples and lists, it breaks down and explains the most common writing tasks in qualitative research, and each chapter suggests step-by-step how-to approaches writers can use to tackle those tasks.

3RD EDITION

Successful Writing for Qualitative Researchers

Peter Woods, Pat Sikes

The third edition of this text has been brought fully up to date to cover developments in funding and institutional requirements. With new material on the responsibilities of the writer, technological developments, the ability to reach wider audiences and arts-based research, this book is designed to give practical advice to aspiring and established academic writers on mind-sets, strategies, techniques and opportunities. A must-read guide for all those looking to translate their qualitative research into writing.

Writing for Engineering and Science Students

Staking Your Claim

Gerald Rau

Drawing on his extensive experience of teaching international students, Gerald A. Rau provides a clear "argument structure" for students to follow when undertaking both academic and technical writing. This is the first book to make clear the different structures required for engineering versus scientific articles. Tasks and exercises are provided throughout. Using the research article as a model and covering lab reports, research proposals, dissertations, poster presentations, industry reports, emails and job applications, this book is essential reading for all students of science and engineering who are taking a course in writing, or seeking a resource to aid in their writing assignments.

Mastering Academic Writing in the Sciences

A Step-by-Step Guide

Marialuisa Aliotta

This book provides a comprehensive and coherent step-by-step guide to writing in scientific academic disciplines. It is an invaluable resource for those working on a PhD thesis, research paper, dissertation, or report. Writing these documents can be a long and arduous experience for students and their supervisors, and even for experienced researchers. However, this book can hold the key to success. Mapping the steps involved in the writing process - from acquiring and organizing sources of information, to revising early drafts, to proofreading the final product - it provides clear guidance on what to write and how best to write it.

The Routledge Student Guide to English Usage

A guide to academic writing for students

Stewart Clark, Graham Pointon

The Routledge Student Guide to English Usage is an authoritative A-Z guide to key aspects of English usage. Covering approximately 4000 carefully selected words, the authors focus on groups of confusable words that sound alike, look alike or are frequently mixed up. Examples of good usage are drawn from corpora such as the British National Corpus and the Corpus of Contemporary American English. A substantial reference section is also provided with stylistic guidance on academic writing skills, email standards, punctuation and grammar tips. This is the essential reference text for all students working on improving their academic writing skills.

Written English

A Guide for Electrical and Electronic Students and Engineers

Steve Hart

This book covers all aspects of English grammar relevant to electrical and electronic engineers. It discusses working with numbers and algebra, including correct formatting procedures (both body citations and references). The book addresses vocabulary and stylistic issues, describes the level of writing expected in the field, reveals often-made mistakes, and indicates areas where engineers should focus their efforts. The text also offers unique insight into problems students and academics face on a day-to-day basis when writing in a language that is not their mother tongue.

2ND EDITION

Engineering Writing by Design

Creating Formal Documents of Lasting Value, Second Edition

Edward J. Rothwell, Michael J. Cloud

This book shows how effective writing can be achieved by thinking like an engineer. Based on the authors' combined experience as engineering educators, the book presents a novel approach to technical writing, positioning formal writing tasks as engineering design problems with requirements, constraints, protocols, standards, and customers (readers) to satisfy. Featuring illustrative examples, chapter summaries and exercises, quick-reference tables, and recommendations for further reading, this book is packed with valuable tips and information practicing and aspiring engineers need to become effective writers.

50 Things to Think About When Writing a Thesis

Paving Your Own Path to Submission

Donna Starks, Margaret J. Robertson

This book shows thesis writers how to embrace the individual nature of writing, bringing their own unique identities and skillsets to their thesis. Each idea is presented as one that has multiple solutions depending on who the readers are and what they want to achieve. The book guides the reader on identifying their own ways of working, their own particular strengths, as well as their unique voice and how to use these as tools to navigate the process of writing and surviving the thesis. It also provides practical guidance on elements such as the literature review and methodology, considerations around language and how to deal with life after submission.

How to Structure a Thesis, Report or Paper

A Guide for Students

Robert P. Ormrod

This book provides concise practical guidance for students to help make their student's writing process more structured for their group work or thesis at any level. It therefore shows how to demonstrate meaningfully what they have learned in the relevant course or degree programme in a way that is accessible to the supervisor and the examiner. Suitable for students completing theses at Bachelors and Masters level, as well as other types of report-based work, and for supervisors looking for a clear and practical guide to help students with their writing process. The book will also provide a bridge to writing papers for journals in an academic career.

2ND EDITION

Writing Successful Undergraduate Dissertations in Social Sciences

A Student's Handbook

Francis Jegede, Charlotte Hargreaves, Karen Smith, Philip Hodgson, Malcolm Todd, Julia Waldman

A practical guide for students undertaking their dissertation, this book uses real examples of dissertations across the Social Sciences. Providing an accessible overview of the essential steps in conducting research and writing dissertations, each chapter has clear learning outcomes and research objectives with relevant themes. Using a mixture of useful information, exercises, practical strategies, case study material and further reading, it gives hints and tips on beginning and managing a research project and working with supervisors. Packed with proven practical advice it is a dependable starting point and guide throughout the dissertation journey.

Principles and Concepts of Social Research

A Critical Examination of Methodology, Methods and Analysis for Emerging Researchers

Simon Hayhoe

This text covers the foundations of social science research, outlining the history and core elements of Western social research, along with a variety of topics, ranging from the history of scientific beliefs from Ancient Greece to the contemporary world. This book will be of use to core research units and training programs that universities provide at postgraduate level, at doctoral level and for early career post-doctoral researchers, to develop greater understanding of issues surrounding research. In addition to its theory, the contents of the book will include questions for discussion in seminars and small group work.

2ND EDITION

A Concise Guide to Writing a Thesis or Dissertation

Educational Research and Beyond

Halyna M. Kornuta, Ron W. Germaine

A Concise Guide to Writing a Thesis or Dissertation provides clear, concise, and intentional practice guidelines about organizing and writing a thesis or dissertation. Part I provides an overview for writing a thesis or dissertation. It describes the big picture of planning and formatting a research study, from identifying a topic through to writing quality. Part II describes the framework and substance of a research study. It models the pattern generally found in a formal, five-chapter research study.

From Student to Scholar

A Guide to Writing Through the Dissertation Stage

Keith Hjortshoj

From Student to Scholar guides graduate students through the "hidden" developmental transition required in writing a dissertation and moving beyond, to become a successful scholar. Identifying common rhetorical challenges across disciplines, author Hjortshoj explains how to accommodate evolving audiences, motivations, standards, writing processes, and timelines. One full chapter is devoted to "writing blocks," and another offers advice to international students who are non-native speakers of English. The text also offers advice for managing relations with advisors and preparing for the diverse careers that PhDs, trained primarily as research specialists, actually enter.

Writing a Postgraduate Thesis or Dissertation

Tools for Success

Michael Hammond

Series: Routledge Study Skills

Writing a Postgraduate Dissertation or Thesis discusses the challenges that students encounter in their writing and provides thoughtful advice on how to address those challenges. It provides key advice on how to write about a field of research, the tradition of methodology and methods undertaken, and the contribution to knowledge that is being made.

2ND EDITION

Thesis and Dissertation Writing in a Second Language

A Handbook for Students and their Supervisors

Brian Paltridge, Sue Starfield

This fully updated edition is the guide for non-native speakers writing a thesis or dissertation in English. It explicitly unpacks academic writing, using accessible language and practical examples and discusses the issues that are crucial to success. These include: understanding the setting and purpose, understanding writer/reader relationships, issues of writer identity and what examiners really value. Suitable for students from all disciplines writing in a second language this book is equally valuable for supervisors of non-native speakers as it provides tasks that can be used with students to guide them in their writing.

Writing Successful Undergraduate Dissertations in Games Development and Computer Science

Thomas Hailey, Gavin Baxter

Writing a dissertation in the final year at university can be a daunting task, but particularly if the degree is practically oriented and implementation-based. This book provides a concise guide to producing a dissertation in Computer Science, Software Engineering or Games Development degrees with research projects typically involving design, implementation, testing and evaluation. Drawing on the authors' knowledge and experience of supervising dissertation students, the book offers a step-by-step guide to the key areas of writing a dissertation alongside real-life examples.

5TH EDITION

Critical Thinking

A Concise Guide

**Tracy Bowell, Robert Cowan, Gary Kemp**

We are frequently confronted with arguments. Critical Thinking equips students with the concepts and techniques used in the analysis and assessment of arguments whatever the context. Through precise and accessible discussion, this book provides the tools to become a successful critical thinker, who can act and believe in accordance with good reasons, and who can articulate and make explicit those reasons. This fifth edition has been revised and updated throughout, including an expanded range of 'complete examples', the introduction of Venn diagrams, and the discussion of fake news and related phenomena arising in the contemporary scene.

Thinking Critically about Research

A Step by Step Approach

**Jane Ogden**

This book is designed to help readers develop a critical understanding of evidence and the ways in which evidence is presented, and to challenge the information they receive in both academic and non-academic sources. The author presents a step by step approach with a focus on knowing methods, culminating in a bespoke 'critical tool kit' which offers a practical checklist designed to be used when carrying out research. There are also learning features including tasks and worked examples, drawing on real research studies. This is an essential resource for students and researchers, and those putting research into practice, who want to have better critical thinking skills.

Scientific Method

How Science Works, Fails to Work, and Pretends to Work

**John Staddon**

This expanded second edition of Scientific Method shows how science works, fails to work, or pretends to work, by looking at examples from physics, biomedicine, psychology, sociology, and economics. Scientific Method is essential reading for students and professionals trying to make sense of the role of science in society, and of the meaning, value, and limitations of scientific methodology.

6TH EDITION

Thought and Knowledge

An Introduction to Critical Thinking

**Diane F. Halpern, Dana S. Dunn**

Thought and Knowledge applies theory and research from the learning sciences to teach students the critical thinking skills that they need to succeed in today's world. The text is grounded in psychological science and brought to life through humorous and engaging language and numerous practical and real-world examples and anecdotes. Critical thinking skills are presented in every chapter, empowering students to learn more efficiently, research more productively, and present logical, critical, and informed arguments. The skills are reviewed at the end of the chapter, and a complete list of skills with definitions and examples are included in the appendix.

3RD EDITION

Critical Reasoning

A Practical Introduction

**Anne Thomson**

We all engage in the process of reasoning, but we don't always pay attention to whether we are doing it well. This book offers the opportunity to practise reasoning in a clear-headed and critical way, with the aims of developing an awareness of the importance of reasoning well and of improving the reader's skill in analyzing and evaluating arguments. Anne Thomson has updated and revised the book to include fresh and topical examples, and new chapters on evaluating the credibility of evidence and decision making and dilemmas. By the end of the book students should be able to identify flaws in arguments, analyze the reasoning in newspaper articles, books and speeches, assess the credibility of evidence and authorities and approach any topic with the ability to reason and think critically.

2ND EDITION

The New Critical Thinking

An Empirically Informed Introduction

**Jack Lyons, Barry Ward**

This highly innovative text aims to improve real-world critical thinking, incorporating insights from epistemology and philosophy of science to formulate best practices for assessing information sources and circumnavigate our natural intellectual blind spots. The book covers introductory logic in a way that emphasizes practical application, rather than formal completeness. This new edition provides ample resources and exercises for students and instructors alike both in-text and online.

The Need for Critical Thinking and the Scientific Method

**Finlay MacRitchie**

The book exposes many of the misunderstandings about the scientific method and its application to critical thinking. It argues for a better understanding of the scientific method and for nurturing critical thinking in the community. This knowledge helps the reader to analyze issues more objectively, and warns about the dangers of bias and propaganda. The principles are illustrated by considering several issues that are currently being debated. These include anthropogenic global warming (often loosely referred to as climate change), dangers to preservation of the Great Barrier Reef, and the expansion of the gluten-free food market and genetic engineering.

5TH EDITION

Philosophy of Social Science

**Alexander Rosenberg**

Philosophy of Social Science provides a tightly argued yet accessible introduction to the philosophical foundations of the human sciences, including economics, anthropology, sociology, political science, psychology, history, and the disciplines emerging at the intersections of these subjects with biology. Philosophy is unavoidable for social scientists because the choices they make in answering questions in their disciplines force them to take sides on philosophical matters. Conversely, the philosophy of social science is equally necessary for philosophers since the social and behavior sciences must inform their understanding of human action, norms, and social institutions.

2ND EDITION

Philosophy of Social Science

A Contemporary Introduction

**Mark Risjord**

Series: *Routledge Contemporary Introductions to Philosophy*

This accessible text offers a comprehensive overview of debates in the field, with special attention to new research programs. Topics include the relationship of social policy to social science, interpretive research, cognitive and evolutionary explanations, intentional action explanation, rational choice theory, conventions and social norms, joint intentionality, causal inference, and experimentation. The Second Edition provides updates with the most recent literature and adds two new chapters: one on modeling and one on the role of race and gender in the social sciences.

4TH EDITION

Philosophy of Science

A Contemporary Introduction

Alex Rosenberg, Lee McIntyre

Series: Routledge Contemporary Introductions to Philosophy

Any serious student attempting to better understand the nature, methods, and justification of science will value this book. Weaving lucid explanations with clear analyses, the volume is as a much-used, thematically-oriented introduction to the field. The new edition has been thoroughly rewritten based on instructor and student feedback, to improve readability and accessibility, without sacrificing depth. It retains all of the logically structured, extensive coverage of earlier editions, which the journal *Teaching Philosophy* called, "the industry standard" and "essential reading" in a 2010 review.

Philosophy of Science

A Unified Approach

Gerhard Schurz

Philosophy of Science: A Unified Approach combines an elementary introduction to philosophy of science with an integrated survey of all of its important subfields. Focusing on the methodological unity of the sciences, the book provides chapters with introductory sections, followed by complementary, advanced topics. By restricting the teaching materials to the introductory sections, one obtains the basis for a semester-long course. Covering all of the material contained in the book fills a year-long course.

Doing Academic Research

A Practical Guide to Research Methods and Analysis

Ted Gournelos, Joshua R. Hammonds, Maridath A. Wilson

Doing Academic Research is a concise, accessible, and tightly organized overview of the research process in the humanities, social sciences, and business. Rather than a book about research, this is a practical guide to doing research, and guides budding researchers along the process of developing an effective workflow, where to go for help, and how to actually complete the project. It addresses diversity in abilities, interest, discipline, and ways of knowing by focusing not just on the process of conducting any one method in detail, but also the ways in which someone might choose a research method and conduct it successfully.

3RD EDITION

Research Methods

The Basics

Nicholas Walliman

Series: The Basics

Research Methods: The Basics is an accessible, user-friendly introduction to the different aspects of research theory, methods and practice. This third edition provides an expanded and fully updated resource suitable for students and practitioners in a wide range of disciplines including the natural sciences, social sciences and humanities. It is structured in two parts - the first covers the nature of knowledge and the reasons for doing research, the second explains the specific methods used to conduct an effective research project and how to propose, plan, carry out and write up a research project.

2ND EDITION

Research Methods

The Key Concepts

Michael Hammond, Jerry Wellington

Series: Routledge Key Guides

This invaluable resource provides a comprehensive overview of the many methods and methodologies of social research. Each entry provides a critical definition and examines the value and difficulties of a particular method or methodology of concept across different fields of social research. With thematic further reading stretching across the social sciences, this second edition will help readers develop a firm understanding of the rationale and principles behind key research methods, and is a must-have for new researchers at all levels, from undergraduate to postgraduate and beyond.

11TH EDITION

Understanding Research Methods

An Overview of the Essentials

Michelle Newhart, Mildred L. Patten

A perennial bestseller since 1997, this updated eleventh edition of Understanding Research Methods provides a detailed overview of all the important concepts traditionally covered in a research methods class. It covers the principles of both qualitative and quantitative research, and how to interpret statistics without computations, so is suitable for all students regardless of their math background. The book is organized so that each concept is treated independently and can be used in any order without resulting in gaps in knowledge—allowing it to be easily and precisely adapted to any course.

2ND EDITION

The Research Companion

A practical guide for those in the social sciences, health and development

Petra M. Boynton

Books on social and behavioral research too often focus on theory and methods and overlook the practical skills needed to undertake a research project. The Research Companion brings hard-earned lessons from the real world to offer clear and honest advice to all students and practitioners within the social and health sciences. The structure of the book makes it useful for researchers at all levels of experience: the numerous examples and case histories make it ideal for students just beginning their first research project, while the breadth of coverage and wealth of practical tips will also help more experienced researchers.

Literature Review and Research Design

A Guide to Effective Research Practice

Dave Harris

Graduate students executing their first independent research project often struggle to use academic literature effectively in the process of designing, developing, executing, and presenting their work. This book gives an overview of how to develop an effective research practice supported by the academic literature. Particularly suitable for those pursuing professional doctorates in subjects such as education and psychology.

4TH EDITION

Principles of Research in Behavioral Science

Fourth Edition

Bernard E. Whitley, Jr., Mary E. Kite

This book provides a comprehensive overview of research methods in the behavioral sciences, focusing primarily on the conceptual issues inherent in conducting research. It covers topics that are often omitted from other texts, including measurement issues, correlational research, qualitative research, and integrative literature reviews. The book also includes discussions of diversity issues as they related to behavioral science research. New to this edition are chapter boxes that focus on applied issues related to each chapter topic. Throughout the book, readable examples and informative tables and figures are provided.

Conducting Contextual Research

How to Find Out About Yourself and Other People

Bernard Guerin, Eden Thain, Kristen Stevens, Adan C. Richards, Guilherme Bergo Leugi

Series: Exploring the Environmental and Social Foundations of Human Behaviour

This innovative book proposes an entirely new approach to social research, presenting practical ways to discover people's life contexts in order to understand why they do what they do, which is essential for any forms of research that need to understand people. Conducting Contextual Research is essential reading for postgraduate students and professionals in the fields of counselling, psychology and social work, and will be useful to anyone conducting research or inquiries to understand human behaviour, including academic researchers, detectives, intelligence operators, social workers, government service researchers, social policy analysts, and biographers.

3RD EDITION

Research Methods and Society

Foundations of Social Inquiry

Linda Eberst Dorsten, Lawrence Hotchkiss

Research Methods and Society, Third Edition is designed to help undergraduate students acquire basic skills in methods of social science research. These skills provide a foundation for understanding research findings in the social sciences and for conducting social research. Just as important, such skills sets and principles can be applied to everyday situations to make sense of endless stream of claims and counterclaims confronted daily in print and electronic forms, including social media.

2ND EDITION

Social Research Methods by Example

Applications in the Modern World

Yasemin Besen-Cassino, Dan Cassino

This book sharpens students' understanding of the research process and the essential methods that researchers use to perform their work on the cutting edge of the social sciences. The new edition features updated examples across the chapters, reflecting new directions within the social sciences and both a diversity of voices and research output in recent years. The authors also expand their chapter overviews in key areas and weave discussion of validity and ethics carefully into the fabric of each chapter's focus. Written not only to introduce students to the basic principles of social science research, this book provides readers with a toolkit to carry out the process on their own.

4TH EDITION

Principles and Methods of Social Research

William D. Crano, Marilynn B. Brewer, Andrew Lac

Through a multi-methodology approach, *Principles and Methods of Social Research*, Fourth Edition covers the latest research techniques and designs and guides readers toward the design and conduct of social research from the ground up. Applauded for its comprehensive coverage, the breadth and depth of content of this new edition is unparalleled. It is intended for graduate or advanced undergraduate courses in research methods in psychology, communication, sociology, education, public health, and marketing, and further appeals to researchers in various fields of social research, such as social psychology and communication.

Research Methods and Design Beyond a Single Discipline

From Principles to Practice

Heting Chu

This book presents and discusses 15 research methods after an overview of each, an illustration of the research process and an examination of related topics. The focus of this book is on data collection techniques and research design. This book is essential for masters and doctoral students, and researchers who wish to learn about research methods and design comprehensively and systematically, as well as instructors delivering research methods courses across the social and behavioral sciences.

Methodological Concepts

A Critical Guide

Martyn Hammersley

Methodological Concepts: A Critical Guide clarifies many key terms and issues in social research methodology. It outlines the conventional meanings of these terms, but also addresses their contentious character. The aim is to offer interpretations of them that provide a coherent conception of the nature of social science.

Dissertation Research Methods

A Step-by-Step Guide to Writing Up Your Research in the Social Sciences

Philip Adu, D. Anthony Miles

Dissertation Research Methods: A Step-by-Step Guide to Writing Up Your Research in the Social Sciences focuses specifically on methodology when planning, writing and submitting your dissertation thesis. Written by two methodology experts in the social sciences, the book provides a step-by-step guide through each stage of the dissertation process. This compact book will be of use to all graduate students and their supervisors in the Social Sciences, Education and Behavioural Sciences, looking for a guide for working with robust and defensible methodological principles in their dissertation research and theses.

4TH EDITION

Ethnography

Principles in Practice

Martyn Hammersley, Paul Atkinson

This edition has been expertly updated to reflect the important developments in digital and mobile technologies and social media. The ease with which recordings, audio or video, as well as photographs, can be produced via the use of mobile devices has opened up new tools and foci for ethnographers.

Routledge
April 2019:292

Ethnographic Explorations

Surrender and Resistance

Emilie Morwenna Whitaker, Paul Atkinson

In *Ethnographic Explorations: Surrender and Resistance*, Whitaker and Atkinson, two experienced ethnographers, explore the complexities of fieldwork, analysis and writing from new perspectives. It takes the opportunity to reflect on Ethnography not just as a methodological perspective, but at a fundamental level. The book is intended for researchers at postgraduate and postdoctoral levels and at experienced researchers who want to read a different, sometimes challenging, take on ethnographic research and its outcomes.

2ND EDITION

The Researcher's Toolkit

The Complete Guide to Practitioner Research

David Wilkinson, Dennis Dokter

Designed for those undertaking research for the first time, the second edition of *The Researcher's Toolkit* is a practical and accessible guide for all those partaking in small-scale research. Jargon-free and assuming no prior knowledge, it covers the entire research process, from defining a research topic or question through to its completion. This book is a must-read guide for students and budding researchers as well as educators seeking to explain academic research and writing to their pupils. It will benefit anyone looking to complete a research project whether inside academia or beyond.

2ND EDITION

Engaging in Narrative Inquiry

D. Jean Clandinin

In *Engaging in Narrative Inquiry*, Second Edition, D. Jean Clandinin, a pioneer in narrative research, updates her classic formulation on narrative inquiry, clarifying, extending, and refining methods. The increasing interest in narrative inquiry as research methodology across disciplines makes this an essential guide and an excellent text for graduate courses in qualitative inquiry, education and nursing research, sociology, and all courses in autobiographical and narrative research and inquiry.

Qualitative Research

The Essential Guide to Theory and Practice

Maggi Savin-Baden, Claire Major

This book provides beginning researchers with an overview of qualitative research and practical advice and guidance about how to conduct a qualitative study. The book's focus enables researchers to choose the most appropriate methodology by providing them with underpinning theory in a practical way alongside specific examples and proven tips. Beginning by exploring the key differences between qualitative and quantitative research the authors clearly explain the specific features of qualitative research and importantly clarify what qualitative research isn't.

Transformative Moments in Qualitative Research

Method, Theory, and Reflection

Anna Cohen-Miller

This groundbreaking book, eloquently fuses powerful stories of research with methodological insight and theory. Each chapter offers a clear, practical, and engaging exploration of qualitative inquiry, emphasizing the power of research to foster equity, inclusion, and justice-centered practice (e.g., social justice, economic justice, environmental/ecological justice). This book is an invaluable resource for graduate students, practitioners, and researchers to enhance their research and praxis. It will appeal to audiences across disciplinary backgrounds including social sciences, educational sciences, humanities, and STEM and health fields.

2ND EDITION

Essentials of Qualitative Inquiry

Maria J. Mayan

Series: Qualitative Essentials

Essentials of Qualitative Inquiry, Second Edition is the key resource for introducing applied researchers into the qualitative tradition due to its clear exposition, step-by-step approach, and emphasis on methodological coherence. Concise and inexpensive, this edition includes new material on methods, sampling, and analysis and introduces current trends in community-based research and arts-based research, among other updates.

2ND EDITION

Thinking with Theory in Qualitative Research

Alecia Y. Jackson, Lisa A. Mazzei

Thinking with Theory in Qualitative Research, Second Edition demonstrates how to enact various philosophical concepts in practices of inquiry, effectively opening up the process of thought in qualitative studies. In the ten years since the first edition was published, Thinking with Theory has become a vanguard text in the field of postfoundational inquiry for its accessible but thorough introductions to philosophically informed inquiry. This book is for experienced and novice researchers, and students in introductory, general, and advanced qualitative inquiry courses, who may also be first-time readers of philosophy.

Visual Methods of Inquiry

Images as Research

Kerry Freedman, Richard Siegesmund

Visual Methods of Inquiry: Images as Research presents qualitative researchers in the social sciences with the benefits, applications, and forms of visual research methods. It includes a wide variety of images to illustrate the many uses of visual methods for social research. Students of social science and the visual arts will find this book useful in expanding and improving their methods of inquiry. Artists and researchers already familiar with visual methods will find that this book clarifies the ways the visual works in various research contexts and provides helpful language to describe and explain those methods.

2ND EDITION

Research Methods for Environmental Studies

A Social Science Approach

Mark Kanazawa

The methodological needs of environmental studies are unique in the breadth of research questions that can be posed, calling for a textbook that covers a broad swath of approaches to conducting research with potentially many different kinds of evidence. Drawing on a variety of extended and updated examples to encourage problem-based learning and fully addressing the challenges associated with interdisciplinary investigation, this book will be an essential resource for students embarking on courses exploring research methods in environmental studies.

Research Methodologies for Business Management

Vanessa Ratten

Most existing research methodologies texts take a more general approach or are edited books of previously published articles or chapters written by different authors. This book, written by a business management scholar, covers the fundamentals of business management research and its methodologies in a seamless, unified manner. It builds upon the knowledge by examining both qualitative and quantitative research methodologies in the context of business management. It will help business management students and junior researchers quickly build an essential base of knowledge and gain a strategic advantage in publishing and reviewing business related research.

2ND EDITION

Management Research

Applying the Principles of Business Research Methods

**Susan Rose, Nigel Spinks, Ana Isabel Canhoto**

Management Research supports new researchers on every step of the research journey, from defining a project to communicating its findings, as well as balancing the technical aspects of research with the management of the project itself. Management Research provides essential reading for undergraduate and postgraduate students undertaking a dissertation, thesis or research project, as well as professionals currently practicing in the field.

5TH EDITION

Statistics in Plain English

Timothy C. Urdan

Statistics in Plain English is a straightforward, conversational introduction to statistics that delivers exactly what its title promises. Each chapter begins with a brief overview of a statistic that describes what the statistic does and when to use it, followed by a detailed step-by-step explanation of how the statistic works and exactly what information it provides. Chapters also include an example of the statistic (or statistics) in use in real-world research, "Worked Examples," "Writing It Up" sections that demonstrate how to write about each statistic, "Wrapping Up and Looking Forward" sections, and practice work problems.

2ND EDITION

Introduction to the New Statistics

Estimation, Open Science, and Beyond

Geoff Cumming, Robert Calin-Jageman

This fully revised and updated second edition is an essential introduction to inferential statistics. It is the first introductory statistics text to use an estimation approach with meta-analysis ("the new statistics") from the start and also to explain the new and exciting Open Science practices, which encourage replication and enhance the trustworthiness of research. Designed for introduction to statistics, data analysis or quantitative methods courses in psychology, education and other social and health sciences, researchers interested in understanding Open Science and the new statistics will also appreciate this book.

Interpreting Statistics for Beginners

A Guide for Behavioural and Social Scientists

Vladimir Hedrih, Andjelka Hedrih

Interpreting Statistics for Beginners teaches readers to correctly read and interpret results of basic statistical procedures as they are presented in scientific literature, and to understand what they can and cannot infer from such results. Written in an easy-to-read style and focusing on explaining concepts behind statistical calculations, the book is most helpful for readers with no previous training in statistics, and also those wishing to bridge the conceptual gap between doing the statistical calculations and interpreting the results.

8TH EDITION

Making Sense of Statistics

A Conceptual Overview

Deborah M. Oh, Fred Pyrczak

Making Sense of Statistics, Eighth Edition, is the ideal introduction to the concepts of descriptive and inferential statistics for students undertaking their first research project. It presents each statistical concept in a series of short steps, then uses worked examples and exercises to enable students to apply their own learning. This conceptual book is useful for all study levels, from undergraduate to doctoral level across disciplines. Once students understand and feel comfortable with the statistics presented in this book, they should find it easy to master additional statistical concepts.

2ND EDITION

Statistical Methods

An Introduction to Basic Statistical Concepts and Analysis

Cheryl Ann Willard

Statistical Methods explains core statistical concepts and basic analysis techniques for the beginning undergraduate student in statistics or quantitative research methods. Each chapter covers a core concept before guiding students through a series of exercises designed to apply and demonstrate their knowledge. Expanded coverage of the second edition includes two new chapters on essential topics such as factorial analysis of variance, additional chapter exercises, and a full suite of instructor resources – powerpoint slides, instructor manual and test bank questions.

9TH EDITION

Interpreting Basic Statistics

A Workbook Based on Excerpts from Journal Articles

Zealure C. Holcomb, Keith S. Cox, Zealure C. Holcomb

Interpreting Basic Statistics gives students valuable practice in interpreting statistical reporting as it actually appears in peer-reviewed journals. The questions in each exercise are divided into two parts: (1) Factual Questions and (2) Questions for Discussion. The factual questions require careful reading for details, while the discussion questions show that interpreting statistics is more than a mathematical exercise. Each exercise covers a limited number of topics, making it easy to coordinate the exercises with lectures or a traditional statistics textbook.

4TH EDITION

Statistics Explained

Perry R. Hinton

Statistics Explained is an accessible introduction to statistical concepts and ideas for undergraduate and postgraduate students new to the field. It makes few assumptions about the reader's statistical knowledge, carefully explaining each step of the analysis and the logic behind it. This new edition will include instructions and tips on how to present data and findings from SPSS output files, updated and more extensive case studies, and a section on alternative statistical software like R.

2ND EDITION

Statistics for the Behavioural Sciences

An Introduction to Frequentist and Bayesian Approaches

Riccardo Russo

This accessible textbook is for those without a mathematical background (just some notions of basic algebra are sufficient) and provides a comprehensive introduction to all topics covered in introductory behavioural science statistics courses. This timely and highly readable text will be invaluable to undergraduate students of psychology and research methods courses in related disciplines, as well as anyone with an interest in understanding and applying the basic concepts and inferential techniques associated with statistics in the behavioural sciences.

A Pen and Paper Introduction to Statistics

Antonio Marco

This book proposes to reverse the way statistics is taught, by starting with the introduction of linear models. The reader will have the opportunity to work through the examples and compute sums of squares by just drawing and counting, and finally evaluating whether observed differences are statistically significant by using the tables provided. Intended for students, professional life scientists, and those with little prior knowledge of statistics, this book is for all with simple and clear examples, computations and drawings helping the reader to, not only do, but also to understand statistics.

4TH EDITION

An Introduction to Statistical Concepts

Debbie L. Hahs-Vaughn, Richard Lomax

This comprehensive, flexible text is used in both one- and two-semester courses to review introductory through intermediate statistics. Instructors select the topics that are most appropriate for their course. Its conceptual approach helps students more easily understand the concepts and interpret SPSS and research results. Noted for its crystal clear explanations, key concepts are simply stated and occasionally reintroduced and related to one another for reinforcement. Numerous examples demonstrate their relevance. This edition features even more explanation to increase understanding of the concepts and has annotated script for using R.

4TH EDITION

Social Statistics

Managing Data, Conducting Analyses, Presenting Results

Thomas J. Linneman

Series: *Sociology Re-Wired*

With a clear, engaging writing style and fascinating examples using a variety of real data, this text covers the contemporary statistical techniques that students will encounter in the world of social research. It covers these techniques at an introductory level and carefully guides students through increasingly complex examples without intimidating them. Recurrent examples using four timely topics – health, immigration, income inequality, and everyday harassment – help students understand how the techniques fit together, and how to use the techniques in combination with one another. Author created web resource accompanies the text.

2ND EDITION

Statistics in Engineering

With Examples in MATLAB® and R, Second Edition

Andrew Metcalfe, David Green, Tony Greenfield, Mayhayaudin Mansor, Andrew Smith, Jonathan Tuke

This is a textbook for an undergraduate course in statistics for engineers with a minimal calculus prerequisite. The second edition differs from existing books in three main aspects: it is the only introductory statistics textbook written for engineers that uses R throughout the text, there is an emphasis on statistical methods most relevant to engineers that are illustrated with practical applications, and there is an emphasis on random number generation and simulation, all very useful features in engineering.

2ND EDITION

Statistical Rethinking

A Bayesian Course with Examples in R and STAN

**Richard McElreath***Series: Chapman & Hall/CRC Texts in Statistical Science*

The very popular Statistical Rethinking: A Bayesian Course with Examples in R and Stan, Second Edition builds readers' knowledge of and confidence in statistical modeling. Reflecting the need for even minor programming in today's model-based statistics, the book pushes readers to perform step-by-step calculations that are usually automated. This unique computational approach ensures that readers understand enough of the details to make reasonable choices and interpretations in their own modeling work.

2ND EDITION

Using R for Introductory Statistics**John Verzani***Series: Chapman & Hall/CRC The R Series*

The second edition of a bestselling textbook, Using R for Introductory Statistics guides students through the basics of R, helping them overcome the sometimes steep learning curve. The author does this by breaking the material down into small, task-oriented steps. The second edition maintains the features that made the first edition so popular, while updating data, examples, and changes to R in line with the current version.

2ND EDITION

R Primer**Claus Thorn Ekström***Series: Chapman & Hall/CRC The R Series*

Newcomers to R are often intimidated by the command-line interface, the vast number of functions and packages, or the processes of importing data and performing a simple statistical analysis. The R Primer provides a collection of concise examples and solutions to R problems frequently encountered by new users of this statistical software. This new edition adds coverage of R Studio and reproducible research.

2ND EDITION

Learn R

As a Language

**Pedro J. Aphalo***Series: Chapman & Hall/CRC The R Series*

Learning a computer language like R can be either frustrating, fun, or boring. Having fun requires challenges that wake up the learner's curiosity but also provide an emotional reward on overcoming them. This is the second edition of a book designed so that it includes smaller and bigger challenges, in what I call playgrounds, in the hope that all readers will enjoy their path to R fluency.

2ND EDITION

R Data Analysis without Programming

Explanation and Interpretation

**David W. Gerbing**

The new edition of this innovative book, prepares the readers to quickly analyse data and interpret statistical results using R. Professor Gerbing has developed lessR, which is a ground-breaking method in alleviating the challenges of R programming. The lessR extends R, removing the need for programming. This edition expands upon the first edition's introduction to R through lessR which enables the readers to learn how to organize data for analysis, read the data into R, and generate output without performing numerous functions and programming exercises first.

3RD EDITION

SPSS Explained**Perry R. Hinton, Isabella McMurray, Charlotte Brownlow, Peter C. Terry**

SPSS Explained provides the student with all that they need to undertake statistical analysis using SPSS. It combines a step-by-step approach to each procedure with easy-to-follow screenshots at each stage of the process. The authors have many years of experience in teaching SPSS to students from a wide range of disciplines. Their understanding of SPSS users' concerns, as well as a knowledge of the type of questions students ask, form the foundation of this book.

12TH EDITION

How to Use SPSS®

A Step-By-Step Guide to Analysis and Interpretation

**Brian C. Cronk**

This book is designed with the novice computer user in mind and for people who have no previous experience using SPSS. Each chapter is divided into short sections that describe the statistic being used, important underlying assumptions, and how to interpret the results and express them in a research report. The book begins with the basics, such as starting SPSS, defining variables, and entering and saving data. It covers all major statistical techniques typically taught in beginning statistics classes, such as descriptive statistics, graphing data, prediction and association, parametric inferential statistics, nonparametric inferential statistics and statistics for test construction.

18TH EDITION

IBM SPSS Statistics 29 Step by Step

A Simple Guide and Reference

**Darren George, Paul Mallery**

IBM SPSS Statistics 29 Step by Step: A Simple Guide and Reference, eighteenth edition, takes a straightforward, step-by-step approach that makes SPSS software clear to beginners and experienced researchers alike. Accompanied by updated online instructor's materials and website data files, this is an essential resource for instructors and students needing a guide to using SPSS in their work, across the social sciences, behavioural sciences, education, and beyond.

6TH EDITION

IBM SPSS for Introductory Statistics

Use and Interpretation, Sixth Edition

**George A. Morgan, Karen C. Barrett, Nancy L. Leech, Gene W. Gloeckner**

Designed to help students analyze and interpret research data using IBM SPSS, this user-friendly book, written in easy-to-understand language, shows readers how to choose the appropriate statistic based on the design, and to interpret outputs appropriately. The sixth edition includes updated screenshots and instructions for IBM SPSS 24 and Windows 10, and adds helpful callouts to make the book even clearer and easy to use.

2ND EDITION

Applied Statistics for the Social and Health Sciences**Rachel A. Gordon**

Covering basic univariate and bivariate statistics and regression models for nominal, ordinal, and interval outcomes, this textbook provides graduate students in the social and health sciences with fundamental skills to estimate, interpret, and publish quantitative research using contemporary standards. Reflecting the growing importance of 'Big Data', this thoroughly revised and streamlined new edition, outlines changes in best practice in use of statistics in social and health sciences, draws upon new literatures and empirical examples, and highlights the importance of statistical programming, including coding, reproducibility, transparency, and open science.

Applications in R

**G. David Garson**

This book presents a complete exploration of statistical data analysis in R for a wide variety of social science disciplines and quantitative methods courses. Covering all the bases including multilevel modeling and ANOVA / ANCOVA, the book also goes further by looking at topics such as: neural networks to implement deep learning, thus solving complex problems other algorithms cannot; how to deal with missing values in real world data; and the use of text analytics. R code input and output is included. Suitable for all advanced level undergraduate and postgraduate students learning statistical data analysis.

5TH EDITION

Statistical Power Analysis

A Simple and General Model for Traditional and Modern Hypothesis Tests, Fifth Edition

**Brett Myers, Kevin R. Murphy**

Statistical Power Analysis explains the key concepts in statistical power analysis and illustrates their application in both tests of traditional null hypotheses. It provides readers with the tools to understand and perform power analyses for virtually all the statistical methods used in the social and behavioral sciences. This edition includes new material and new power software. The programs used for power analysis in this book have been re-written in R, a language that is widely used and freely available. Statistical Power Analysis helps readers design studies, diagnose existing studies, and understand why hypothesis tests come out the way they do.

Doing Statistical Analysis

A Student's Guide to Quantitative Research

Christer Thrane

Doing Statistical Analysis looks at three kinds of statistical research questions – descriptive, associational and inferential – and shows students how to conduct statistical analyses and interpret the results. Keeping equations to a minimum, it uses a conversational style and relatable examples such as football, covid-19 and tourism, to aid understanding. Each chapter contains practice exercises, and a section showing students how to reproduce the statistical results in the book using Stata and SPSS. Its accessible approach means this is the ideal textbook for undergraduate students across the social and behavioural sciences needing to build their confidence with statistical analysis.

3RD EDITION

Multilevel and Longitudinal Modeling with IBM SPSS

Ronald H. Heck, Scott L. Thomas, Lynn N. Tabata

Series: Quantitative Methodology Series

This text demonstrates how to use the multilevel- and longitudinal-modeling techniques available in IBM SPSS (Version 26). Adopting a workbook format, the text walks readers through setting up, running, and interpreting a variety of different types of multilevel and longitudinal models using the linear mixed-effects model (MIXED and GENLIMIXED) platforms in SPSS. This text is an essential resource for graduate students taking courses on multilevel, longitudinal, and latent variable modeling, multivariate statistics, or advanced quantitative techniques.

2ND EDITION

Longitudinal Structural Equation Modeling

A Comprehensive Introduction

Jason T. Newsom

Series: Multivariate Applications Series

Longitudinal Structural Equation Modeling, Second Edition provides an in-depth, comprehensive overview of structural equation modeling (SEM) strategies for longitudinal data to help readers see which modeling options are available for which hypotheses. Ideal for graduate courses on longitudinal (data) analysis, advanced SEM, longitudinal SEM, and/or advanced data (quantitative) analysis taught in the behavioral, social, and health sciences, Longitudinal Structural Equation Modeling, Second Edition, also appeals to researchers in these fields, and the first edition has been popular as a standard reference for this type of analysis.

7TH EDITION

Advanced and Multivariate Statistical Methods

Practical Application and Interpretation

Craig A. Mertler, Rachel A. Vannatta, Kristina N. LaVenja

Ideal for non-math majors, Advanced and Multivariate Statistical Methods teaches students to interpret, present, and write up results for each statistical technique without overemphasizing advanced math. This highly applied approach covers the why, what, when and how of advanced and multivariate statistics in a way that is neither too technical nor too mathematical. Students also learn how to compute each technique using SPSS software. New to the seventh edition: Updated to SPSS 26 All screenshots and images in full colour Fully updated ancillaries including how to videos for both statistical techniques and SPSS walkthroughs

5TH EDITION

A Beginner's Guide to Structural Equation Modeling

Tiffany A. Whittaker, Randall E. Schumacker

A Beginner's Guide to Structural Equation Modeling, fifth edition, has been redesigned with consideration of a true beginner in structural equation modeling (SEM) in mind. The book covers introductory through intermediate topics in SEM in more detail than in any previous edition. This book is intended for true beginners in structural equation modeling and is designed for introductory graduate courses in structural equation modeling taught in psychology, education, business, and the social and healthcare sciences. This book also appeals to researchers and faculty in various disciplines. Prerequisites include correlation and regression methods.

2ND EDITION

Regression Analysis

A Practical Introduction

Jeremy Arkes

Regression Analysis covers the concepts needed to design optimal regression models and to properly interpret regressions. It details the most common pitfalls, including three sources of bias not covered in other textbooks. This second edition features a new chapter on integrity and ethics, and has been updated throughout to include more international examples. It is ideal for anyone learning quantitative methods in the social sciences, business, medicine, and data analytics. It will also appeal to researchers and academics looking to better understand regressions.

5TH EDITION

Fundamentals of Probability

Saeed Ghahramani

This one- or two-term calculus-based basic probability text is written for majors in mathematics, physical sciences, engineering, statistics, actuarial science, business and finance, operations research, and computer science. It presents probability in a natural way: through interesting and instructive examples and exercises that motivate the theory, definitions, theorems, and methodology. This book is mathematically rigorous and, at the same time, closely matches the historical development of probability. Whenever appropriate, historical remarks are included, and the 2096 examples and exercises have been designed to arouse curiosity and encourage students to delve into the theory.

Bayes Rules!

An Introduction to Applied Bayesian Modeling

Alicia A. Johnson, Miles Q. Ott, Mine Dogucu

Series: Chapman & Hall/CRC Texts in Statistical Science

An engaging, sophisticated, and fun introduction to the field of Bayesian Statistics, Bayes Rules! An Introduction to Bayesian Modeling with R brings the power of modern Bayesian thinking, modeling, and computing to a broad audience. In particular, it is an ideal resource for advanced undergraduate Statistics students and practitioners with comparable experience. Bayes Rules! empowers readers to weave Bayesian approaches into their everyday practice.

2ND EDITION

Bayesian Statistics for the Social Sciences, Second Edition

David Kaplan

This book equips social science researchers to apply the latest Bayesian methodologies to their data analysis problems. The second edition includes new chapters on model uncertainty, Bayesian variable selection and sparsity, and Bayesian workflow for statistical modeling, and emphasizes use of the RStan software package. Topics include frequentist and epistemic probability, prior distributions, Hamiltonian Monte Carlo, Bayesian linear regression and generalized linear models, model evaluation and comparison, multilevel modeling, missing data, and more. The book includes worked-through examples with annotated RStan code, and features a helpful companion website.

The Effect

An Introduction to Research Design and Causality

Nick Huntington-Klein

The Effect: An Introduction to Research Design and Causality is about research design, specifically concerning research that uses observational data to make a causal inference. It is separated into two halves, each with different approaches to that subject. The first half goes through the concepts of causality, with very little in the way of estimation. It introduces the concept of identification thoroughly and clearly and discusses it as a process of trying to isolate variation that has a causal interpretation. Subjects include heavy emphasis on data-generating processes and causal diagrams.

Causal Inference

What If

Miguel A. Hernan, James M. Robins

The application of causal inference methods is growing exponentially in fields that deal with observational data. Written by pioneers in the field, this practical book presents an authoritative yet accessible overview of the methods and applications of causal inference. With a wide range of detailed, worked examples using real epidemiologic data as well as software for replicating the analyses, the text provides a thorough introduction to the basics of the theory for non-time-varying treatments and the generalization to complex longitudinal data.

A First Course in Causal Inference

Peng Ding

Series: Chapman & Hall/CRC Texts in Statistical Science

This textbook, based on the author's course on causal inference at UC Berkeley taught over the past seven years, only requires basic knowledge of probability theory, statistical inference, and linear and logistic regressions. It assumes minimal knowledge of causal inference, and reviews basic probability and statistics in the appendix. It covers causal inference from a statistical perspective and includes examples and applications from biostatistics and econometrics. This book is suitable for an advanced undergraduate or graduate-level course on causal inference, or postgraduate and PhD-level course in statistics and biostatistics departments.

Statistical Analyses for Criminal Justice and Criminology

A Conceptual Introduction

Michael J. DeValve

This book is a how-to guide for statistical analyses designed for undergraduates and others new to the subject. Written in an easy-going and clear style, the book uses policing data to illustrate concepts and includes a short narrative at the beginning of each chapter to engage readers. Easily identified Main Take-Aways and Key Terms features aid student understanding. Designed to combat the fear of mathematics and statistics often held by students in the social sciences, plain verbiage, multiple examples, and clear demonstrations combine to achieve the actualization and proper contextualized use of univariate and bivariate statistics.

Engineering Data Analysis with MATLAB®

Tanvir Mustafy, Tauhid Rahman, Nafisa Siddiqui

This book provides a concise overview of a variety of techniques for analyzing statistical, scientific, and financial data, using MATLAB® to integrate several approaches to data analysis and statistics. Chapters offer a broad review of computational data analysis, illustrated with many examples and applications. Each chapter combines theoretical concepts with practical MATLAB® applications and includes practice exercises, ensuring a comprehensive understanding of the material. With coverage of both basic and more complex ideas in applied statistics, the book has broad appeal for undergraduate students up to practicing engineers.

Data Science

A First Introduction

Tiffany Timbers, Trevor Campbell, Melissa Lee

Series: Chapman & Hall/CRC Data Science Series

Data Science: A First Introduction focuses on using the R programming language in Jupyter notebooks to perform data manipulation and cleaning, create effective visualizations, and extract insights from data using classification, regression, clustering, and inference. The text emphasizes workflows that are clear, reproducible, and shareable, and includes coverage of the basics of version control. All source code is available online, demonstrating the use of good reproducible project workflows.

A Tour of Data Science

Learn R and Python in Parallel

Nailong Zhang

Series: Chapman & Hall/CRC Data Science Series

This book covers the fundamentals of data science, including programming, statistics, optimization, and machine learning in a single and short book. It does not cover everything, but instead, teaches the key concepts and topics. It also covers two of the most popular programming languages used in Data Science, R and Python, in one source.

Data Science in Practice

Tom Alby

Series: Chapman & Hall/CRC Data Science Series

Data Science in Practice is the ideal introduction to data science. With or without math skills: Here you get the all-round view that you need for your projects. This book describes how to properly question data, to unearth the treasure that data can be. As technology alone is not enough, this book also deals with problems in project implementation, illuminates various fields of application and addresses ethical aspects. Data Science in Practice includes many examples, notes on errors, decision-making aids and other practical tips, and is ideal as a complementary text for university students, or as a useful learning tool for those starting more data-related roles.

Data Science and Analytics with Python

Jesus Rogel-Salazar

Series: Chapman & Hall/CRC Data Mining and Knowledge Discovery Series

The book is designed for practitioners in data science and data analytics in both academic and business environments. The aim is to present the reader with the main concepts used in data analytics using tools developed in Python, such as SciKit Learn, Pandas, Numpy, etc. The use of Python is of particular benefit given its recent popularity in the data science community, and the book can be used by seasoned programmers and newcomers alike.

Advanced Data Science and Analytics with Python

Jesus Rogel-Salazar

Series: Chapman & Hall/CRC Data Mining and Knowledge Discovery Series

The book is intended for practitioners in data science and data analytics in both academic and business environments. It aims to present the reader with concepts in data science and analytics that were deemed to be more advanced or simply out of scope in the author's first book, and are used in data analytics using tools developed in Python such as SciKit Learn, Pandas, Numpy, etc. The use of Python is of particular benefit given its recent popularity in the data science community. The book is therefore a reference to be used by seasoned programmers and newcomers alike and the key benefit is the practical approach presented throughout the book.

Foundations of Data Science with Python

John M. Shea

Series: Chapman & Hall/CRC The Python Series

Foundations of Data Science with Python introduces readers to the fundamentals of data science, including data manipulation and visualization, probability, statistics, and dimensionality reduction. This book is targeted toward engineers and scientists, but it should be readily understandable to anyone who knows basic calculus and the essentials of computer programming. This book can be used as an undergraduate textbook for an Introduction to Data Science course or to provide a more contemporary approach in courses like Engineering Statistics. It is also intended to be accessible to practicing engineers and scientists.

2ND EDITION

Modern Data Science with R

Benjamin S. Baumer, Daniel T. Kaplan, Nicholas J. Horton

Series: Chapman & Hall/CRC Texts in Statistical Science

New data technologies and database systems facilitate scraping data and merging information from different sources and formats and restructuring data into a form suitable for analysis. State-of-the-art workflow and tools foster well-documented and reproducible analysis. Modern statistical methods allow the analyst to fit and assess models as well as to undertake supervised or unsupervised learning to extract information. Contemporary data science requires tight integration of these statistics, computing, data skills, mathematics, and communication. The text is intended for readers with some background in statistics and modest prior experience in scripting and programming.

Exploring Data Science with R and the Tidyverse

A Concise Introduction

Jerry Bonnell, Mitsunori Ogihara

This book introduces the reader to data science using R and the tidyverse. No prerequisite knowledge is needed in college-level programming or mathematics (e.g., calculus or statistics). The book is self-contained so readers can immediately begin building data science workflows without needing to reference extensive amounts of external resources for onboarding. The contents are targeted for undergraduate students but are equally applicable to students at the graduate level and beyond. The book develops concepts using many real-world examples to motivate the reader. An exercise set is made available and designed for compatibility with automated grading tools for instructor use.

Statistical Inference via Data Science: A ModernDive into R and the Tidyverse

Chester Ismay, Albert Y. Kim

Series: Chapman & Hall/CRC The R Series

This is a modern textbook in statistical inference, using the principles of data science through R and the Tidyverse. It assumes minimal background knowledge of the reader: there is no algebra, no calculus, and no prior programming/coding experience. It is designed to be a gentle introduction to the practice of analyzing data and answering questions using data the way data scientists, statisticians, data journalists, and other researchers would. This book is suitable for teaching a first course in statistical inference at undergraduate level.

Introduction to Data Science

Data Analysis and Prediction Algorithms with R

Rafael A. Irizarry

Series: Chapman & Hall/CRC Data Science Series

The book begins by going over the basics of R and the tidyverse. You learn R throughout the book, but in the first part we go over the building blocks needed to keep learning during the rest of the book.

Telling Stories with Data

With Applications in R

Rohan Alexander

Series: Chapman & Hall/CRC Data Science Series

The book equips students with the end-to-end skills needed to do data science. That means gathering, cleaning, preparing, and sharing data, then using statistical models to analyse data, writing about the results of those models, drawing conclusions from them, and finally, using the cloud to put a model into production, all done in a reproducible way. This book will achieve the goals by working through extensive case studies in terms of gathering and preparing data, and integrating ethics throughout. It is specifically designed around teaching how to write about the data and models, so aspects such as writing are explicitly covered.

Practitioner's Guide to Data Science

Hui Lin, Ming Li

Series: Chapman & Hall/CRC Data Science Series

This book aims to increase the visibility of data science in real-world, which differs from what you learn from a typical textbook. Many aspects of day-to-day data science work are almost absent from conventional statistics, machine learning, and data science curriculum. This book is for readers who want to explore possible career paths and eventually become data scientists. This book comprehensively introduces various data science fields, and programming skills in data science projects. Traditional data-related practitioners such as statisticians, business analysts, and data analysts will find this book helpful in expanding their skills for future data science careers.

2ND EDITION

Big Data and Social Science

Data Science Methods and Tools for Research and Practice

Edited by **Ian Foster, Rayid Ghani, Ron S. Jarmin, Frauke Kreuter, Julia Lane**

Series: *Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences*

This classroom-tested book fills a major gap in graduate- and professional-level data science and social science education. It can be used to train a new generation of social data scientists to tackle real-world problems and improve the skills and competencies of applied social scientists and public policy practitioners. It empowers you to use the massive and rapidly growing amounts of available data to interpret economic and social activities in a scientific and rigorous manner.

Model-Based Machine Learning

John Winn

Machine learning is being applied to a growing variety of problems in a variety of domains. A fundamental challenge when using machine learning is connecting the abstract mathematics of a machine learning technique to real world problems. This book tackles this through model-based machine learning, focusing on understanding the assumptions encoded in a machine learning system and their impact on the behaviour of the system. The key ideas of model-based machine learning are introduced through case studies involving real-world applications. It aims not just to explain machine learning methods, but also how to create, debug, and evolve them to solve a problem.

Applied Machine Learning Using mlr3 in R

Edited by **Bernd Bischl, Raphael Sonabend, Lars Kottthoff, Michel Lang**

mlr3 is an award-winning ecosystem of R packages that have been developed to enable state-of-the-art machine learning capabilities in R. This book gives an overview of flexible and robust machine learning methods, with an emphasis on how to implement them using mlr3 in R. It covers many key topics, including basic machine learning tasks, such as building and evaluating a predictive model; hyperparameter tuning of machine learning approaches to obtain peak performance; building machine learning pipelines that perform complex operations

2ND EDITION

A First Course in Machine Learning

Simon Rogers, Mark Girolami

The new edition of this popular, undergraduate textbook has been revised and updated to reflect current growth areas in Machine Learning. The new edition includes three new chapters with more detailed discussion of Markov Chain Monte Carlo techniques, Classification and Regression with Gaussian Processes, and Dirichlet Process models. Previous chapters have also been updated to reflect new developments in Machine Learning, and correct any previous errors in the text.

2ND EDITION

Introduction to Machine Learning with Applications in Information Security

Mark Stamp

Series: Chapman & Hall/CRC Machine Learning & Pattern Recognition

Introduction to Machine Learning with Applications in Information Security, Second Edition provides a classroom-tested introduction to a wide variety of machine learning and deep learning algorithms and techniques, reinforced via realistic applications. The book is accessible and doesn't prove theorems, or dwell on mathematical theory. The goal is to present topics at an intuitive level, with just enough detail to clarify the underlying concepts. The applications presented serve to demystify the topics by illustrating the use of various learning techniques in straightforward scenarios.

Machine Learning Toolbox for Social Scientists

Applied Predictive Analytics with R

Yigit Aydede

Machine Learning Toolbox for Social Scientists covers predictive methods with complementary statistical "tools" that make it mostly self-contained. The inferential statistics is the traditional framework for most data analytics courses in social science and business fields, especially in Economics and Finance. The new organization that this book offers goes beyond standard machine learning code applications, providing intuitive backgrounds for new predictive methods that social science and business students can follow. The modern statistical methods the book provides allows it to be effectively used in teaching in the social science and business fields.

Data Science and Machine Learning

Mathematical and Statistical Methods

Dirk P. Kroese, Zdravko Botev, Thomas Taimre

Series: Chapman & Hall/CRC Machine Learning & Pattern Recognition

The purpose of this book is to provide an accessible, comprehensive textbook in data science and machine learning. The book will provide a solid basis in linear algebra, optimization, probability, and statistics. The main body will discuss the major topics in machine learning and data science: data manipulation, supervised and unsupervised learning, modelling of data, linear models, regression, classification, principal component analysis, deep learning, high dimensional data, regularization, kernel methods, support vector machines, etc.

Statistical Machine Learning

A Unified Framework

Richard Golden

Series: *Chapman & Hall/CRC Texts in Statistical Science*

For advanced undergraduate students, graduate students, and professional. Presents a wide range of popular, disparate, and diverse machine learning algorithms within a unified theoretical framework, characterized by a collection of carefully chosen theorems from the fields of nonlinear optimization theory and mathematical statistics which respectively characterize both asymptotic behavior and generalization performance. The purpose is to teach students how to confidently apply these theorems in practice. The only required mathematical prerequisites are lower-division linear algebra, lower-division calculus, and an upper-division calculus-based course in probability theory.

A Computational Approach to Statistical Learning

Taylor Arnold, Michael Kane, Bryan W. Lewis

This book synthesizes those techniques from numerical analysis, algorithms, data structures, and optimization theory most commonly employed in statistics and machine learning. We provide concrete applications of these methods by giving complete reference implementations for a large set of the most commonly used statistical estimators. The goal is to provide a self-contained textbook explaining the inner algorithmic workings of statistical estimators.

Statistics and Data Visualisation with Python

Jesus Rogel-Salazar

Series: Chapman & Hall/CRC The Python Series

Statistics and Data Visualisation with Python aims to build statistical knowledge from the ground up by enabling the reader to understand the ideas behind inferential statistics, and begin to formulate hypotheses that form the foundations for the applications and algorithms in statistical analysis, business analytics, machine learning and applied machine learning. This book is intended to serve as a bridge in statistics for graduates and business practitioners interested in using their skills in the area of statistical science, and data science and analytics, acting as a refresher for readers that have taken some courses in statistics, but not necessarily use it in their daily work.

Data Visualization Made Simple

Insights into Becoming Visual

Kristen Sosulski

Data Visualization Made Simple is a practical guide to the fundamentals, strategies, and real-world cases for data visualization, an essential skill required in today's information-rich world. With foundations rooted in statistics, psychology, and computer science, data visualization offers practitioners in almost every field a coherent way to share findings from original research, big data, learning analytics, and more. Both novices and seasoned designers in education, business, and other areas can use this book's effective, linear process to develop data visualization literacy and promote exploratory, inquiry-based approaches to visualization problems.

Data Visualization

Charts, Maps, and Interactive Graphics

Robert Grant

Series: ASA-CRC Series on Statistical Reasoning in Science and Society

This is the age of data. There are more innovations and more opportunities for interesting work with data than ever before, but there is also an overwhelming amount of quantitative information being published every day. Data visualisation has become big business, because communication is the difference between success and failure, no matter how clever the analysis may have been. The ability to visualize data is now a skill in demand across business, government, NGOs and academia. Data Visualization: Charts, Maps, and Interactive Graphics gives an overview of a wide range of techniques and challenges, while staying accessible to anyone interested in working with and understanding data.

Data Sketches

A journey of imagination, exploration, and beautiful data visualizations

Nadieh Bremer, Shirley Wu

Series: AK Peters Visualization Series

In Data Sketches, Nadieh Bremer and Shirley Wu document the creative and collaborative process behind 24 unique data visualization projects, spanning different topics, technologies, and forms. Features: Technical write-ups with beginner-friendly explanations of core concepts; Practical lessons on data and design challenges; Full-color; Interview with Tamara Munzner; Foreword by Alberto Cairo. This book is perfect for anyone interested or working in data visualization and information design, especially those who want to take their work to the next level and are inspired by unique and compelling data-driven storytelling.

Data Visualization in Excel

A Guide for Beginners, Intermediates, and Wonks

Jonathan Schwabish

Series: AK Peters Visualization Series

Data Visualization in Excel closes the gap between what people think Excel can do and what they can achieve in the tool. Over the past few years, recognition of the importance of effectively visualizing data has led to an explosion data analysis and visualization software tools. But for many people, Microsoft Excel continues to be the workhorse for their data visualization needs, not to mention the only tool that many data workers have access to. This book is the perfect guide for anyone who wants to create better, more effective, and more engaging data visualizations.

Narrative by Numbers

How to Tell Powerful and Purposeful Stories with Data

Sam Knowles

Series: Using Data Better

As jobs in the knowledge economy become increasingly similar, there are two core skills that everyone needs if they are going to thrive and succeed and to make a difference. These are the ability to interrogate and make sense of data, and the ability to use the insights extracted from the data to persuade others to take action. Analytics + storytelling = influence. Humans are hardwired to respond to stories and story structure. There are some simple and effective rules of data-driven storytelling that will help everyone tell more compelling, evidence-based stories, whoever they need to convince to create positive change. Narrative by Numbers shows you how.

Building Science Graphics

An Illustrated Guide to Communicating Science through Diagrams and Visualizations

Jen Christiansen

Series: AK Peters Visualization Series

Building Science Graphics is a practical guide for anyone interested in creating science-centric illustrated explanatory diagrams. Starting with a clear introduction to the concept of information graphics and their role in contemporary science communication, it then outlines a process for creating graphics using evidence-based design strategies. The heart of the book is composed of two step-by-step graphical worksheets, designed to help jump-start any new project.

Essentials of Communication Skill and Skill Enhancement

A Primer for Students and Professionals

John O. Greene

For those who wish to learn or teach the tools of skillful communication, this book provides concrete insight into what makes a person a successful communicator. Predicated on four simple notions—that communication can be done well or poorly, that communication skills matter, that people differ in those skills, and that those skills can be improved—the book helps readers identify and enhance their own communication strengths and address weaknesses, assess the communication skills of others, and coach others to improvement. This book is written for students and professionals in fields such as human resources, sales, training, counseling, customer relations, education, and healthcare.

2ND EDITION

Communication in Organizations

Basic Skills and Conversation Models

Henk T. Van der Molen, Yvonne Gramsbergen-Hoogland

This new edition continues to give clear advice and guidance on communicating in a range of different contexts in the workplace. From handling complaints and breaking bad news to negotiating deals and giving presentations, the book explores the building blocks to effective communication skills, nurturing the leadership qualities required in any organization. Illustrated with concrete examples throughout, the new edition includes a new chapter on career coaching, as well as exercises and ideas for role-play to enable the ideas to come alive. This will be an invaluable book for students of management and business psychology, as well as those taking courses who are already in the workplace.

Creating a Successful Digital Presence

Objectives, Strategies and Tactics

Gordon Fletcher, Noel Adolphus

Increasingly graduates, and anyone entering employment, need an individual digital presence to showcase themselves to secure their first professional role. It takes an employability approach to encourage readers to recognise and deliver an effective digital presence. By using a strategic and systematic process, this book draws together academic thinking with practical outcomes. It is essential reading for advanced undergraduate and postgraduate students studying any discipline related to the digital world, particularly digital marketing and digital business, entrepreneurship and strategy, as well as those taking employability and personal professional development programmes.

Building Science Graphics

An Illustrated Guide to Communicating Science through Diagrams and Visualizations

Jen Christiansen

Series: AK Peters Visualization Series

Building Science Graphics is a practical guide for anyone interested in creating science-centric illustrated explanatory diagrams. Starting with a clear introduction to the concept of information graphics and their role in contemporary science communication, it then outlines a process for creating graphics using evidence-based design strategies. The heart of the book is composed of two step-by-step graphical worksheets, designed to help jump-start any new project.

Adding value to the learning experience

What is eBook+?

eBook+ is the enhancement of content in our eBooks with additional interactive features to provide added value and a better user experience. Our eBook+ titles are designed to make reading more engaging, increase comprehension and retention of the material and ultimately lead to greater student success.

Experience interactive learning with us

Key Features Available

Audio

Selected eBook+ contain professionally-recorded audio excerpts, including music and enunciation, to enhance learning according to individual needs.

Video

eBook+ contain video clips to assist students in gaining deeper understanding of the content and amplify the learning experience.

Further Links

Provides external links to help users access additional content for reference and further reading.

Data Visualization

Using visual elements like charts, graphs and maps to provide an accessible way to see and understand trends and data.

Quizzes and Assessments

Uses quizzes and assessments to engage learners and assess the competencies during various learning stages.

Interactive Problems and Solutions

Provide active learning through interactive problem-solving exercises to improve engagement and performance.

Benefits

Digitization

Beyond just digital versions of print materials, taking advantage of digital elements such as multimedia and real-time collaboration can improve engagement, comprehension and retention for users through interactive content

Enhanced Learning Experience

Integration of self-testing and real-world examples into study material on a single platform allows for quick and easy check for mastery of content before progressing, as well as, application of theory in the real world

Accessibility

A device-agnostic design for a seamless experience across many devices and systems; Users can access the material anytime, anywhere
